Welcome to the School Year at Green Elementary School!

We are excited to begin a new school year and look forward to building strong, supportive relationships with our students. As part of our commitment to your child's overall development, we will be focusing on their social-emotional well-being throughout the year.

Our support will include periodic classroom guidance lessons, as well as individual and small group counseling based on referrals from parents and teachers. These services are designed to help students develop important skills, including emotional regulation, forming healthy friendships and social interactions, coping with family changes, and enhancing executive functioning.

We also work to connect families with outside resources when needed and collaborate with school staff to support each student's academic and emotional success.

Please feel free to reach out at any time this year with questions or concerns about your student's social-emotional well-being or overall school experience. We're here to support your child every step of the way.
