Shawano School District

DPI School Based Mental Health Grant

Did You Know?

Wisconsin Department of Public Instruction has a competitive grant competition bi-annually for public schools to improve, increase, and provide mental health services to students.

Shawano School District won the DPI School-Based Mental Health Grant for the academic years of 2021-2022 and 2022-2023. The goal of the grant is to address key needs identified in our student and community data. The School-Based Mental Health grant will help our district improve support and access to all students and will prioritize cultural inclusivity for our most marginalized students: First Nations Students, low-income students, and those experiencing homelessness.

We believe we can engage the community, families, and students in comprehensive mental health treatment and education. BUT, we need your help.

Shawano School District values the input of families and the community. To improve the mental health of students, families, and the community, we need your input and engagement. Please consider collaborating with our school social work team on how to make this grant better serve our community. A survey will be going out to gather information on when the community is able and willing to meet and what the community and families want to know more about. If you have any interest in being a part of this, or other grant work, please contact the mental health navigator.

1

SHARE

Look for a survey to share your feedback on our community needs!

2

COLLABORATE

Look for information on when our first parent and community engagement night is!

3

ENGAGE

Stay tuned for resources and opportunities to engage in mental health learning

Still have questions or want to learn more?
