Definitions (as defined by ASTM E1527-21)

Recognized Environmental Conditions **(REC)** – The presence or likely presence of any hazardous substances or petroleum products in, on, or at a property (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions.

Historical Recognized Environmental Condition **(HREC)** – A past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). Before calling the past release an HREC, the environmental professional must determine whether the past release is a REC at the time the Phase I Environmental Site Assessment is conducted (for example, if there has been a change in the regulatory criteria). If the EP considers the past release to be a REC at the time the Phase I ESA is conducted, the condition shall be included in the conclusions section of the report as a REC.

Controlled Recognized Environmental Condition **(CREC) –** A REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implantation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls). A condition considered by the EP to be a CREC shall be listed in the findings section of the Phase I ESA and as a REC in the conclusions section of the Phase I ESA Report.

Material Threat – A physically observable or obvious threat which is reasonably likely to lead to a release that, in the opinion of the environmental professional, is threatening and might result in impact to public health or the environment. An example might include an aboveground storage tank system that contains a hazardous substance and which shows evidence of damage. The damage would represent a material threat if it is deemed serious enough that it may cause or contribute to tank integrity or failure with a release of contents to the environment.

De Minimis Conditions – A condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be de minimis conditions are not RECs nor CRECs.

Business Environmental Risk – A risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of business environmental risk issues may involve addressing one or more non-scope considerations (i.e. asbestos containing materials, radon, lead based paint, lead in drinking water, mold, etc.).

1. EXECUTIVE SUMMARY

Environmental Group Services, Limited (EGSL) of Chicago, Illinois was contracted by *Lyons Township High School District 204* to perform a Phase I Environmental Site Assessment of the property located at 8100 Willow Springs Road, Willow Springs, Illinois (herein referred to as the Subject Property or the Site).

The Subject Property investigation consisted of reviewing environmental regulatory databases of the Illinois Environmental Protection Agency (IEPA), the United States Environmental Protection Agency (USEPA), the Office of the State Fire Marshal (OSFM), and the Illinois Emergency Management Agency and local government agencies, reviewing historical information, and conducting a site assessment. The purpose of this investigation was to identify areas of environmental concern associated with the Site.

The Subject Property is comprised of an irregular shaped parcel that is approximately 71.369 acres in size. There are no structures located on-site, with the property mainly being comprised of densely vegetated land. Dating back to the 1930s, the property was originally comprised of farmland. No structures appear to have ever been located on-site.

EGSL did not identify any recognized environmental conditions, historical recognized environmental conditions, and/or controlled recognized environmental conditions in connection with the Subject Property, as defined by the American Society of Testing and Materials Standard E1527-21, "Standard Practice for Environmental Site Assessments".

The information contained in this report represents the professional opinion of EGSL. In accordance with ASTM Standard E1527-21, be advised that this environmental site assessment is not a guarantee of site conditions, cannot eliminate uncertainty as to the presence of possible underground storage tanks, contamination, or other recognized environmental conditions, and is not an exhaustive assessment of the property.

The information contained in this report is confidential in nature. This report is exclusively for the use and benefits of Lyons Township High School District 204 *and is not for the use or benefit of, nor may it be relied upon by any other person or entity. The contents of this report may not be quoted in whole or part. The information presented in this report is preliminary and shall not be used for abatement or resolution related services.*

2. PROJECT OVERVIEW & SCOPE OF WORK

Environmental Group Services, Limited (EGSL) conducted the activities as stated in the following scope of work requested by *Lyons Township High School District 204* with reference to the American Society for Testing and Materials Standard Practice for Environmental Site Assessments (ASTM E1527-21). EGSL declares that this report was developed and performed by an Environmental Professional in accordance with 40 CFR 312 (All Appropriate Inquiries Rule) in order to search for areas of recognized environmental conditions (RECs) associated with the Subject Property, and is intended to satisfy the requirements as set forth in the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability. In accordance with ASTM Standard E1527-21 (1.3), business environmental risk is beyond the scope of the Phase I site assessment and if a comprehensive evaluation of business

environmental risk is desired this must be agreed to by the user and environmental professional by separate agreement.

"ASTM defines RECs as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. De minimis conditions are not recognized environmental conditions."

2.1 Client Responsibilities

In order to comply with 40 CFR 312 (All Appropriate Inquiries (AAI)), 40 CFR 312.22 (Additional Inquiries (AI)), and ASTM E1527-21 Standard, the client bears the following responsibilities for satisfying certain components of the environmental inquiry:

- Search for Environmental Cleanup Liens/Activity and Use Limitations.
- Consider relationship of the purchase price to the fair market value of property, if not contaminated.
- Consider specialized knowledge or experience on the part of the purchaser.
- Consider commonly known or reasonably ascertainable information about the property.
- Consider degree of obviousness of contamination.

Failure of the client to meet these responsibilities could result in forfeiture of CERCLA protection.

2.2 On-Site Inspection

- EGSL conducted an on-site inspection of the Subject Property that consisted of personnel interviews and visual observations to identify areas of environmental concern.

- EGSL visually searched for above-ground storage tanks (ASTs), underground storage tanks (USTs), and associated piping.

- EGSL reviewed environmental documentation files, historical information and records made available to assist in identifying potential environmental liability of the Subject Property.

- EGSL collected photographic documentation of significant environmental features of the Subject Property.

2.3 Inspection of Surrounding Land

EGSL conducted a visual inspection of surrounding land to identify observable potential environmental threats by adjacent land use. EGSL conducted the inspection from the Subject Property and did not enter private properties.

2.4 Site History

- EGSL interviewed knowledgeable people, including current and previous owners/operators, where feasible, to determine past and present uses of the Subject Property.
- Historical Topographic Maps, Sanborn Maps, City Directories and Aerial Photographs were reviewed in order to assist in determining the past uses of the Subject Property.
- EGSL reviewed published literature for geological information for the area of the Subject Property. Intrusive data gathering or sampling of subsurface materials at the Subject Property is beyond the scope of this assessment.
- EGSL contacted local agencies to search for information related to environmental files of the Subject Property.

2.5 Regulatory Review

EGSL contracted *Environmental Data Resources* (EDR) to complete a review of all federal and state government regulatory databases as identified in Section 5 of this report.

2.6 Sample Collection

No samples were collected as part of the Phase I ESA.

2.7 Exceptions, Additions and Deletions

There were no exceptions, additions, or deletions from the requirements specified in ASTM Standard E1527-21.

2.8 Clean Construction and Demolition Debris (CCDD) 35 IL. Adm. Code 1100

On July 30, 2010, Public Act 96-1416 became law and was updated August 30, 2012. This CCDD law requires Illinois EPA to propose rules to establish additional technical requirements for CCDD facilities; set operating standards for uncontaminated soil fill operations; and develop standards for the maximum allowable concentrations of chemical constituents in uncontaminated soil generated during construction or demolition activities and used as fill material at either type of fill site. If any subsurface soils are removed from the site due to construction, demolition, renovations, trenching, etc., then all current CCDD rules and regulations must be followed.

2.9 ASTM Non-Scope Considerations

It should be noted that the following ASTM Non-Scope Considerations are NOT included in this Phase I ESA: asbestos containing building material inspection/sampling; biological agents; cultural/historical resources; ecological resources; endangered species; health and safety; indoor air quality; industrial hygiene; lead-based paint; lead in drinking water; potable water quality; mold or microbial growth conditions; PCB-containing building materials; radon; regulatory compliance; substances not defined as hazardous substances; and wetlands.

3. SUBJECT PROPERTY DETAILS

3.1 Site Location

The Subject Property is located at 8100 Willow Springs Road. The area east of the property across Willow Springs Road is utilized for industrial purposes, while the area west of the property is utilized for residential purposes.

3.2 Legal Description and PIN Numbers

The PINs and legal description can be found on the survey in Appendix A.

3.3 Site Description

Size of Property	An irregular shaped parcel that is approximately 71.369 acres in size.
Buildings/ Improvements	None.
Other Significant Features	The property is comprised of densely vegetated land.

3.4 Current and Historical On-site Operations

There are no structures located on-site, with the property mainly being comprised of densely vegetated land. Dating back to the 1930s, the property was originally comprised of farmland. No structures appear to have ever been located on-site.

3.5 Visual Observations

The following table lists observations noted during the Subject Property site inspection:

USTs/ASTs	None Observed It should be noted that a non-intrusive environmental assessment such as this, no matter how thorough, cannot ultimately deny the presence of USTs at any given site, particularly on sites that have been previously developed.
Spills/Stains	None Observed
Soil Disturbances	None Observed
Miscellaneous Debris	None Observed
Wells	None Observed
Pits, Ponds, or Lagoons	None Observed
Wastewater Discharge	None Observed
Stressed Vegetation	None Observed
Septic System	None Observed
Odors	None Observed
Pools of Liquid	None Observed
Heating System	None Observed
Floor Drains	None Observed
Other	-Much of the property was inaccessible due to the dense vegetation.

3.6 Adjacent Properties

North	79th Street followed by a golf course.
East	Vacant land and Willow Springs Road followed by various industrial properties.
South	German Church Road followed by residential dwellings.
West	*Pleasantdale Elementary School* (8100 School Street) and residential dwellings.

3.7 Topography

Site Elevation	603 ft.
Site Topography	Generally flat.

Local Topography Gradient	Generally southeast.
Soil Survey (USDA)	The United States Department of Agriculture Web Soil Survey describes the subsurface geology as part of the Rockton soil component which is comprised of loams with moderate infiltration rates.
Groundwater Depth	Unknown.
Groundwater Flow Direction	Unknown.

4. SITE HISTORY

Emphasis was placed on identifying on-site and off-site environmental conditions most likely to:

- Adversely affect the future site development and usage.
- Present financial liabilities to site owners and developers.
- Be of concern to the various regulatory agencies, in so far as site conditions are covered by current environmental regulations.

Sources for the historical review of the Subject Property and the adjacent properties included interviews, Sanborn Fire Insurance Maps, Aerial Photographs, Topographic Maps, City Directories, Freedom of Information Act (FOIA) Requests, ASTM Questionnaire, and Prior Environmental Reporting, if available.

4.1 Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps were originally designed for the fire insurance industry to assess fire insurance premiums on structures requiring such insurance. Presently they are used as a tool for determining prior uses of residential, commercial, and industrial properties for potential environmental concerns. **Sanborn coverage was not available for the Subject Property.**

4.2 Aerial Photographs

Year	Subject Property
1938	The property is comprised of farmland.
1951	The property is comprised of farmland.
1954	The property is comprised of farmland.
1961	The property is comprised of farmland.
1967	The property is comprised of farmland.
1973	The property is comprised of farmland.
1978	The property is comprised of farmland.
1981	Property is comprised of vegetated and vacant land.
1988	Property is comprised of vegetated and vacant land.
1993	Property is comprised of vegetated and vacant land.

Year	Subject Property
1998	Property is comprised of vegetated and vacant land.
2005	Property is comprised of densely vegetated land.
2009	Property is comprised of densely vegetated land.
2012	Property is comprised of densely vegetated land.
2015	Property is comprised of densely vegetated land.
2019	Property is comprised of densely vegetated land.
2023	Property is comprised of densely vegetated land.

4.3 Historical Topographic Maps

A topographic map (topo) is a color coded line-and-symbol representation of natural and selected artificial features plotted to a scale. Topos show the shape, elevation, and development of the terrain in precise detail by using contour lines and color coded symbols. Historical topographic maps are a valuable resource for documenting the prior use of a property and its surrounding area; and due to their frequent availability, can be particularly helpful when other standard historical sources (i.e. city directories, fire insurance maps or aerial photographs) are not reasonably ascertainable. Some maps are color-coded to represent the overall general development of the area.

