About the CMAS Student Data File

Listed below is the file layout for the CMAS Student Data File and instructions for accessing the file. The district and school files are in .csv format. The first row of the file contains the headers; subsequent rows contain the data.

Student records do not have aggregate score information starting in field DF if a Not Tested or Void Code was applied to the record. For student records without Not Tested or Void Coding, the fields contain data appropriate for the particular subject and grade.

Note: The CMAS Science/Social Studies and CMAS Math/ELA/CSLA layouts are identical from the State Abbreviation field (A) to the Percentile Rank field (DI). Some fields may be filler in different files. Math, ELA, and CSLA fields start on page 17. Science and Social Studies fields start on page 21.
