Shawano School District

DPI Education for Homeless Children & Youth Compliance Grant

Did You Know?

Wisconsin Department of Public Instruction has a competitive grant competition that aims to provide increased technical support to districts to ensure compliance with the McKinney-Vento Act and to urge districts to go beyond compliance.

Shawano School District won the DPI EHCY Compliance grant for the 2021-2023 grant cycle. The goals of this grant are to review policies and procedures relating to students experiencing homelessness and to increase and strengthen community partnerships relating to homelessness in our greater Shawano School District community and to create district-specific awareness materials.

We believe that we can increase the accuracy with which we identify students experiencing homelessness and improve the experience of those who are experiencing homelessness BUT, we need your help.

Shawano School District values the input of families and the community. Our goal is to assemble a team to review McKinney Vento policy and procedures and to use the work done by that group to review and revise current policies and procedures. With these revisions and updates, we hope to educate staff and the community on those policies and on homelessness in our district and community. Part of this work is specific to our unaccompanied and homeless youth in our community, to include youth who are runaways. Please consider joining our efforts and participating in the conversation. The input of students, families, and the community is an integral piece of the work that is informed by this grant.