Year	Subject Property
1890/1891	No structures are present on the property.
1893/1894	No structures are present on the property.
1900	No structures are present on the property.
1901	No structures are present on the property.
1927/1928	No structures are present on the property.
1953	No structures are present on the property.
1963	No structures are present on the property.
1972/1973	No structures are present on the property.
1993	No structures are present on the property. Portions of the property are identified as being vegetated land.
1997/1998	No structures are present on the property. Portions of the property are identified as being vegetated land.
2012	No structures are present on the property. Property is identified mainly as vegetated land.
2015	No structures are present on the property. Property is identified mainly as vegetated land.
2018	No structures are present on the property. Property is identified mainly as vegetated land.
2021	No structures are present on the property. Property is identified mainly as vegetated land.
2023	No coverage exists for the Subject Property.
2024	No structures are present on the property. Property is identified mainly as vegetated land.

4.4 City Directory

City Directories are used as a tool for locating individuals and/or businesses in a particular urban or suburban area. The address 8100 Willow Springs Road was identified on the City Directory as having residential listing Harold Hess ranging in date from 1958-2005.

4.5 Freedom of Information Act Requests (FOIA)

EGSL performed a search of the online databases of the Illinois Environmental Protection Agency Office Bureau of Land (IEPA Land), IEPA Bureau of Air (IEPA Air), IEPA Bureau of Water (IEPA Water), Illinois Emergency Management Agency Division of Disaster Assistance and Preparedness (IEMA), the Office of the State Fire Marshal (OSFM), and the individual City or Village Hall regarding available information at the Subject Property. If the City or Village Hall did not have an online database, then a formal FOIA request was submitted.

Agency	Results
IEPA Land	Subject Property not identified on database. It should be noted that there were several listings for the general intersection of the property; however, EGSL believes these listings are related to the east adjacent industrial properties and are not of significant concern to the Subject Property.
IEMA	Subject Property not identified on database.
OSFM	Subject Property not identified on database.
Village of Willow Springs	EGSL was provided with a previous Phase I ESA Report (see Section 4.7).

4.6 ASTM Questionnaire

EGSL was provided with a signed ASTM Questionnaire by Mr. Brian Stachacz, Director of Business Services for *Lyons Township High School District 204,* dated April 24, 2026. No concerns were identified.

4.7 Previous Environmental Reporting

EGSL was provided with a Phase 1 Environmental Site Assessment by the Village of Willow Springs, prepared by *Gabriel Environmental Services,* dated September 6, 2026. The report is not for the Subject Property; however, for the two east adjacent parcels currently owned by the Park District. Ultimately, the Phase I Report recommended that the former dwellings have an asbestos survey completed; the private well be properly abandoned; and removal of the septic tank and field if necessary.

EGSL did not consider the findings to be an environmental concern to the Subject Property.

4.8 Interviews

The standards set forth in the ASTM E1527-21 requires that interviews with a key site manager should be made in an attempt to obtain information regarding possible environmental concerns at the Subject Property.

EGSL was unable to interview a key site manager as the property is comprised of vacant, vegetated land. The absence of an interview does not significantly alter the findings/conclusions of this report.

4.9 Data Gaps

40 CFR 312 (AAI Rule) defines a data gap as:

"a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by this practice, including, but not limited to site reconnaissance (for example, an inability to conduct the site visit), and interview (for example, an inability to interview the key site manager, regulatory officials, etc.).

There were no significant data gaps as part of this Phase I ESA.

5. GOVERNMENT REGULATORY DATABASES

A regulatory database search was obtained through *Environmental Data Resources* to determine the type and number of environmentally regulated sites which might potentially impact the Subject Property. The databases, search distances, and number of properties within the search distances are summarized in the following table:

Database	Definition	ASTM Search Distance	Subject Property Identified	Sites Identified Within Search Radius
STANDARD ENVIRONMENTAL RECORDS				
NPL	National Priority List - EPA's list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under Superfund. The list is based primarily on the score a site receives from the Hazard Ranking System. EPA is required to update the NPL at least once a year. A site must be on the NPL to receive money from the Trust Fund for remedial action.	1 mile	No	0
Proposed NPL	Proposed National Priority List Sites.	1 mile	No	0

Database	Definition	ASTM Search Distance	Subject Property Identified	Sites Identified Within Search Radius
NPL Liens	Federal Superfund Liens – Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability.	Target Property	No	0
Delisted NPL	National Priority List Deletions - The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.	1 mile	No	0
Federal Facility	A listing of NPL and Base Realignment & Closure sites found in CERCLIS database where FERRO is involved in cleanup projects.	½ mile	No	0
SEMS	Superfund Enterprise Management System.	½ mile	No	0
SEMS-ARCHIVE	Superfund Enterprise Management System Archive.	½ mile	No	3
CORRACTS	Resource Conservation and Recovery Act (RCRA) Corrective Action Activity - List of handlers with RCRA corrective action activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.	1 mile	No	2
RCRA TSDF	RCRA Treatment, Storage and Disposal Facility - Facilities on which treatment, storage, and/or disposal of hazardous wastes takes placed, as defined and regulated by RCRA.	½ mile	No	1
RCRA-LQG	RCRA Large Quantity Generator - Facilities which generate over 1,000kg of hazardous waste, or over 1kg of acutely hazardous waste per month.	¼ mile	No	0
RCRA-SQG	RCRA Small Quantity Generator - Facilities which generate less than 1000kg of hazardous waste, or less than 1kg of acutely hazardous waste per month.	¼ mile	No	0
RCRA-VSQG	RCRA Very Small Quantity Generator – Facilities which generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.	¼ mile	No	2
LUCIS	Land Use Control Information System – contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.	½ mile	No	0
US Eng Controls	Engineering Controls Sites List – A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.	½ mile	No	0

Database	Definition	ASTM Search Distance	Subject Property Identified	Sites Identified Within Search Radius
US Inst Controls	Sites with Institutional Controls – A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.	½ mile	No	1
ERNS	Emergency Response Notification System - List of reported CERCLA hazardous substance releases or spills in quantities greater than the reportable quantity, as maintained at the National Response Center.	Target Property	No	0
IL SSU	State Hazardous Waste Site - Illinois' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties.	1 mile	No	2
IL CCDD	Clean Construction of Demolition Debris – Construction and demolition (C and D) debris is nonhazardous, uncontaminated material resulting from construction, remodeling, repair, or demolition of utilities, structures, and roads.	½ mile	No	0
IL SWF/LF	Solid Waste Landfill – Records typically contain an inventory of solid waste disposal facilities or landfills in a particular state.	½ mile	No	0
IL LF Special Waste	Special Waste Site List – The landfills, as of January 1, 1990, accept non-hazardous special waste pursuant to the Illinois EPA Non-Hazardous Waste Definition.	½ mile	No	0
IL NIPC	Solid Waste Landfill Inventory – NIPC is and inventory of active and inactive solid waste disposal sites.	½ mile	No	0
IL LUST	Leaking Underground Storage Tank - The LUST Incident Reports contain an inventory of reported leaking underground storage tank incidents.	½ mile	No	6
Indian LUST	A listing of leaking underground storage tank locations on Indian land.	½ mile	No	0
IL LUST Trust	LUST Payment Priority List – In case sufficient funds are not available in the UST Trust Fund, requests for payment are entered on the Payment Priority List.	½ mile	No	0
FEMA UST	A listing of all FEMA owned USTs.	¼ mile	No	0
IL UST	Underground Storage Tank - The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of RCRA	¼ mile	No	3
IL AST	Above Ground Storage Tanks.	¼ mile	No	0
Indian UST	A listing of underground storage tank locations on Indian land.	¼ mile	No	0
IL Eng Controls	Sites with Engineering Controls – Sites using engineered barriers.	½ mile	No	0

Database	Definition	ASTM Search Distance	Subject Property Identified	Sites Identified Within Search Radius
IL Inst Controls	Institutional Controls – Legal or administrative restrictions on land use and/or other activities which effectively limit exposure to contamination may be employed as alternatives to removal or treatment of contamination.	½ mile	No	1
Indian VCP	A listing of voluntary cleanup priority sites located on Indian Land.	½ mile	No	0
IL SRP	Site Remediation Program Database – The database identifies the status of all voluntary remediation projects administered through the pre-notice site cleanup program and the site remediation program.	½ mile	No	2
IL Brownfields	Municipal Brownfields Redevelopment Grant Program (MBRGP) – Offers grants to municipalities to assist in site investigation activities, development of cleanup objectives, and performance of cleanup activities.	½ mile	No	0
ADDITIONAL ENVIRONMENTAL RECORDS				
US Brownfields	A listing of Brownfields Sites – Included in the listing are brownfields properties addressed by Cooperative Agreement Recipients and Targeted Brownfields Assessments.	½ mile	No	0
Indian ODI	A listing of ODI sites on Indian Land.	½ mile	No	0
ODI	Open Dump Inventory – An open dump is defined as a disposal facility that does not comply with one or more of the Part 257 or Part 258 Subtitle D Criteria.	½ mile	No	0
Debris Region 9	A listing of illegal dump sites located on the Torres Martinez Indian Reservation located in California.	½ mile	No	0
IHS Open Dumps	A listing of all open dumps located on Indian Land in the United States.	½ mile	No	0
US Hist CDL	Meth Drug Lab Site Listing – A listing of clandestine/meth drug lab locations.	Target Property	No	0
IL CDL	Meth Drug Lab Site Listing – A listing of clandestine/meth drug lab locations.	Target Property	No	0
US CDL	Meth Drug Lab Site Listing – A listing of clandestine/meth drug lab locations.	Target Property	No	0
TANKS	CDPH Storage Tank Listings	¼ mile	No	0
Liens 2	CERCLA Lien Information – A Federal CERCLA lien can exist by operation of law at any site or property at which EPA has spent Superfund monies.	Target Property	No	0
HMIRS	Hazardous Materials Information Reporting System – HMRIS contains hazardous material spill incidents reported to DOT.	Target Property	No	1
IL Spills	State Spills – A listing of incidents reported to the Office of Emergency Response.	Target Property	No	2
IL Spills 90	Spills 90 includes those spill and release records that may include chemical, oil, and/or hazardous substance spills recorded after 1990.	Target Property	No	0
RCRA-NonGen / NLR	RCRA Non Generators – Facilities which do not presently generate waste.	¼ mile	No	1

Database	Definition	ASTM Search Distance	Subject Property Identified	Sites Identified Within Search Radius
FUDS	Formerly Used Defense Sites – The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.	1 mile	No	3
DOD	Department of Defense Sites – This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the US, Puerto Rico and the US Virgin Islands.	1 mile	No	0
SCRD Drycleaners	State Coalition for Remediation of Drycleaners Listing.	½ mile	No	0
US Fin Assur	Financial Assurance Information – All owners and operators of facilities that treat, store, or dispose of hazardous waste are required to provide proof that they will have sufficient funds to pay for the clean-up, closure, and post-closure care of their facilities.	Target Property	No	0
EPA Watch List	EPA maintains a watch list to facilitate dialogue between EPA, state, and local environmental agencies on enforcement matters with facilities having alleged violations.	Target Property	No	0
2020 Cor Action	2020 Corrective Action Program List – Some properties are heavily contaminated while others have been cleaned up.	¼ mile	No	0
TSCA	Toxic Substances Control Act – TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.	Target Property	No	0
TRIS	Toxic Chemical Release Inventory System – TRIS identifies facilities which release toxic chemicals into the air, water and land in reportable quantities under SARA Title III Section 313.	Target Property	No	0
SSTS	Section 7 Tracking Systems – Section 7 requires all registered pesticide-producing establishments to submit a report to the EPA each year.	Target Property	No	0
ROD	Records of Decision – ROD documents mandate a permanent remedy at an NPL site containing technical and health information to aid in the cleanup.	1 mile	No	0
RMP	Risk Management Plans.	Target Property	No	0
RAATS	RCRA Administrative Action Tracking System – RAATS contains records based on enforcement actions issued under RCRA pertaining to major violations and includes administrative and civil actions brought by the EPA.	Target Property	No	0
PRP	Potentially Responsible Parties – a listing of verified PRPs.	Target Property	No	0
PADS	PCB Activity Database System – PADS identifies generators, transporters, commercial stores and/or brokers and disposers of PCBs who are required to notify the EPA of such activities.	Target Property	No	0

