Beebe School Site Council
Meeting Minutes
May 27, 2026
5:00 PM

Location: Zoom

Members Present: Dr. Tonogbanua, Dr. Murphy, Mr. Grubb, Eva Yihua, Dr. O'Leary

Agenda Notes:

1) Special Education programming

- There was talk among families that there were multiple new substantially separate classrooms opening next year. That is not the case.
- There are concerns also from families that new programming is coming to Beebe in the area of special education. This is not the case.
    - There is a growing number of students over the last few years who are requiring more complex support. We as a school and a district are shifting to meet these needs.

2) ML growth and ELLevation

- This year we had a record number of students who were able to FEL. The vast majority of students were able to move at least 1 ELD level this year. We are very pleased with how our ML students are responding to literacy instruction this year. More than half of our ML students are performing at grade level which is significantly higher than the 30% from the fall and the number of ML students who are far below grade level is within a normed bell curve.
- Ellevation is used by ML and general education teachers as a progress monitoring tool. It is a resource for instruction, scaffolds and supports general education planning as well.

3) Staffing for SY27

- We are waiting for the budget to be approved, hopefully at the school committee Meeting June 1st. We do not anticipate a reduction in positions but will not know until this meeting is held and the budget is approved.

4)School Improvement Plan

- We discussed the MTSS priority on the plan which will be presented at the school committee meeting June 1st
- A multitude of data including Dibels, i-ready, classroom assessments, progress monitoring, CKLA etc are used to help us identify specific targeted skills for intervention grouping.
