- Be Kind

The School Board recognizes that the success of our educational system relies heavily on educational planning and ongoing evaluation to adapt district programs and activities to the changing needs of society and the community. To guide these efforts, the Board adopts the following definitions for the development of sound and responsible educational policies:

1. “Philosophy” means a composite statement of the relationship between the individual and society based upon beliefs, concepts and attitudes from which the goals and objectives of the district are derived.
2. “Goal” means a statement of broad direction or intent which is general and timeless and is not concerned with a particular achievement within a specified time.
3. “Objective” means a specific accomplishment to be achieved which can be measured within a given time and under specifiable conditions and which, if attained, advances the system toward a corresponding goal.

Wrangell Public School Board believes that for education to succeed there must be ongoing partnerships between educators, parents/guardians, students, and the community. The School Board encourages the participation of all segments of the community to create an educational climate which promotes the positive and healthy development of each child.
