ADDITIONAL SITE VISIT (OPTIONAL)

Vendors have requested a walkthrough in the area that will support these two console furniture positions. This is scheduled with the customer for jail coordination and available to all vendors on May 29, 2026 @ 9:00 am CT. This is to allow the vendors to take measurements for the two positions. The objective as outlined by the Sheriff is:

The objective is to transition the entire jail from the current UHF system to the new 800 MHz system. Because of this change, the console the jail staff uses every day for in-facility radio communication must be replaced. In addition, the secondary console — which is mainly used when operations get busy and is currently the only means of communicating outside the jail — also needs to be replaced. Both new consoles will be identical, since the UHF system will no longer be used. As such, new furniture will be required to accommodate the new consoles and equipment.

All vendors are invited for this date and time only to gather the measurements and observe and gather all necessary data for the area in question. Please acknowledge receipt of this email and advise on attendance.
