

BOERNE HIGH SCHOOL BOND 2022

Boerne High School's Bond 2022 projects expanded green spaces and state-of-the-art learning environments for students.

The courtyard remodel improved the previous conditions in the open space connecting the original building to additions that have been made over the past few decades, making a beautiful gathering place for students out of what was once an area prone to flooding.

The addition to the L wing of the campus now houses the district's second Pathway to Technical Early College High School programs, Health Science. 6 multi-use academic classrooms, 2 science lab classrooms, and 2 nursing lab classrooms are part of the addition. Since opening that wing in 2025, around 20% of incoming 9th graders are enrolled in the Health Science program, which is housed at BHS and open to all high school students.

Outdoor upgrades to tennis courts and lighting, replacement of turf at Boerne ISD Stadium, replacement of outdated HVAC units, and updates to parking lots and drainage provided much-needed space and facilities changes to the campus.

Construction Period: April 2023 - July 2024
Project Budget: \$12,209,943.00
Final Cost: \$10,559,992.93
