Pleasant Hill School District #1

2025-26 Annual Asbestos Notification

As a requirement of the federal Asbestos Hazard Emergency Response Act (AHERA), the District must notify parents, teachers and employee organizations of the existence and location of the Asbestos Management Plan (AMP). This notice fulfills that requirement.

AHERA guidelines require school districts to perform inspections every six month at all locations where asbestos containing material is known to be present. The District is also required to have a certified consultant complete 3-year re-inspections. PBS Engineering & Environmental fulfilled this requirement in February 2024; re-inspections will be scheduled again for 2027. Documentation and results for these inspections can be found in the Asbestos Management Plan. Additionally, Pleasant Hill School District maintenance and custodial employees receive initial and continuing training in accordance with AHERA guidelines.

Removal of asbestos containing floor tile/mastic in the Music Room (36386 OR-58, Pleasant Hill, OR 97455) Asbestos Abatement consisted of the removal and disposal of approximately 2020 SF of asbestos containing materials indicated as greater than 1% Asbestos throughout between March 19, 2026 and March 27, 2026. Closeout documents of Asbestos Abatement available upon request at the Pleasant Hill School District office.

A complete Asbestos Management Plan is available for review at the Pleasant Hill School District Office located at 36386 Highway 58, Pleasant Hill, OR 97455.
