Updating our Childcare Facility

As part of the upcoming April 2nd referendum, the Shawano School District is looking to add a childcare option for the community and staff. The referendum proposes a remodel of approximately 7,552 square feet at Hillcrest Primary School in order to house a childcare program and provide updated educational spaces.

The daycare would be open to the public and District employees. This feature would help recruit families to the District while also assist in the recruitment of future District employees.

The facility is designed to hold a total of eighty-eight children from age six-weeks to school age and would be open year-round. There would be one week, most likely around the July 4th holiday, when the daycare would be closed.

Additional details, including the schedule and hours open, are still to be determined. The schedule and hours would be similar to other local daycare providers. Our goal is to collaborate with local daycare providers to provide an additional option for families to join our community.
