PROJECT AWARE

Suicide Prevention Safety Training

Provided by the Carbon Lehigh Intermediate Unit #21

Helping Children Learn

CALM CLINICAL

(Counseling on Access to Lethal Means)

CALM Clinical Workshop:

Description: This training is designed to introduce those providing counseling services to the rationale of means safety and teach them how to plan for, initiate, and carry out effective conversations with clients and their families about reducing access to lethal means - especially firearms and medications - in times of suicide risk.

Objectives:

- Understand various lethal means and their impact
- Learn how to recognize signs of behavioral health crisis or suicidal ideation
- Practice asking someone about their accessibility to lethal means
- Understand various strategies to reduce access to lethal means
- Learn how to provide continued direct support to families and individuals

Duration: 4 hours
