Fairfield College Preparatory School

A Jesuit, Catholic School of Excellence

June 2026

Dear Class of 2030 families,

As part of our commitment to helping students begin with a strong foundation, the Math Department provides summer assignments. All incoming freshmen have been assigned a username and password in IXL, where they will find a list of topics assigned to them.

Students should work to a Smart Score of 80 in each of these topics over the course of the summer, and successful completion will be confirmed by incoming freshmen math teachers.

These topics have been selected to provide practice and reinforcement of the most important 8th-grade math skills. IXL also provides access to worked examples and videos for each skill if a student is in need of support.

Students enrolled in Algebra 1 will be given an assessment from their teacher on these topics during the first week of school.

Students enrolled in Geometry, Honors Geometry, Algebra 2, or Honors Algebra 2 should also complete, in addition to the IXL, the assignment specific to their course. These can be found on the Prep website.

Students: access the IXL content by logging into your Prep email. Your IXL username and password have been sent via email from IXL and can be used to log in at ixl.com/signin. Once logged in, go to Recommendations/From Your Teacher to access the assigned skills. Click here for tips.
