

Carpenter School Renovation: Phase 2

Phase Two of the Carpenter School renovation project continues to move forward. At this time, it appears there may be an opportunity to regain some time within the project schedule, allowing work on the gymnasium strapping to resume as early as next week.

The electrical contractor is scheduled to return onsite at the end of this week to continue wiring activities. Lighting fixtures have been ordered and will be installed as they are received. In addition, the ceiling materials have been ordered and delivered to the contractor's warehouse. The team will continue installing the ceiling grid and tiles as the electrical work progresses and areas become ready for completion.

Coordination of all project activities will continue closely with the GWRSD Maintenance Team to ensure the work remains organized and on schedule.

Ossipee Summer Program Update

This summer, Ossipee Central School, Effingham Elementary School, Ossipee Recreation Department, and the School's Out Program are partnering to provide an expanded six-week summer program that blends recreation, enrichment, and targeted academic support for students and families.

Thanks to the creativity and dedication of Ossipee Central School Principal Andrea Fournier and School's Out Coordinator Aimee Lussier, the district has developed a collaborative model that leverages existing community partnerships and district resources in a fiscally responsible manner while expanding opportunities for students throughout the summer.

The program will run from July 6, 2026 through August 14, 2026 and will incorporate engaging, theme-based learning opportunities throughout the day. Lesson plans will be prepared in advance with guidance from reading specialists to reinforce specific literacy and academic skills. In addition, a Title I tutor funded through a combination of district resources and repurposed Title I curriculum funds will provide consistent small-group intervention and support for students requiring additional academic assistance.

Students will participate in station-based enrichment activities connected to weekly themes, literacy-focused field trip activities, journaling opportunities, and access to an onsite library stocked with books, games, and music to help keep learning integrated into the summer experience. The program will also include a "Chill Zone" located on the Ossipee Central School stage, offering flexible seating, board games, puzzles, and books for students seeking a quieter or more relaxing environment during the day.

Several special enrichment events are also planned throughout the summer program, including:

- A visit from the Children's Literacy Foundation (CLiF) on July 13, during which every participating child will receive two new books to take home.
- A July 21 presentation by Little Red Wagon Theatre titled *Stories, Spiders and Science*.
- A July 27 Circus Workshop and Show presented by Troy Wunderle.

Additionally, Monday-only programming opportunities will be available for Ossipee and Effingham students who are not enrolled in the full recreation program. Families interested in those opportunities will be encouraged to contact Andrea Fournier, Principal of Ossipee Central School, or Patti Morrissey, Principal of Effingham Elementary School, for additional information.

This partnership represents an exciting opportunity to provide students with meaningful summer experiences that support both academic growth and social engagement while strengthening collaboration between the schools and the broader community.
