

THS Class Gift of 1925

This beautiful fountain was a class gift from the Tustin High School Class of 1925. Originally it was located where our current outdoor stage is. After many years it was used as a planter and during the modernization of the campus Plaza in 2009, the slightly damaged fountain was removed and stored away. As Tustin High's 100th Anniversary approached, the fountain was recovered and restored this past spring to its former glory. The decorative tiles on this fountain are original to 1925 except for the lower square blue tiles that have added height to the fountain.

Tustin High School wishes to thank all who were involved in this creative undertaking: TUSD Maintenance and Operations who was entrusted in the restoration project of our fountain, the electricians, plumbers, and creative expertise of our tile craftsmen; Alfredo Cruz and Edward Cruz, and to our very own Ceramics teacher, Ysabel Gray who created the ceramic fountain finial.