Database	Definition	ASTM Search Distance	Subject Property Identified	Sites Identified Within Search Radius
ICIS	Integrated Compliance Information System – ICIS supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System.	Target Property	No	0
FTTS	Federal Insecticide, Fungicide and Rodenticide Act (FIFRA)/TSCA tracking system – FTTS tracks administrative cases and pesticide enforcement actions and compliance activities.	Target Property	No	0
MLTS	Material Licensing Tracking System – MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements.	Target Property	No	0
Coal Ash DOE	A listing of power plants that store ash in surface ponds.	Target Property	No	0
Coal Ash EPA	A listing of coal combustion surface impoundments with high hazard potential ratings.	½ mile	No	0
PCB Transformer	PCB Transformer Registration Database.	Target Property	No	0
RADINFO	Radon Information Database.	Target Property	No	0
Historical FTTS	A complete administrative case listing of all FTTS sites.	Target Property	No	0
DOT OPS	Incident and Accident Data.	Target Property	No	0
Consent	Superfund (CERCLA) Consent Decrees – Major legal settlements that establish responsibility and standards for cleanup at NPL sites. Released periodically by the US District Courts after settlement by parties to litigation matters.	1 mile	No	0
Indian Reserv	Indian Reservations – This map layer portrays Indian administered lands of the US that have any area equal to or greater than 640 acres.	Target Property	No	0
FUSRAP	Formerly Utilized Sites Remedial Action Program.	1 mile	No	0
UMTRA	Uranium Mill Tailings Sites - Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the mill tailings remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials for the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.	½ mile	No	0
Lead Smelters	A listing of former lead smelter site locations. These sites may pose a threat to public health through ingestion or inhalation of contaminated soil or dust.	Target Property	No	0
US Airs	A listings of air permits and emissions information.	Target Property	No	0

Database	Definition	ASTM Search Distance	Subject Property Identified	Sites Identified Within Search Radius
US Mines	Mines Master Index File – Contains all mine information numbers issued for mines active or opened since 1971. The data also includes volatile information.	¼ mile	No	0
Abandoned Mines	An inventory of land and water impacted by past mining (primarily coal mining).	Target Property	No	0
FINDS	Facility Index System – FINDS contains both facility information and pointers to other sources that contain more detail.	Target Property	No	0
Docket HWC	A complete list of the Federal Agency Hazardous Waste Compliance Docket Facilities.	Target Property	No	0
ECHO	Enforcement and Compliance History Information.	Target Property	No	0
UXO	A listing of unexploded ordnance site locations.	1 mile	No	0
FUELS Program	EPA Fuels Program Registered Listing.	¼ mile	No	0
PFAS NPL	Superfund sites with PFAS detections information.	¼ mile	No	0
PFAS FEDERAL SITES	Federal sites PFAS information.	¼ mile	No	0
PFAS TSCA	PFAS manufacture and imports information.	¼ mile	No	0
PFAS RCRA MANIFEST	PFAS transfers identified in the RCRA database listing.	¼ mile	No	0
PFAS ATSDR	PFAS contamination site location listing.	¼ mile	No	0
PFAS WQP	Ambient environmental sampling for PFAS.	¼ mile	No	0
PFAS NPDES	Clean water act discharge monitoring information.	¼ mile	No	0
PFAS ECHO	Facilities in industries that may be handling PFAS listing.	¼ mile	No	1
PFAS ECHO FIRE TRAINING	Facilities in industries that may be handling PFAS at fire training sites.	¼ mile	No	0
PFAS PART 139 AIRPORT	All certified Part 129 airports PFAS information listing.	¼ mile	No	0
AQUEOUS FOAM NRC	Aqueous foam related incidents listing.	¼ mile	No	0
PFAS	The IEPA has conducted PFAS sampling.	¼ mile	No	0
IL AIRS	A listing of Illinois air permits and emissions information.	Target Property	No	0
ASBESTOS	A listing of asbestos abatement and demolition project site locations in the state.	Target Property	No	0
IL BOL	Illinois Bureau of Land Inventory Database.	Target Property	No	0
IL Coal Ash	Coal Ash Site Listing – A listing of coal ash site locations.	½ mile	No	0
IL Drycleaners	Illinois Licensed Drycleaners – Any retail dry cleaning facility in Illinois must apply for a license through the Illinois Drycleaner Environmental Response Trust Fund.	¼ mile	No	0
IL Financial Assurance	Financial Assurance Information Listing – Information for hazardous waste facilities.	Target Property	No	0
IL HWAR	Hazardous waste manifests information.	Target Property	No	0

Database	Definition	ASTM Search Distance	Subject Property Identified	Sites Identified Within Search Radius
IL Impediment	Surface Impoundment Inventory - Statewide inventory of industrial, municipal, mining, oil & gas, and large agricultural impoundment. This study was conducted by the IEPA to assess potential for contamination in shallow aquifers.	½ mile	No	1
IL NPDES	A listing of active permits – a listing of facilities currently active in the state.	Target Property	No	0
IL PIMW	Potentially Infection Medical Waste.	¼ mile	No	0
IL Tier 2	A listing of facilities which store or manufacture hazardous materials and submit a chemical inventory report.	Target Property	No	0
IL UIC	Underground Injection Wells.	Target Property	No	0
PFAS TRIS	List of PFAS added to the TRI.	¼ mile	No	0
MINES MRDS	Mineral resources data system.	Target Property	No	0
Chicago Environmental	Property has been flagged on a Chicago Environmental database such as inspections, enforcement, permits, tanks, complaints, and asbestos.	Target Property	No	0
EDR HIGH RISK HISTORICAL RECORDS				
Manufactured Gas Plants	Database includes records of coal gas plants, compiled by EDR researchers.	1 mile	No	0
Historical Auto Stations	Compiled information from selected national collections of business directories and collected listings of potential gas station/filling station/service station sites that were available to EDR researchers.	¼ mile	No	0
Historical Drycleaners	Compiled information from selected national collections of business directories and collected listings of potential drycleaner sites that were available to EDR researchers.	¼ mile	No	0
EDR RECOVERED GOVERNMENT ARCHIVES				
IL RGA HWS	Recovered Government Archive Solid Waste Facilities List.	Target Property	No	0
IL RGA LF	Recovered Government Archive State and Hazardous Waste Facilities List.	Target Property	No	0
IL RGA LUST	Recovered Government Archive Leaking Underground Storage Tank.	Target Property	No	0

5.1 Subject Property

The Subject Property was not identified on any of the EDR Radius Map databases.

5.2 Surrounding Properties

Multiple surrounding properties were identified within the ASTM search distances for several databases; however, based on their current status, visual observations, groundwater flow direction, presence of building foundations, and/or distances from the Subject Property, these sites do not appear to present a significant environmental liability.

6. CONCLUSIONS AND RECOMMENDATIONS

EGSL has prepared a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-21 of the property located at 8100 Willow Springs Road, Willow Springs, Illinois. Any exceptions to, or deletions from, this practice are described in Section 2.7 of this report.

EGSL did not identify any recognized environmental conditions, historical recognized environmental conditions, and/or controlled recognized environmental conditions in connection with the Subject Property, as defined by the American Society of Testing and Materials Standard E1527-21, “Standard Practice for Environmental Site Assessments”.

7. LIMITATIONS

Environmental Group Services, Limited (EGSL) has prepared this report for the exclusive use of *Lyons Township High School District 204* as it pertains to the property located at 8100 Willow Springs Road, Willow Springs, Illinois. Our professional services have been performed using the degree of care and skill ordinarily exercised under similar circumstances by other geologists and engineers practicing in this field. No other warranty, express or implied, is made as to the professional advice in this report. *Any use of or reliance on this report by a third party shall be at such a party's sole risk.*

EGSL can offer no assurance and assumes no responsibility for site conditions or activities outside the scope of the inquiry requested by *Lyons Township High School District 204* as outlined in this document and set forth in the terms and conditions of the Phase I site assessment proposal and agreement between the parties. The scope of the inquiry is limited to a Phase I environmental site assessment as defined and limited by the ASTM standards. The findings, conclusions and recommendations made by EGSL represent its professional opinion and judgment and are not to be construed as a guarantee that hazardous conditions do not exist on the site.

It should be understood by *Lyons Township High School District 204* that EGSL has relied on the accuracy of documents, oral information, and other materials and information provided by *Lyons Township High School District 204* and other associated parties. It is recognized that regulatory requirements may change including the revision of accepted action levels which could necessitate a review of the discussion, findings, recommendations or conclusions of this report. Any subsequent modification, revision, or verification of this report must be provided in writing by EGSL.

EGSL does not provide any guarantees, certifications, or warranties that a property is free from environmental contamination.

If the owner of the Subject Property wishes to obtain a No Further Remediation letter from the IEPA, it may do so through the IEPA Site Remediation Program.

8. Signatures of Environmental Professionals

Environmental Group Services, Limited (EGSL) conducted the activities requested by *Lyons Township High School District 204* in reference to the American Society for Testing and Materials Standard Practice for Environmental Site Assessments (ASTM E1527-21). EGSL declares that this report was developed and performed by an Environmental Professional in accordance with 40 CFR 312 (All Appropriate Inquiries Rule) in order to search for areas of environmental concern associated with the Subject Property, and is intended to satisfy the requirements as set forth in the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability. EGSL declares that to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 40 CFR Part 312.10. EGSL has the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. EGSL has developed and performed the All Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

This report pertains to the property located at 8100 Willow Springs Road, Willow Springs, Illinois. Our professional services have been performed using the degree of care and skill ordinarily exercised under similar circumstances by environmental professionals practicing in this field. The representations made in this report are accurate and true to the best knowledge of the undersigned.

Sincerely,

ENVIRONMENTAL GROUP SERVICES, LIMITED

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Environmental Group Services were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Environmental Group Services were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

EXECUTIVE SUMMARY

DESCRIPTION

The LightBox City Directory Report is designed to assist environmental professionals in evaluating potential liabilities on select properties resulting from past activities. The report includes a search of available business directory data at approximately five-year intervals.

SOURCES

Through agreements with major city directory publishers, including Cole Information, InfoUSA, and Bresser, as well as our own collections (Haines & Stewart), the LightBox City Directory Report offers comprehensive national coverage.

LightBox is authorized to reproduce and redistribute all works featured in this report. The purchaser of this LightBox City Directory Report may include it in their final report(s).

Freedom of Information Act (FOIA) Request

Village of Willow Springs
One Village Circle, Willow Springs, Illinois
Phone: (708) 467-3700
Fax: (708) 467-3710

Requestor Information		
Name: Mary Cappellini		
Street Address: 557 W. Polk Street, Suite 201		
City: Chicago	State: IL	ZIP Code: 60607
Phone Number #1: 312-447-1200 ex 316	Phone Number #2: 312-388-3205	
Email Address: mary@EGSL.com		
Are you the subject of the records or information requested? Yes (No)		

Description of Records or Information Requested

In order to best respond to your request, please be as specific as possible when describing the records or information you are requesting.

We are requesting any records of potential environmental matters or concerns such as historical UST permits, AST permits, soil contamination, spills, etc. for the vegetated parcel of land located on the southwest corner of 79th and Willow Springs Road.

Attached is a survey of the property for reference, which has the associated PINs.

Thanks, Mary

Date of Request: 5/1/2026 Time: 12:30 pm

Signature of Requestor: Mary Cappellini

Preferred Delivery Method

Email to: Mary@EGSL.com
Fax to: _____
Mail to: _____
Will Pick-Up. Call: _____

Note: There is a fee of .15 cents per page for all hard copies in excess of the first 50 pages.

