

## SUMMER PREPARATION FOR AP COURSES:

- **AP Human Geography:**

[Click Here For Video](#)

- **AP Statistics:**

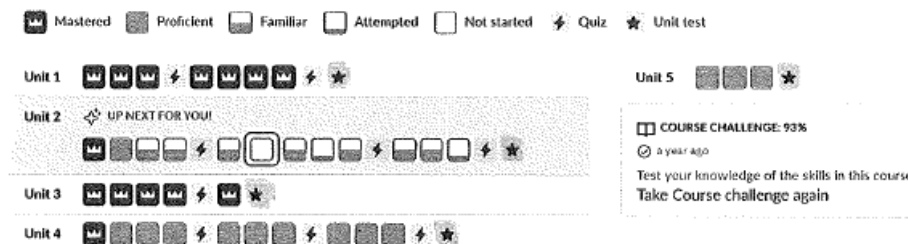

### AP Statistics Summer Assignment

Use the link below to go to the Khan Academy Getting Ready for AP Statistics page.  
<https://www.khanacademy.org/math/get-ready-for-ap-statistics>

This course will prepare you with everything you are expected to know when entering AP Statistics. Most of these topics have been covered in previous math courses over the years. I would recommend beginning by taking the skills assessment for each unit (denoted by a star) to test your prior knowledge. Then, go back and click on any topics where you are not proficient.

### Get ready for AP® Statistics

Course mastery: 75% ⓘ

I will not be checking how many topics you reviewed, however, there will be a quiz on this material the first Friday of school.

Proud to be an "A" School District

### AP Calculus AB Summer Work Instructions

**AP Calculus AB** summer work consists of three assignments reviewing **Pre-Calculus** material that is *critical* to success in calculus. Students should expect to submit these assignments and to test over this material in August. The testing date will be announced in class in August. Notice all three assignments are marked “no calculator,” which means the test will also be “no calculator.”

I hope these assignments are straightforward and stress-free. I also hope your summer break is enjoyable and restorative.

J Smith-Landwehr
