AP Biology Summer Assignment

Assignments

1. Complete this poll on learning styles

2. **Observe** and **identify** wildlife you encounter over the summer and upload pictures of them to this shared drive.
    - Carefully **read the file titled "INSTRUCTIONS"** before you upload

3. **Read** the following sections of the **Campbell Biology in Focus (4th edition)** textbook and complete the **Guided Notes**
    - **Section 1:** Introduction: Evolution and the Foundations of Biology
    - **Section 2:** The Chemical Context of Life

4. **Prepare for a test** on **The Chemical Context of Life** by our first "F Day" in the schedule
    - Use the guided notes to create a study guide and flashcards to help prepare

Instructions for Guided Notes:

- You are expected to **read the text and complete the guided notes handout** before exams on a chapter.

- Make a copy of the Guided Notes document and rename it "Your Name Guided Notes 1 & 2"
    - Edit the document in ***google docs*** to fill in the blanks and answer the questions. **PLEASE DO NOT USE BLACK FONT COLOR**
    - If asked to draw an image: make your illustration on notability and insert a screenshot of your drawing into the Guided Notes document

- In order to ensure success in AP Biology, **it is vital that you complete the readings before lecture** as that will enable you to have a stronger understanding of the topic and to ask more informed questions class

- The guided notes **questions are based on quotes from the book** and are **presented in sequential order following the textbook**

- In any instance where you are asked to draw or recreate a model, your artistic talent will not factor into your grade