For Office Use Only

Date Received: _____ Initials: _____

Copies of this FOIA request have been forwarded to:

May 5 ,2026

Mary Cappellini
557 W Polk St Ste. 201
Chicago, IL 60607

Dear Mary Cappellini:

Thank you for writing to the Village of Willow Springs with your request for information pursuant to the Illinois Freedom of Information Act, 5 ILCS 140/1 et seq.

On May 1, 2026, you requested the following documents: Environmental matters or concerns such as historical UST permits, AST Permits, soil contamination, spills, etc. for the vegetated parcel of land located on the southwest corner of 79th and Willow Springs Rd.

Your request is granted in part and denied in part.

We have enclosed copies of the following documents that you requested: Environmental Assessment

In keeping with the copying fees allowed by the Illinois Freedom of Information Act, 5 ILCS 140/6(b), the cost of your copies is $___ .

The Village of Willow Springs is denying your request for the remaining documents for the following reasons: The Village has no such records.

You have a right to have the denial of your request reviewed by the Public Access Counselor (PAC) at the Office of the Illinois Attorney General. 5 ILCS 140/9.5(a). You can file your Request for Review with the PAC by writing to:

Public Access Counselor
Office of the Attorney General
500 South 2nd Street
Springfield, Illinois 62706
Fax: 217-782-1396
E-mail: publicaccess@atg.state.il.us

Melissa Neddermeyer
Village President

Lori Charles
Village Clerk

Ryan Grace
Village Administrator

VILLAGE OF
Willow Springs

Trustees:
Tom Arra
Terrance M. Carr
Michael C. Kennedy, Jr.
Rick Mika
Bob Sprinkle

You also have the right to seek judicial review of your denial by filing a lawsuit in the State circuit court. 5 ILCS 140/11.

If you choose to file a Request for Review with the PAC, you must do so within 60 calendar days of the date of this denial letter. 5 ILCS 140/9.5(a). Please note that you must include a copy of your original FOIA request and this denial letter when filing a Request for Review with the PAC.

Sincerely,

Lori Charles, FOIA Officer

Attn: Mr. Eric Anderson

Subject: Phase I Environmental Site Assessment conducted at 8100 Willow Springs Road, Willow Springs, Illinois 60525

Dear Mr. Anderson:

In response to your request of September 19, 2006, Gabriel Environmental Services (Gabriel) performed this assessment at the property and improvements consisting of 8100 Willow Springs Road, Willow Springs, Illinois 60525. Gabriel rendered this investigation during the period of September 19 through October 6, 2006. The on site visual portion of our inspection took place Thursday, September 28, 2006.

The investigative research in this Phase I Environmental Site Assessment (ESA) consists of reasonably obtainable information from federal, state and local agencies, historical documentation, geographical and geological maps and records, personal inquiry with property owners, neighbors, and/or public officials, and any other information that is practically reviewable, coupled with a visual inspection of the property. This report is designed to identify recognized environmental conditions in connection with the subject property and meets or exceeds the guidelines presented in the American Society of Testing and Materials (ASTM) Standard Practice of Environmental Site Assessments: Phase I Environmental Site Assessment Process (E1527), and the environmental audit requirements of the Illinois Environmental Protection Act with the exception of the fifty year historical chain-of-title search.

Gabriel appreciates the opportunity to be of service to you and Stahl, Cowen, Crowley, LLC, and the Pleasant Dale Park District. If you have any questions regarding this report or its findings, please feel free to contact me at (773) 486-2123.

Sincerely,

Steven C. Sawyer, C.H.M.M.
Senior Vice President

1.0 Introduction

Gabriel Environmental Services was retained by Mr. Eric Anderson of Stahl, Cowen, Crowley, LLC to conduct a Phase I Environmental Site Assessment (ESA) of the property at 8100 Willow Springs Road, in Willow Springs, Illinois 60525. Gabriel personnel conducted the site inspection on Thursday, September 28, 2006, escorted by Ms. Ruth Hess the current owner.

This survey is being performed as part of the environmental due diligence requirements for the acquisition of this property by Pleasant Dale Park District, and should satisfy the requirements presented by Stahl, Cowen, Crowley, LLC and the lender chosen for this transaction. This report meets or exceeds the guidelines presented in the American Society of Testing and Materials (ASTM) Standard Practice of Environmental Site Assessments: Phase I Environmental Site Assessment Process (E1527), and the environmental audit requirements of the Illinois Environmental Protection Act, with the exception of the fifty year historical chain-of-title search.

During the course of our survey, performed under Gabriel Project #09-06-26, we have attempted to determine if any potential chemical and physical hazards are present on the site. We have also generally addressed the following issues:

- Site Information
- Surrounding Site Usage
- Regulatory Status and Environmental Conditions
- Air Emissions
- Asbestos
- Hazardous Wastes and Materials
- PCBs
- Soil Conditions
- Underground Storage Tanks
- Water Sources and Discharges
- Surrounding Regulatory Sites

Gabriel personnel conducted a visual examination of the site and surrounding structures, along with interviews with Mr. Eric Anderson of Stahl, Cowen, Crowley, LLC, Ms. Ruth Hess the current owner, Ms. Rosalyn Wendt the Director of Pleasant Dale Park District, officials of Willow Springs, Cook County and the State of Illinois, as needed. The collection of samples is beyond the scope of this Phase I ESA.

2.0 Site Information

2.1 Site Description

The subject property consists of an approximately 7 acre, generally rectangular shaped parcel of land, located on the west side of Willow Springs Road, two blocks south of 79th Street, on the north side of the Village of Willow Springs, Illinois (see Site Location Map in Appendix A). Willow Springs is a suburb of the City of Chicago, and is located approximately 30 miles southwest of the City.

A Plat of Survey, including a Legal Description, was not provided to us for use in this report, although it was requested.

The subject property is developed with two single family homes (each approximately 1,000-1,250 square feet) and two out buildings, as well as remnants of a barn. The east portion of the property is undeveloped. The subject site is accessed via a gravel driveway, located along the southeast corner of the property that leads to the two homes.

The homes are located at the top of a hill, towards the west end of the property. These are currently unoccupied. They are each identified as 8100 Willow Springs Road.

The north home is a one story, tan brick faced building with a full basement. This is a three bedroom, two bathroom ranch style home. It is situated in an east-west orientation, with the main entry along the east side. A living room and two bedrooms are located in the northeast portion of the home, and are finished with tan carpeted floors or hardwood floors, and painted plaster walls and ceilings. A third bedroom is located in the northwest corner of the home, and has hardwood floors, and painted plaster walls and ceilings.

Two restrooms are located along the west wall, and are finished with older green vinyl asbestos tile (VAT) floors and plaster walls and ceilings. The kitchen is located along the west wall as well, and is finished in the same manner.

Access to the full basement is via a west interior stairway. The basement has concrete floors, concrete walls and a wood ceiling. A washer and dryer, water heater and oil burning furnace are located here, as well as boxed stored items. In the northwest corner of the basement is a 275-gallon above ground fuel oil tank, for the furnace. No staining was note din the area of this aboveground tank. A fill port and vent stack exit the wall along the north end of the basement, for fueling the tank from the outside.

A one story, residential garage is located immediately west of the home on the north side of the property. The garage has concrete floors, and wood walls and ceilings. It is used solely for storage now, as no one occupies the site. A lawnmower, tools, and boxes are

stored in this area.

The farm house located south of the ranch style home, is a much older structure. It is a one and two story, original farmhouse type building. It is covered with gray asphalt shingles. The home is accessed via doors along the west and south sides of the building.

This house has a partial basement accessed through a door in the floor, on the west interior of the building. A worn stone stairway provides access through this area. The partial basement has dirt floors, stone walls and a wood ceiling. The ceilings are supported with hewn tree trunks. A crawl space is located along the north end of the basement. A furnace (not operable) is located in the basement, as well as a well water treatment system.

The main floor of the home has a sunroom, kitchen, pantry, living room and bedroom. The sunroom is on the north end of the building, and has wood floors, and plaster walls and ceilings. A 275-gallon above ground heating oil tank is located in this area, but was reportedly empty. No staining was noted in the area of this tank. A fill port and vent stack exit along the west exterior wall of this area.

The kitchen is located along the southeast wall, and is finished with older green VAT floor tiles, and painted plaster walls and ceilings. An adjacent pantry is finished in the same manner. Along the west wall is a living room and bedroom. These are finished with wood floors, and painted plaster walls and ceilings. A former propane fueled Warm Morning space heater is located in this area.

A narrow wooden stairway on the north side of the living room provides access to a limited second floor. A restroom is located on the second floor, and is finished with wood floors and painted plaster walls and ceilings. A bedroom is also located on the second floor, and is finished in the same manner. A formerly propane fueled, Coleman space heater is located in this area.

On the south exterior of this building is a wooden door in the ground, that provides access to the private well serving the two homes.

South of the old farmhouse are remnants of a barn that had reportedly burned down years ago. Remnants of masonry block walls outline the former structure. The interior consists of an overgrown dirt floor. Due to weed, shrub and tree growth, we did not access the interior. Adjacent along the south end of this structure is a circular area that had been a silo in the past. No structural parts of the silo survived the fire.

West of the old farmhouse is a dirt trail that leads to a tin shed. This had been used in the past for tractor storage. A rusted, overgrown and abandoned pick up truck is located

near this area. No staining or distressed vegetation was noted in the area of this tin shed. It is a wood framed building with dirt floors, some remaining tin walls and a tin ceiling.

North of the tin shed is a building that had been a chicken house in the past. This run-down structure was significantly damaged, and filled with weedy vegetative growth. The portions of the building remaining had dirt floors, and wood walls and ceilings.

The remainder of the property is undeveloped. The east portion is a steep hill leading down gradient to Willow Springs Road. This area is covered with native grasses. Along the southeast portion of the property is a wooded and marshy area (natural drainage). Woodland and meadowland is located along the west portion of the property. On the north border, the property line is identified by tree growth north of the ranch style house. No signs of past development, or distressed vegetation was noted on these undeveloped portions of the site that were viewable through the dense foliage.

One pole-mounted transformer is located on the property, immediately east of the old farmhouse. One pole mounted transformer is located on the northeast corner of the property, along Willow Springs Road.

The two homes, and remnants of farm buildings are located at the top of a hill, which slopes approximately 30 feet down grade to Willow Springs Road. The topography ranges from approximately 575-605 feet above mean sea level, according to USGS Topographic maps drawn for the area. Photographs of the property taken at the time of our inspection are included in Appendix D of this report.

2.2 Site History

The history of the site was investigated in order to determine whether previous usage of the property might affect current environmental conditions on the site. Gabriel contacted various sources, including Mr. Eric Anderson of Stahl, Cowen, Crowley, LLC the representative for the Pleasant Dale Park District, Ms. Rosalyn Wendt of Pleasant Dale Park District, Ms. Ruth Hess the current owner, the Willow Springs Building Department, Cook County, the Northeastern Illinois Planning Commission (NIPC), and the library at the University of Illinois Chicago. Historical documents, such as building permit and fire inspection files, Sanborn Fire Insurance Maps, historical United States Geological Survey (USGS) topographic maps, and aerial photographs, were also reviewed by Gabriel personnel.

Mr. Eric Anderson indicated that there are several options for the future usage of the land. He did state that the buildings on site would be demolished. He stated that the property may be "developed". He did not clarify if this would be residential, commercial or otherwise developed.

Ms. Rosalyn Wendt of the Pleasant Dale Park District indicated that she believed plans were to demolish the buildings on site, and to utilize the property as soccer fields for the park district. She did not have any additional information about the site.

