

VIOLA WILSON ELEMENTARY BOND 2022

Boerne ISD's 8th Elementary School, Viola Wilson Elementary, was designed by Pfluger Architects. Pfluger and Boerne ISD worked together to innovate amid rising construction costs and kept the project on target – and under budget.

The campus is built around natural elements, existing trees, and views of the beautiful Hill Country. In 2025, it received 5 stars of distinction for design from the Texas Association of School Boards and the Texas Association of School Administrators in the state's annual Exhibition of School Architecture.

The 97,151 square foot building has 6 collaborative areas in each pod, 2 flex rooms, and an open concept design on its first floor, which ties the library and learning spaces into the rest of the campus. It also features an outdoor amphitheater area, which allows for outdoor learning, family and community events, and more.

Construction Period: January 2023 – August 2024

Project Budget: \$40,423,593.61

Final Cost: \$40,208,767.02
