

SAU 41: Building the Future – Strategic Plan & Infrastructure Roadmap

SAU 41 is executing a comprehensive strategic plan that integrates physical infrastructure upgrades with academic excellence. This initiative addresses a projected 14% enrollment increase by 2033 while prioritizing student wellness, curriculum alignment, and the retention of high-quality staff.

Infrastructure & Capacity Planning

Planning is underway to support significant student population growth through 2033.

Sustainable & Modern Facilities

Upgrades include rooftop solar panels, LED lighting, and high-efficiency HVAC systems.

Accessibility & Maintenance

Projects focus on ADA-compliant pathways and essential boiler/infrastructure replacements across campuses.

Key Facility Projects in Progress/Proposed:

- HBMS / HBHS:** Rooftop solar panel installation and HVAC upgrades
- Captain Samuel Douglass:** Boiler replacement and new ADA pathway to soccer fields
- Hollis Primary School:** Proposed expansion and renovation project to meet capacity

Academic Excellence & Student Wellness

Rigorous PreK-12 Curriculum Alignment

Continuous monitoring ensures vertical and horizontal curriculum alignment across all grade levels.

Holistic Student Wellness

Implementing the “one trusted adult” concept to foster safe, inclusive school environments.

Competitive Personnel Retention

Utilizing updated compensation packages and research-based mentoring to retain top-tier educators.