Ms. Ruth Hess, the current owner, indicated that the property has been owned by her family since at least the 1940's. She indicated that she had lived at the site since 1954. Ms. Hess stated that there had been a barn and silo on the south portion of the site that had burned down several years ago. She further stated that other shed buildings had been located along the west side of the property, including a granary, a small shop, storage sheds, a chicken coop and sheds for the tractors. She indicated that the property had been used as a farm in the past, and that they had cows and chickens, and grew corn, soybeans and oats.

Ms. Hess indicated that the farm house to the south was over 130 years old. She further stated that the ranch style home on the north end was constructed in 1953. She indicated that the buildings were heated using oil burning furnaces, and propane fueled unit heaters. She stated that she did not believe that there had been any underground tanks at the site, and indicated that they had always used aboveground tanks for holding fuel for the homes.

Ms. Hess indicated that the Village of Willow Springs had condemned her property for their use, and that was why she must move.

We contacted the Willow Springs Building Department for any records they have on file for the property. Willow Springs responded on September 29, 2006, that they had no file and no records for the subject site. A copy of that reply is included in Appendix B of this report.

Sanborn Fire Insurance Maps are a useful tool in identifying past development and usage of a property in a historically developed area. Sanborn Fire Insurance Maps were available for parts of Willow Springs south of the Des Plaines River, but were not available for the subject site, because the area had not been industrially developed prior to the 1960's.

Historical aerial photographs for the years 1980, 1990 and 2001 were reviewed at the University of Illinois at Chicago Main Library and NIPC. Copies of these photographs are included in Appendix B of this report.

The 1980 photograph shows the subject site as developed with the two residential homes, a barn and several out buildings. The site is bordered to the north by undeveloped farmland. East of the site is Willow Springs Road, and further east is a large industrial property, numerous above ground tanks, and a parking lot. The property

is bordered to the south by woodland and farm land. West of the site is farmland.

The 1990 photograph continues to show the subject site as developed with the two homes and a barn. The shed structures noted on the 1980 photograph are no longer present, or at least not visible on this aerial photo. Surrounding properties appear as on the 1980 photograph.

The 2001 photograph continues to show the two homes on the subject site. North of the property is wooded land. The site is bordered to the east by Willow Springs Road and further east by a large industrial property. South of the site is woodland. The property is bordered to the west by undeveloped land. Copies of these photographs are included in Appendix B of this report.

Historical topographic maps prepared by the United States Geological Survey (USGS) were also obtained at the University of Illinois at Chicago Main Library. The subject site is located on the Sag Bridge Illinois 7.5-minute quadrangles. The years available for review were 1928, 1953, 1963, 1963 (revised 1973), 1993 and 1997. Copies of these maps are included in Appendix B of this report.

The 1928 map shows the subject site with a driveway and a small building, typically representative of residential structures. We believe this is the farmhouse currently present at the site. North of the property is undeveloped land. The site is bordered to the east by State Highway 46 and further east by undeveloped land. South and west of the site is undeveloped land.

The 1953 map now shows the subject site as developed with two structures. We believe this is the farmhouse and a barn because of their locations on the property. The remainder of the site is undeveloped. North of the property is undeveloped land. The site is bordered to the east by Willow Springs Road and further east by a drive, and a large industrial property. South of the site is undeveloped land. The property is bordered to the west by undeveloped land.

The 1963 map now shows the subject site as developed with the two subject buildings in what appears to be their present day configuration. Northwest of the site, we now see subdivision development on what had previously been undeveloped land. North of the site is undeveloped land. East is Willow Springs Road and further east are driveways, and a large industrial building. Further east are large aboveground tanks. The site is bordered to the south by undeveloped land. West of the site is undeveloped land and further west is a residential sub-division.

The remaining maps all depict the subject site as developed with the two residential homes in their present day configuration. These maps also show continued development

to the west and northwest of the property. Copies of these maps are included in Appendix B of this report.

A fifty-year historical chain-of-title search was not requested by our client for the subject property.

2.3 Site Surroundings

Depending on usage, neighboring facilities can have a potential impact on the environmental conditions of the subject site. Because of this, a brief description of the surroundings and comment on any observations made of the surrounding activity during Gabriel's investigation is included with this report.

The surveyed site is located in an agricultural and residential unincorporated area on the northwest side of Willow Springs. The subject site is in an area Zoned R-1 – Single Family Residence according the Village of Willow Springs Zoning Map. It is currently surrounded by the following:

North: The subject parcel is bordered to the north by undeveloped woodland.

East: The property is bordered to the east by Willow Springs Road and further east by a large industrial warehouse & distribution property occupied by UPS.

South: The subject site is bordered to the south by undeveloped wood and meadow land.

West: The subject site is bordered to the west by undeveloped meadow land.

During this inspection, Gabriel personnel noted the surrounding site usage, and whether such would affect the environmental integrity of the property surveyed. At the time of this inspection, there were no visual indications that the operations on the neighboring sites were negatively impacting the subsurface conditions of the subject property.

We did note a number of large, aboveground storage tanks (at least 50,000-gallon capacity) nearly one block east of the site, on the UPS property. That issue is further discussed in Section 3.5-Soil Conditions.

3.0 Regulatory Status and Environmental Conditions

Ms. Natalie Neuman of Gabriel Environmental Services Field Services Staff surveyed the site on Thursday, September 28, 2006 escorted by Ms. Ruth Hess the owner of the property. During the survey, we attempted to assess the regulatory and environmental aspects of the property and surrounding sites. Our study focused on the following areas: air emissions, asbestos, hazardous materials and wastes, PCBs, soil conditions, water sources and discharges, underground storage tanks, and a regulatory agency documentation review of the subject property and surrounding sites. Each of these issues will be discussed in this section.

3.1 Air Emissions

The Clean Air Act (CAA), enacted in 1970 and most recently amended in 1990, seeks to protect the public's health and welfare by safeguarding and improving the quality of our air. Under the CAA, the EPA sets air quality standards and relies on the states to develop programs to attain those standards. While the CAA regulates both "stationary" and "mobile" sources of air pollution, the stationary source restrictions are of primary concern to business. All facilities must meet applicable permit requirements, even if that requires new control technologies in new or expanded facilities.

At the time of Gabriel's inspection, the two homes at the site are not occupied, and no air emissions are currently present. The north ranch style home had been heated with fuel oil. We viewed a DuKane furnace in the basement of that home, but were unable to determine a BTU rating. Based on the size of the unit and of the building, we estimate it to be approximately 125,000 BTU/hour.

The south home has two unit heaters (Warm Morning, and an unidentified heater) that had been fueled with propane gas. The propane tank has since been removed from the property. An oil fueled furnace is also located in the basement, but was only used a few times. The above ground tank fueling that furnace is located in the sun room on the main floor.

No heating equipment was noted in the residential garage, the burned down barn, the tin shed or the chicken coop.

Based on the sizes of the units and of the buildings inspected, the air emissions for the subject site (if the furnaces and unit heaters were functional) would be well below the established 50 million BTU/hour threshold capacity for reporting for structures classified as residential or commercial (Section 201.146 [b][c]).

3.2 Asbestos

The site was inspected for asbestos in accordance with the USEPA guidelines set forth in the "Guidance for Controlling Asbestos Containing Materials in Buildings" issued in 1985. The purpose of this segment of our inspection was to identify the extent to which asbestos containing materials (ACM) were used, or subsequently added in the construction of the facility surveyed. It was the intention of our survey to only assess materials that are friable (as being crumbled, pulverized, or reducible to a powder with hand pressure). As a result, we have made no mention of items such as plaster, cement, or roofing materials. This inspection only covers building materials readily visible and accessible to our accredited Asbestos Inspector.

At the time of this inspection, the following types of potential asbestos containing materials were noted:

Surfacing Materials

We viewed painted plaster walls and ceilings throughout the two residential buildings on site (see Site Photographs in Appendix D). No surfacing materials were noted in the shed or chicken coop on the property. Plaster materials are considered a trowelled on surfacing material, and can contain asbestos fibers, which were used as a binding agent and for fireproofing. The materials viewed were in good condition, with no significant damage noted.

Miscellaneous Materials

We viewed older green with gray streaks, nine inch square vinyl asbestos tiles (VAT) on the floors of the kitchen and bathrooms in the ranch style home. Green VATs were also noted in the kitchen and bathroom of the older farmhouse (see Site Photographs in Appendix D). These were

Since the 1920's, asbestos mixed with asphalt and vinyl-based products created numerous varieties of linoleum and tile flooring. The mastic used to apply the tiles is also likely to contain asbestos fibers. Although not in a friable state as is, asbestos flooring is likely to become friable when broken, scraped or sanded.

Because plans are to demolish the two homes, and other structures on site, a complete asbestos inspection by an IDPH licensed asbestos building inspector and analysis by an accredited laboratory should be performed to ascertain asbestos content prior to demolition activities, as required by the IDPH and Cook County. This should be completed prior to the application for the demolition permit.

Upon any future development of the site, the architect should specify that no asbestos containing materials be used, and a copy of this specification should be placed in the environmental file for the subject site.

3.3 Hazardous Materials and Wastes

Gabriel personnel inspected the property for evidence of potentially hazardous materials being generated, stored, or disposed of on site. Under the Occupational Health and Safety Administration (OSHA) Hazard Communication Standard Final Rule, employers must have a Material Safety Data Sheet (MSDS) for each hazardous chemical they use. Hazardous wastes are evaluated according to provisions set forth by the Resource Conservation and Recovery Act (RCRA; see Section 3.8).

Hazardous Materials

At the time of this inspection, the two homes, tin shed and chicken coop were essentially vacant, and no potentially hazardous materials were noted in those areas. No hazardous materials were viewed on the exterior portion of the site. Finally, no hazardous materials were viewed in the areas of the burned barn that were inspected.

We did view two aboveground fuel oil tanks: one in the basement of the ranch home, and one in the old farmhouse. The one in the farmhouse appeared to be empty. There may be some fuel oil remaining in the tank located in the basement of the north ranch home.

We recommend that these tanks be emptied of any remaining fuel oil, and then properly disposed of prior to the demolition of the site. Any hazardous materials found in the buildings (paint, cleaning supplies, gasoline, etc.) should be removed prior to demolition.

Lead Paint Hazards

Heavy metals have historically been added to paint to enhance their aesthetic appeal and longevity. Lead was historically used in paints to enhance hardness and high gloss. Painted surfaces containing lead which are flaking, peeling, and subject to wear, abrasion, and remodeling activities, including scraping, sanding, and burning, can result in lead dust release, leading to a potential health hazard by inhalation or ingestion.

At the time of inspection, no areas of significantly peeling or flaking paints were noted in the buildings on site. Based on the ages of the residences (one constructed in the late 1800's and the ranch home in the 1950's), it is possible that paints in those buildings contain lead based pigments.

Current plans are to demolish all of the remaining structures on site. We recommend that

the construction/demolition contractors be advised that paints in the two residences may contain lead based pigments, so that they can take the proper precautions to prevent significant exposure to lead paint dusts.

Upon the future development of the site, the architect should specify that no lead based paints be used, and a copy of this specification should be placed in the environmental file for the subject site.

Hazardous Wastes

Based upon the fact that the buildings are unoccupied, no wastes deemed hazardous or otherwise are generated at the site. No drums or hazardous wastes were viewed on the parcel at the site at the time of our inspection. No fly dumping or other signs of dumping were noted on the subject site.

We did view an old rusted tractor, and an old rusted pick up truck near the tin shed on the west border of the site. These had been abandoned for some time, and were overgrown with weeds. No staining or stressed vegetation was noted in the area of these vehicles. These should be removed from the site.

For surrounding facilities that may generate or store hazardous wastes, see Section 3.8, RCRA.

3.4 Polychlorinated biphenyls, PCBs

PCBs are specifically regulated by the Toxic Substance Control Act (TSCA) of 1980. TSCA is charged with regulating the manufacture of substances it considers toxic and harmful to health and the environment. For this reason, our survey examines properties for items that could contain, or may have been contaminated with, PCBs. Although PCBs had many uses, the most widespread use was in the manufacture of nonflammable dielectric fluids (askarels) for electrical transformers, capacitors, and other liquid-cooled electrical equipment.

