

CECA TSIA Testing Plan

2026–2027 School Year

The TSIA will be administered throughout the school year to provide students multiple opportunities to demonstrate college readiness and meet EPCC requirements.

Testing Windows

August 2026

Session 1

- August 12–13

Session 2

- August 26–27

September 2026

Session 3

- September 9–10

Session 4

- September 23–24

March 2027

Session 5

- March 10–11

Session 6

- March 24–25

Student Preparation

To support student success on the TSIA, students will participate in targeted preparation activities prior to testing:

- Students will be assigned **PLATO TSI Preparation** modules to strengthen skills in mathematics, reading, and writing.
- Additional TSIA preparation will be embedded in **Math and English classes** throughout the school year.
- Teachers will monitor student progress and readiness through classroom performance, assessments, and completion of preparation activities.

Student Selection for Testing

Students will be scheduled for TSIA testing based on:

- Teacher recommendation
- Academic performance and readiness indicators
- Completion of TSIA preparation activities
- EPCC enrollment requirements

This targeted approach ensures that students test when they are academically prepared and have the greatest opportunity for success.

Retesting Opportunities

Students who do not meet college-ready benchmarks on an initial attempt may participate in additional preparation and be scheduled for retesting during subsequent testing windows. Makeup testing sessions will be provided as needed.

Dates are subject to change.
