Vincent Wang - WAB Class of 2011 graduate

Vincent is someone who has always taken great pride in being part of the WAB community and has never stopped giving back to our school. He has joined our alumni panel events in the past and was even the first-ever alumni speaker at the WABX Dinner. We're so excited to have him back on campus again today, supporting our WAB Hackathon and sharing his incredible journey and insights with all of us.

After graduating from WAB, Vincent went on to the University of Toronto, where he earned his Bachelor's degree in Statistics and Media. Now based in Shang Hai, and travel to Beijing and Bay Area, he works as an investor at Monolith Management, backing early-stage global tech and AI startups across diverse fields. While he has deep expertise in interactive products and gaming ecosystems, his investment scope is far broader; covering generative AI, consumer tech, UGC platforms, virtual worlds, and all kinds of AI-powered innovative products, making him the perfect mentor for our Hackathon creators.

Vincent brings nearly a decade of rich experience investing in the gaming and AI space. He started his investment career at Hero Entertainment as Investment Director, and later spent six years at ByteDance serving as the Head of Gaming & AI Investments. Being on the frontline of the global industry for years, he has followed the growth of AI technology, UGC platforms and virtual worlds very closely, and has built sharp insights into startup growth, industry trends and global tech ecosystems.

Throughout his career, Vincent has been passionate about how cutting-edge AI and technology empowers creators, redefines product experiences, and builds new digital ecosystems. He specializes in identifying innovative early-stage ideas, creator-driven platforms, and tech-backed creative solutions.