We viewed one pole mounted transformer on the subject site, immediately east of the south farmhouse. One pole mounted transformer is also located on the northeast corner of the site, along Willow Springs Road. These units were intact, with no staining or leakage noted. The electrical supply in the area is provided by electrical equipment and distribution systems owned by Commonwealth Edison. They are responsible for the maintenance and upkeep of these units.

The main electrical supply enters the north home on the north end of the site, in the basement, along the north wall. Here we viewed a Cutler Hammer 200 amp electrical

circuit breaker.

In the farm house, we viewed an electrical circuit breaker along the living room wall. There was also a unit in the main floor bedroom, but it was no longer functional. This type of electrical equipment would not be expected to contain dielectric fluids or PCBs.

3.5 Soil Conditions

Soil Classification

A surficial geology map of the Illinois area, provided by the United States Department of Agriculture Soil Conservation Service (USDA), indicates that this property is generally underlain by the Tinley Moraine of the Wadsworth Member of Wedron Formation. The native soil types are characterized by the USDA as: "Mostly gray clayey and silty clayey till, relatively low in content of pebbles, cobbles, and boulders; contains local lenses of silt; commonly mantled with 1 to 2 feet of leached silt (loess) and soil."

No soil boring logs or analytical results were provided to us for use in this report.

Upon the future demolition of the structures on site, and any future development, if any underground tanks or soil contamination are uncovered, activity should stop, and Gabriel be contacted prior to further action.

Also, because the property had historically been used as a farm in the past, it is possible that fertilizers, pesticides and herbicides had been applied across the property. It may be prudent to analyze some of the soils for pesticide and herbicide content, especially if the property will be used as a public park or playground, or residential buildings, where children may come into contact with the hazardous chemicals. These could be completed in conjunction with structural or geotechnical soil studies for the site.

Visual Observations

The property was inspected for evidence of dumping or chemical or liquid spills. At the time of Gabriel's inspection, no staining was noted across the surface areas of the property that were viewed. There was no visual evidence of spills or monitoring wells at the site. No stressed vegetation was noted across the areas inspected on the site.

Available historical information indicates that the site has been developed with the two residential homes, out buildings, and used as a farm. Any soil information for the parcel, including pesticide, herbicide and fertilizer information, and any sampling completed for the site in regards to soil composition, should be kept in an environmental file for the subject site for future reference.

It should be noted that we did view several large (over 50,000-gallon) above ground storage tanks east of the property, on the UPS site across Willow Springs Road. Those tanks were located in excess of one block away from the subject site. We were unable to determine the contents of these tanks, but assume they contain petroleum products.

Based on the distance of these large tanks from the subject site, the fact that site is down-gradient from the subject property, and the assumption that groundwater in the area flows to the south towards the Des Plaines River and Canal, we would not expect the presence and usage of those tanks to have an environmental impact on the subject site.

Radon

Radon is a colorless, odorless gas produced by the decay of radium, a radioactive element produced from the natural decay of uranium, shale, granite, phosphate, or pitchblende. Radon is a cause of lung cancer in the United States, and is a concern when offices or apartments are below grade. The subject property is developed with two homes, that both have basement areas. These were used for storage and utilities only.

If radon levels were to be determined at the subject site, preliminary screening can be performed using the relatively inexpensive canister method. If unusual levels were detected, a firm specializing in radon abatement would be recommended. If basement areas are planned for occupancy in the future development of the site, radon should be analyzed so that the proper ventilation and remediation equipment could be installed during construction, if radon levels are excessive.

3.6 Underground Storage Tanks

Underground storage tanks (USTs) are an environmental concern if leakage or spillage has occurred. Leaking or overfilled USTs can contaminate the surrounding soil, as well as the groundwater. Our survey includes a search of the database provided by the Office of the State Fire Marshal (OSFM). We also visually inspect the site for obvious signs of tank placement, such as gas pumps, fill ports, and manways. Not so obvious tank related items such as vent stacks, petrometers, pipes, valves, raised concrete, etc., are also included in our inspection.

On-Site USTs

A search of the OSFM database updated on July 17, 2006 was conducted by Gabriel using an Environmental Data Resources Radius Map™ Report. The results of this search found **no** *registered* USTs at the subject site. This does not preclude the fact that USTs may have been emplaced in the past, and not registered.

At the time of our inspection, no visual indications of USTs were noted on the areas viewed at the site. If any tanks or stained soils are uncovered in the future usage or development of the site, activity should stop, and Gabriel contacted prior to further action.

As previously noted, there are two 275-gallon above ground fuel oil tanks, one in each of the homes. Both of these appeared to be in good condition, with no signs of leakage, staining, rusting, or other indications of current or past problems with the tanks (see Site Photographs in Appendix D). We recommend that these be emptied of any contents, and properly disposed of.

Adjacent Underground Storage Tank emplacement

A search of the OSFM database, updated on July 17, 2006, found **no** registered underground storage tank sites within one-quarter mile of the subject property.

No visual indications of USTs (vent stacks, fill ports, petrometers) were noted on the adjacent properties, when viewed from the public right-of-way.

As previously noted, large aboveground tanks are located east of the site, across Willow Springs Road, over one block away, on the UPS property. That issue is further discussed in Section 3.5-Soil Conditions.

LUST Sites

The Illinois Environmental Protection Agency (IEPA) provides a list of Leaking Underground Storage Tanks (LUST) Incident Reports. This list of reported LUST sites is a non-verified, unconfirmed list, and should not be used or considered as a final Agency determination regarding whether releases have occurred at sites on the list. The Agency is in the process of confirming the type and size of release, if any; the proper owner or operator, and the location of each site.

A search of the IEPA LUST Incident listing was conducted by Gabriel using an EDR Radius Map™ Report, updated on May 22, 2006. The results of this search found **three** LUST sites within a one-half mile radius of 8100 Willow Springs Road, Willow Springs, Illinois 60525. Each of these are located in excess of ¼ mile from the subject site.

The closest LUST site is listed in the database search as Brookind Corporation located at 79th and Willow Springs Road. That site is located northeast of the subject site, across 79th and Willow Springs Road. It is in the area of the UPS property. That site is listed as having a gasoline leak reported in November of 1987. That site remains "open" and has not been further addressed by the owner or the IEPA.

Based on the distance of that site, and the utility infrastructure between that site and the subject site, we would not expect that or the remaining LUST sites to have an environmental impact on the subject property.

3.7 Water Sources and Discharges

The primary purpose of the Clean Water Act (CWA) enacted in 1972 and most recently amended in 1987, is to "restore and maintain the chemical and biological integrity of the nation's waters." Any company that discharges wastewater into the nation's "navigable waters" or a public sewer system must comply with CWA requirements. The CWA contains extensive enforcement measures. In addition to the "self enforcement" of businesses and publicly owned treatment works (POTWs) imposed by the CWA's monitoring and reporting requirements, the Act includes broad inspection powers and many enforcement approaches, including administrative orders, civil suits, and criminal prosecution.

Water Sources

We noted a wooden door south of the old farmhouse, that reportedly contained the private well servicing the site. This well is no longer used, as the buildings are unoccupied. Ms. Ruth Hess the owner, stated that they never had the water analyzed.

We recommend that this private well found at the site be properly closed by a licensed well driller under the supervision of an IDPH licensed Sanitarian, as part of the demolition activities at the site.

Wastewater Discharges

Upon Gabriel's inspection of the property, no wastewater discharge is generated at the site as the buildings are unoccupied. Ms. Ruth Hess the owner, indicated that the north house is serviced by the Village of Willow Springs. The wastewater was discharged to the local water treatment authority. In the Willow Springs, this agency is the Metropolitan Water Reclamation District (MWRD). Based on the future usage of the site, the subject property may be required for special filing and pretreatment procedures.

Ms. Hess also stated that she believed that the south home had a septic tank and field. However, she did not know the location. Care should be taken during demolition activities, to identify and empty this septic tank, so that it does not rupture or become damaged during demolition.

Storm Water Discharges

On November 16, 1990, the USEPA published its final rule on National Pollutant Discharge Elimination System (NPDES) permitting of storm water discharges. All facilities included under the definition of "storm water discharge associated with industrial activity" must obtain an NPDES permit. Under this ruling, "storm water discharge associated with industrial activity" is defined as storm water directly related to manufacturing, processing or raw materials storage areas at an industrial plant. Regulated storm water includes discharges from industrial yards, immediate access roads, and rail lines used by carriers of raw materials, material-handling sites, refuse sites, etc., as described in the rule.

Under the current NPDES permitting program, the subject property is not required to obtain a storm water discharge permit because operations currently conducted on-site do not meet the definition of "industrial activity" as specified under 40 CFR 122.26(b)(14).

Wetlands

A general definition of wetlands has been developed and is based on the presence of certain hydrologic, soil, and vegetative conditions. Once determined to fall within this existing definition, wetlands are regulated under Section 404 of the Clean Water Act (CWA) of 1972, which requires a federal permit for discharges of dredged and fill material into all "waters of the United States". The Army Corps of Engineers is responsible for granting these discharge permits which govern wetland modification by regulating fill activities.

The Wetland Topographic indicates no wetlands are located on the subject property itself. We did note a marshy area to the southeast portion of the site which is a low point on the property. However, we did not view typical wetland vegetative growth in that area.

3.8 Surrounding Regulatory Sites

REGULATORY AGENCY RECORDS SEARCH SUMMARY CHART

Data Base	Search Radius	less than 1/8 mile	1/8-1/4 mile	1/4-1/2 mile	1/2-1 mile	Subject Site

Environmental Data Resources (EDR) Radius Map™ Report *conducted this search on behalf of Gabriel Environmental Services. Gabriel technical staff evaluated their report prior to inclusion in this report*

RCRA

The Resource Conservation and Recovery Act (RCRA) of 1976 implemented Federal and State programs for the regulation of land disposal of waste materials and the recovery of materials and energy resources from the waste stream. RCRA seeks to limit releases of hazardous waste into the environment by controlling the wastes from point of generation through to disposal ("cradle to grave"). RCRA permitted TSD facilities are sites, which treat, store, of dispose of RCRA wastes defined in 40 CFR 261.

RCRA generators are grouped into categories, depending on the amounts of hazardous

wastes that are generated and the length of time these wastes are stored at the facilities. Generators of hazardous waste must send their waste to a RCRA permitted TSD facility which either has interim authorization or has received its Part B permit.

A search of the IEPA RCRA Generator and TSD database was conducted by Gabriel using an Environmental Data Resources (EDR) Radius Map™ Report, updated on June 13, 2006. The results of this search found **one** RCRA Generator site within a one-eighth mile radius and **no** TSD sites within a one-half mile radius of the 8100 Willow Springs Road, Willow Springs, Illinois 60525.

The RCRA Generator is identified in the database search as Willow Springs Test Cells located at 8500 Willow Springs Road. That site is located over four blocks south of the subject site. That site is listed as being a large quantity generator (LQG) defined as one that generates in excess of 1,000 kg/month of non acutely hazardous waste, or 1 kg/month of acutely hazardous wastes. Two violations were reported in 1998, regarding paperwork errors. No violations were found for that property after 1998.

Based on the distance of that site, we would not expect that site to have an environmental impact on the subject property.

CERCLA

The main focus of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980 and its amendments (the Superfund Amendments and Reauthorization Act - SARA) is also on hazardous substances. CERCLA and SARA promulgated and enacted Federal and State programs to initiate the cleanup of uncontrolled hazardous waste sites. These measures were enacted to assure the protection of human health and the environment.

CERCLIS (CERCLA Information System) is a computer database of sites that have been proposed to be investigated by the Environmental Protection Agency IEPA). Sites can be placed on the CERCLIS list for a variety of reasons. It should be noted, however, that a site included on a CERCLIS list does not necessarily pose a threat to the environment. An inspection of the site by qualified personnel is required before any conclusions can be made.

