Monitoring Requirements Not Met for Foxburg Area Water and Sewer Authority

Our water system violated several drinking water standards over the past year. Even though these were not emergencies, as our customers, you have a right to know what happened and what we did to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During 2025 we failed to monitor for the following contaminants and therefore cannot be sure of the quality of our drinking water during that time.

What should I do?

There is nothing you need to do at this time.

The table below lists the contaminant(s) we did not properly test for during the last year, the required sampling frequency, how many samples we took, when samples should have been taken, and the date on which corrective action samples were (or will be) taken.

Contaminant	Required sampling frequency	Number of samples taken	When all samples should have been taken	When samples were or will be taken
Volatile organic carbons (VOC's)	Annually	0	01-01- 2025 - 12-31-2025	02-02, 2026
Di-Ethylhexyl Phthalate (SOC)	Annually	0	01-01- 2025 - 12-31-2025	02-02-2026

What happened? What was done? When will it be resolved?

The sampling was not taken by the laboratory and analysis was performed on 02-02-2026