Once a site is put on the CERCLIS list, the EPA performs a preliminary assessment of the site. The preliminary assessment determines whether the site requires additional investigation, or whether no further action is needed. The site will remain on the CERCLIS list regardless of the outcome of the preliminary assessment.

A search of the EPA CERCLIS database was conducted by Gabriel under EDR Radius

Map™ Report, updated on June 19, 2006. The results of this search found **no** sites within a one-half mile radius of the 8100 Willow Springs Road, Willow Springs, Illinois 60525.

NPL

The National Priorities List (NPL) identifies and ranks targets for long-term remedial action. It is updated by the Environmental Protection Agency once a year. The NPL identifies the worst uncontrolled or abandoned hazardous waste sites in the United States. Factors taken into consideration prior to national priority status include: the types and quantities of wastes involved, the number of people potentially exposed, the likely pathways of exposure, and the importance and vulnerability of the underlying supply of groundwater.

A search of the EPA NPL database was conducted by Gabriel using an EDR Radius Map™ Report, updated on April 19, 2006. The results of this search found **no** sites within a one-mile radius of the 8100 Willow Springs Road, Willow Springs, Illinois 60525.

CAT

The State of Illinois provides a Category List updated periodically, of sites designated by the state for clean up. These sites include voluntary clean-ups that have been started and/or completed, Federal Facilities, Pre-Notice, Completed Remedial Action, Proposed and Preproposed NPL and Notice Response Action sites.

A search of the IEPA CAT database updated on June 1, 1997 was conducted by Gabriel using an EDR Radius Map™ Report (see copy of report in Appendix C). The results of this search found **two** CAT sites within a one-mile radius of the 8100 Willow Springs Road, Willow Springs, Illinois 60525. Each of these are located in excess of ¼ mile from the subject site.

The closest CAT site is listed in the database search as Ashland Chemical Company located at 8500 Willow Springs Road. That site is located over four blocks southeast of the subject property, along the Des Plaines River and Canal. It is listed as having the cleanup process completed. No further information was provided regarding that site.

Based on the distance of that site, and the fact that the groundwater in the area likely flows south to the Des Plaines River and the Canal, we would not expect that site to have an environmental impact on the subject site.

SRP

The State of Illinois provides a Site Remediation Program Database updated periodically, of sites designated by the state for clean up. These sites include voluntary remediation projects administered through the pre-notice site cleanup program and the site remediation program.

A search of the IEPA SRP database updated on May 11, 2006 was conducted by Gabriel using an Environmental Data Resources Radius Map™ search (see copy of report in Appendix C). The results of this search found **one** SRP sites within a one-half mile radius of the 8100 Willow Springs Road, Willow Springs, Illinois 60525.

The SRP site is listed as Huntsman Chemical Company located at 8400 Willow Springs Road. That site is located three blocks southeast of the subject site. It is listed as being enrolled in the SRP program in December of 1999 under EPA #0313270004. It has not yet been "closed" by the IEPA, but actions are on-going to address problems at that site.

Based on the distance of that site, and the fact that the groundwater in the area likely flows south to the Des Plaines River and the Canal, we would not expect that site to have an environmental impact on the subject site.

ERNS

The ERNS List is the EPA's Emergency Response Notification System List of reported CERCLA hazardous substance releases or spills in quantities greater than the reportable quantity, as maintained at the National Response Center. Notification requirements for such releases or spills are codified in 40 CFR Parts 302 and 355.

A search of the ERNS and state spill listings was conducted by Gabriel using an EDR Radius Map™ search, updated on December 31, 2005. The results of this search found **no** recorded ERNS incident at the 8100 Willow Springs Road, Willow Springs, Illinois 60525.

SL/SHW

Gabriel reviewed the Solid Waste Disposal Facilities Accepting Municipal Waste map provided by the Northeastern Illinois Planning Commission, along with the "Available Disposal Capacity for Solid Waste in Illinois" report, compiled by the Solid Waste Management Section of the IEPA, and last published in March of 1994. "Solid wastes" refers to non-hazardous residential, commercial, institutional, and industrial solid waste that is commonly disposed of in general waste landfills. The map does not include wastes such as demolition materials or special industrial process wastes that are

disposed of in other than general waste landfills. Nor are issues related to private on-site disposal of waste by industrial or other establishments included.

A search of the IEPA listing of solid waste landfills, incinerators, and transfer stations was also conducted by Gabriel using an EDR Radius Map™ search, updated on November 1, 2006. The results of this search found **one** site within a one-half mile radius of the 8100 Willow Springs Road, Willow Springs, Illinois 60525.

That site is listed in the database search as being a State Hazardous Waste Site. It is listed as GM (Cook Brookind Corporation) located at 79th and Willow Springs Road. We believe that is the large property occupied by UPS. It is listed as being "Archived" and completed in 1993. No further information is provided.

However, based on the fact that site is down-gradient from the subject property, and that the area immediately east of the subject site is used for parking and not for any type of industrial activity, we do not believe that site would have negatively impacted the subject property.

4.0 Summary and Recommendations

This Phase I Environmental Site Assessment was requested by Mr. Eric Anderson of Stahl, Cowen, Crowley, LLC and initiated in order to determine the current environmental conditions and potential hazards at 8100 Willow Springs Road, Willow Springs, Illinois 60525. In doing so, Gabriel reviewed pertinent federal, state and local databases, coupled with an on-site inspection and interviews with various Village, County and State agencies.

The subject property consists of an approximately 7 acre, generally rectangular shaped parcel of land, located on the west side of Willow Springs Road. The property is developed with two single family homes, a residential garage and two out buildings, as well as remnants of a barn. The east portion of the property is undeveloped. The subject site is accessed via a gravel driveway, located along the southeast corner of the property that leads to the two homes. The buildings are located at the top of a hill, towards the west end of the property.

Mr. Eric Anderson indicated that there are several options for the future usage of the land. He did indicate that the buildings on site would be demolished. He stated that the property may be "developed". He did not clarify if this would be residential, commercial or otherwise developed. Ms. Rosalyn Wendt of the Pleasant Dale Park District indicated that she believed plans were to demolish the buildings on site, and to utilize the property as soccer fields for the park district. She did not have any additional information about the site.

Ms. Ruth Hess, the current owner, indicated that the property has been owned by her family since at least the 1940's. She indicated that she had lived at the site since 1954. She indicated that the property had been used as a farm in the past, and that they had cows and chickens, and grew corn, soybeans and oats. Ms. Hess stated that the farm house to the south was over 130 years old. She further stated that the ranch style home on the north end was constructed in 1953. Ms. Hess indicated that Willow Springs had condemned her property for their use.

Available historical information indicates that the property has been developed since at least 1928, likely with the old farmhouse which we believe was constructed in the late 1800's. It has been agricultural land since that time.

Following completion of this Phase I ESA, **two** recognized environmental conditions were noted, with respect to the topics discussed in Section 3.0 of this report, which would appear to require further investigation.

Asbestos

We viewed painted plaster walls and ceilings throughout the two residential buildings on site (see Site Photographs in Appendix D). The materials viewed were in good condition, with no significant damage noted.

We also noted green with gray streaks nine inch square vinyl asbestos tiles (VAT) on the floors of the kitchen and bathrooms in the ranch style home. Green VATs were also noted in the kitchen and bathroom of the older farmhouse (see Site Photographs in Appendix D).

Because plans are to demolish the two homes, and other structures on site, a complete asbestos inspection by an IDPH licensed asbestos building inspector and analysis by an accredited laboratory should be performed to ascertain asbestos content prior to demolition activities, as required by the IDPH and Cook County. This should be completed prior to the application for the demolition permit.

Upon any future development of the site, the architect should specify that no asbestos containing materials be used, and a copy of this specification should be placed in the environmental file for the subject site.

Water supply/Wastewater Discharge

We noted a wooden hatch south of the old farmhouse, that reportedly contained the private well servicing the site. This well is no longer used, as the buildings are unoccupied. Ms. Ruth Hess the owner, stated that they never had the water analyzed.

We recommend that this private well found at the site be properly closed by a licensed well driller under the supervision of an IDPH licensed Sanitarian, as part of the demolition activities at the site.

Ms. Hess stated that she believed that the south home had a septic tank and field. However, she did not know the location. Care should be taken during demolition activities, to identify and empty this septic tank, so that it does not rupture or become damaged during demolition.

5.0 Statement of Limitations

The environmental assessment detailed in this report has been performed in accordance with generally accepted methods and practices of the environmental laboratory engineering profession. The scope and depth of this study were as directed, and as agreed to, by the client.

Gabriel uses experienced and trained professionals in attempting to locate and identify hazardous materials or conditions. We do not warrant that all such materials have been identified. It is possible that some materials containing a hazardous substance were not visible or accessible to the surveyor, or, for various other reasons, were not sampled.

All findings are based on documentary review, conversations, and analytical data proved by the laboratory as noted in this report. These findings are not to be considered scientific certainties. The intent of this study was to identify environmental concerns, which would be obvious to a skilled, knowledgeable professional applying accepted standards. This report is not intended to represent an exhaustive research of all potential hazards that may exist at this site.

This report also does not purport to be representative of future conditions or events. Activities, which transpire subsequent to this report, which result in adverse environmental impacts, are not to be construed as relevant to this study.

This report has been performed for the exclusive use of the client. Our report and its findings shall not, in whole or part, be disseminated to any other party, nor be used by any other party without prior written consent by Gabriel Environmental Services.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 23), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 12/26/2025 has revealed that there are 3 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 11/30/2025 has revealed that there is 1 RCRA-TSDF site within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 11/30/2025 has revealed that there are 2 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Federal institutional controls / engineering controls registries

US INST CONTROLS: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROLS list, as provided by EDR, and dated 10/30/2025 has revealed that there is 1 US INST CONTROLS site within approximately 0.5 miles of the target property.

Lists of state and tribal leaking storage tanks

IL LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Illinois Environmental Protection Agency's LUST Incident Report.

A review of the IL LUST list, as provided by EDR, and dated 01/12/2026 has revealed that there are 6 IL LUST sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Incident Num: 951247
IL EPA Id: 0313275136

Lists of state and tribal registered storage tanks

IL UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Illinois State Fire Marshal's STC Facility List.

A review of the IL UST list, as provided by EDR, and dated 01/12/2026 has revealed that there are 2 IL UST sites within approximately 0.25 miles of the target property.

State and tribal institutional control / engineering control registries

IL INST CONTROL: Legal or administrative restrictions on land use and/or other activities (e.g., groundwater use restrictions) which effectively limit exposure to contamination may be employed as alternatives to removal or treatment of contamination.

A review of the IL INST CONTROL list, as provided by EDR, and dated 12/10/2025 has revealed that there is 1 IL INST CONTROL site within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 11/30/2025 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 12/17/2025 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

VALVOLINE, DIVISION	8450 WILLOW SPRINGS	SSE 0 - 1/8 (0.058 mi.)	C16	50

EXECUTIVE SUMMARY

UST FINDER RELEASE: US EPA's UST Finder data is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

A review of the UST FINDER RELEASE list, as provided by EDR, and dated 06/08/2023 has revealed that there are 4 UST FINDER RELEASE sites within approximately 0.5 miles of the target property.

UST FINDER: EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tank (UST) and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories . UST Finder contains information about proximity of UST facilities and LUST sites to: surface and groundwater public drinking water protection areas; estimated number of private domestic wells and number of people living nearby; and flooding and wildfires.

A review of the UST FINDER list, as provided by EDR, and dated 06/08/2023 has revealed that there are 2 UST FINDER sites within approximately 0.25 miles of the target property.

E MANIFEST: EPA established a national system for tracking hazardous waste shipments electronically. This system, known as ?e-Manifest,? will modernize the nation?s cradle-to-grave hazardous waste tracking process while saving valuable time, resources, and dollars for industry and states.

A review of the E MANIFEST list, as provided by EDR, and dated 11/30/2025 has revealed that there are 2 E MANIFEST sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

IL IMPDMENT: Statewide inventory of industrial, municipal, mining, oil & gas , and large agricultural impoundment. This study was conducted by the Illinois EPA to assess potentail for contamination of shallow aquifers. This was a one-time study.Although many of the impoundments may no longer be present, the sites may be contaminated.

A review of the IL IMPDMENT list, as provided by EDR, and dated 12/31/1980 has revealed that there is 1 IL IMPDMENT site within approximately 0.5 miles of the target property.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
THE EMISSION INVENTORY SYSTEM (EIS) MAINTAINS AN INVENTORY OF LARGE STATIONARY SOURCES AND VOLUNTARILY-REPORTED SMALLER SOURCES OF AIR POINT POLLUTANT EMITTERS. IT CONTAINS INFORMATION ABOUT FACILITY SITES AND THEIR PHYSICAL LOCATION, EMISSIONS UNITS, EMISSIONS PROCESSES, RELEASE POINTS, CONTROL APPROACHES, AND REGULATIONS. FACILITY INVENTORY DATA ARE KEPT SEPARATE FROM THE EMISSIONS DATA AND HAVE STABLE IDENTIFIERS TO IMPROVE CONTINUITY FROM YEAR TO YEAR AND TO HELP IDENTIFY DUPLICATE OR MISSING FACILITIES
ICIS-Air (AIR) AIR is the modernization of the Air Facility System (AFS) into the Integrated Compliance Information System (ICIS). AIR contains enforcement, compliance, and permit data for stationary sources of air pollution regulated by the EPA, State, and Local air pollution agencies.
The Air Facility System (AFS) contains compliance and permit data for stationary sources of air pollution regulated by the EPA, state, and local air pollution agencies.
The Integrated Compliance Information System (ICIS) provides a database that, when complete, will contain integrated enforcement and compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained in ICIS by EPA in the Regional offices and it at Headquarters. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.
The Resource Conservation and Recovery Act Information System

UNITED PARCEL SERVICE (Continued) **1000172862**

(RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
The Agency Compliance and Enforcement Systems (ACES) application supports the compliance and enforcement activities that exist primarily within the Illinois Bureaus of Air, Water, and Land, the Division of Legal Counsel, and the Office of Chemical Safety. The intent of the system is to track compliance and enforcement processes and to share the information throughout the agency, the public and with other entities.

Hazardous Waste Summary:
Waste Code: D000
Waste Description: Not Defined

Waste Code: D001

ASHLAND CHEMICAL (Continued) **1000277093**

Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D003
Waste Description: Reactive Waste

Waste Code: D018
Waste Description: Benzene

Waste Code: D019
Waste Description: Carbon Tetrachloride

Waste Code: D020
Waste Description: Chlordane

Waste Code: D021
Waste Description: Chlorobenzene

Waste Code: D022
Waste Description: Chloroform

Waste Code: D023
Waste Description: O-Cresol

Waste Code: D024
Waste Description: M-Cresol

Waste Code: D025
Waste Description: P-Cresol

Waste Code: D026
Waste Description: Cresol

Waste Code: D027
Waste Description: 1,4-Dichlorobenzene

Waste Code: D028
Waste Description: 1,2-Dichloroethane

Waste Code: D029
Waste Description: 1,1-Dichloroethylene

Waste Code: D030
Waste Description: 2,4-Dinitrotoluene

Waste Code: D031
Waste Description: Heptachlor (And Its Epoxide)

Waste Code: D032
Waste Description: Hexachlorobenzene

Waste Code: D033
Waste Description: Hexachlorobutadiene

Waste Code: D034

ASHLAND CHEMICAL (Continued) **1000277093**

Waste Description: Hexachloroethane

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: D036
Waste Description: Nitrobenzene

Waste Code: D037
Waste Description: Pentachlorophenol

Waste Code: D038
Waste Description: Pyridine

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: D040
Waste Description: Trichloroethylene

Waste Code: D041
Waste Description: 2,4,5-Trichlorophenol

Waste Code: D042
Waste Description: 2,4,6-Trichlorophenol

Waste Code: D043
Waste Description: Vinyl Chloride

Waste Code: F001
Waste Description: The Following Spent Halogenated Solvents Used In Degreasing: Tetrachloroethylene, Trichlorethylene, Methylene Chloride, 1,1,1-Trichloroethane, Carbon Tetrachloride And Chlorinated Fluorocarbons; All Spent Solvent Mixtures/Blends Used In Degreasing Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F002
Waste Description: The Following Spent Halogenated Solvents: Tetrachloroethylene, Methylene Chloride, Trichloroethylene, 1,1,1-Trichloroethane, Chlorobenzene, 1,1,2-Trichloro-1,2,2-Trifluoroethane, Ortho-Dichlorobenzene, Trichlorofluoromethane, And 1,1,2, Trichloroethane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Halogenated Solvents Or Those Solvents Listed In F001, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated

ASHLAND CHEMICAL (Continued) **1000277093**

Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: F005
Waste Description: The Following Spent Nonhalogenated Solvents: Toluene, Methyl Ethyl Ketone, Carbon Disulfide, Isobutanol, Pyridine, Benzene, 2-Ethoxyethanol, And 2-Nitropropane; All Spent Solvent Mixtures/Blends Containing, Before Use, A Total Of Ten Percent Or More (By Volume) Of One Or More Of The Above Nonhalogenated Solvents Or Those Solvents Listed In F001, F002, Or F004; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Waste Code: P022
Waste Description: Carbon Disulfide

Waste Code: P029
Waste Description: Copper Cyanide (Or) Copper Cyanide Cu(Cn)

Waste Code: P053
Waste Description: Not Defined

Waste Code: P090
Waste Description: Not Defined

Waste Code: U001
Waste Description: Acetaldehyde (I) (Or) Ethanal (I)

Waste Code: U002
Waste Description: 2-Propanone (I) (Or) Acetone (I)

Waste Code: U004
Waste Description: Acetophenone (Or) Ethanone, 1-Phenyl-

Waste Code: U012
Waste Description: Aniline (I,T) (Or) Benzenamine (I,T)

Waste Code: U019
Waste Description: Benzene (I,T)

Waste Code: U028
Waste Description: 1,2-Benzenedicarboxylic Acid, Bis(2-Ethylhexyl) Ester (Or) Diethylhexyl Phthalate

Waste Code: U031
Waste Description: 1-Butanol (I) (Or) N-Butyl Alcohol (I)

Waste Code: U037
Waste Description: Benzene, Chloro- (Or) Chlorobenzene

Waste Code: U044
Waste Description: Chloroform (Or) Methane, Trichloro-

Waste Code: U054
Waste Description: Not Defined

ASHLAND CHEMICAL (Continued) **1000277093**

Waste Code:	U055
Waste Description:	Benzene, (1-Methylethyl)- (I) (Or) Cumene (I)
Waste Code:	U056
Waste Description:	Benzene, Hexahydro- (I) (Or) Cyclohexane (I)
Waste Code:	U057
Waste Description:	Cyclohexanone (I)
Waste Code:	U069
Waste Description:	1,2-Benzenedicarboxylic Acid, Dibutyl Ester (Or) Dibutyl Phthalate
Waste Code:	U070
Waste Description:	Benzene, 1,2-Dichloro- (Or) O-Dichlorobenzene
Waste Code:	U071
Waste Description:	Benzene, 1,3-Dichloro- (Or) M-Dichlorobenzene
Waste Code:	U072
Waste Description:	Benzene, 1,4-Dichloro- (Or) P-Dichlorobenzene
Waste Code:	U080
Waste Description:	Methane, Dichloro- (Or) Methylene Chloride
Waste Code:	U088
Waste Description:	1,2-Benzenedicarboxylic Acid, Diethyl Ester (Or) Diethyl Phthalate
Waste Code:	U092
Waste Description:	Dimethylamine (I) (Or) Methanamine, N-Methyl- (I)
Waste Code:	U102
Waste Description:	1,2-Benzenedicarboxylic Acid, Dimethyl Ester (Or) Dimethyl Phthalate
Waste Code:	U103
Waste Description:	Dimethyl Sulfate (Or) Sulfuric Acid, Dimethyl Ester
Waste Code:	U107
Waste Description:	1,2-Benzenedicarboxylic Acid, Dioctyl Ester (Or) Di-N-Octyl Phthalate
Waste Code:	U108
Waste Description:	1,4-Diethyleneoxide (Or) 1,4-Dioxane
Waste Code:	U110
Waste Description:	1-Propanimine, N-Propyl-(I) (Or) Dipropylamine (I)
Waste Code:	U112
Waste Description:	Acetic Acid, Ethyl Ester (I) (Or) Ethyl Acetate (I)
Waste Code:	U117
Waste Description:	Ethane, 1,1'-Oxybis-(I) (Or) Ethyl Ether (I)
Waste Code:	U122
Waste Description:	Formaldehyde
Waste Code:	U123
Waste Description:	Formic Acid (C,T)

ASHLAND CHEMICAL (Continued) **1000277093**

Waste Code:	U125
Waste Description:	2-Furancarboxaldehyde (I) (Or) Furfural (I)
Waste Code:	U134
Waste Description:	Hydrofluoric Acid (C,T) (Or) Hydrogen Fluoride (C,T)
Waste Code:	U140
Waste Description:	1-Propanol, 2-Methyl- (I,T) (Or) Isobutyl Alcohol (I,T)
Waste Code:	U147
Waste Description:	2,5-Furandione (Or) Maleic Anhydride
Waste Code:	U150
Waste Description:	L-Phenylalanine, 4-[Bis(2-Chloroethyl)Amino]- (Or) Melphalan
Waste Code:	U154
Waste Description:	Methanol (I) (Or) Methyl Alcohol (I)
Waste Code:	U159
Waste Description:	2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)
Waste Code:	U160
Waste Description:	2-Butanone, Peroxide (R,T) (Or) Methyl Ethyl Ketone Peroxide (R,T)
Waste Code:	U161
Waste Description:	4-Methyl-2-Pentanone (I) (Or) Methyl Isobutyl Ketone (I) (Or) Pentanol, 4-Methyl-
Waste Code:	U165
Waste Description:	Naphthalene
Waste Code:	U171
Waste Description:	2-Nitropropane (I,T) (Or) Propane, 2-Nitro- (I,T)
Waste Code:	U189
Waste Description:	Phosphorus Sulfide (R) (Or) Sulfur Phosphide (R)
Waste Code:	U190
Waste Description:	1,3-Isobenzofurandione (Or) Phthalic Anhydride
Waste Code:	U194
Waste Description:	1-Propanamine (I,T) (Or) N-Propylamine (I,T)
Waste Code:	U210
Waste Description:	Ethene, Tetrachloro- (Or) Tetrachloroethylene
Waste Code:	U211
Waste Description:	Carbon Tetrachloride (Or) Methane, Tetrachloro-
Waste Code:	U213
Waste Description:	Furan, Tetrahydro-(I) (Or) Tetrahydrofuran (I)
Waste Code:	U219
Waste Description:	Thiourea
Waste Code:	U220
Waste Description:	Benzene, Methyl- (Or) Toluene

ASHLAND CHEMICAL (Continued) **1000277093**

Waste Code: U223
Waste Description: Benzene, 1,3-Diisocyanatomethyl- (R,T) (Or) Toluene Diisocyanate (R,T)

Waste Code: U226
Waste Description: Ethane, 1,1,1-Trichloro- (Or) Methyl Chloroform

Waste Code: U228
Waste Description: Ethene, Trichloro- (Or) Trichloroethylene

Waste Code: U239
Waste Description: Benzene, Dimethyl- (I,T) (Or) Xylene (I)
