Welcome to College Place Middle School 2026-2027

The following math options and electives are offered to 7th grade students for the 2026-2027 school year. Please review them with your family and write your math choice and top 3 elective choices on the back page.

MATH

-  **MATH 7** Standard course for all incoming 7th graders. Essential for building foundational math skills. Covers ratios, proportional relationships, rational numbers, algebraic expressions, geometry, and statistics as per state standards; Covers Grade 7 Common Core Standards for Mathematics.
-  **PRE-ALGEBRA** Best suited for students with an i-Ready score of 498-521 OR a 5th Grade SBA score of 2535-2617. Focuses on linear equations, geometric properties, and bivariate data. This is a mixed class with 7th and 8th graders and is a commitment for the entire year; Covers Grade 8 Common Core Standards for Mathematics.
-  **ALGEBRA** Students with an i-Ready score greater than or equal to 522 OR with a 5th grade SBA score of greater than or equal to 2618 may register for Algebra 1. Students who score below these levels will not be admitted into Algebra 1 in 7th grade. Algebra offers in-depth study in arithmetic algorithms, equations, inequalities, and various functions; Covers Grade 9 Common Core Standards for Mathematics; **This accelerated course offers high school credit and is with mixed 7th and 8th-grade students.**

YEAR LONG ELECTIVES

-  **CONCERT BAND** This course is intended for students who have completed a minimum of one year of study on their instruments during elementary school. Students perform in a variety of different settings including concerts, trips to local events during the school day, and visits to Seattle Center, EMP, and band festivals. One of the goals of this ensemble is to prepare students for more extensive travel (state-wide, as well as to Canada) as they progress to CPM's highly recognized 8th Grade Wind Ensemble. Concert Band students are eligible to audition for Jazz Band during the second week of school.
-  **CONCERT ORCHESTRA** This course is open to 7th & 8th graders who have completed a year of study on a string instrument. This ensemble focuses on the development of string playing technique and musicianship. Participating in orchestra includes several fun concerts outside of the school day (including Tamales and Tunes!) and a performance at a regional orchestra festival. String Orchestra students are eligible to audition for Jazz Band during the second week of school.
-  **MANUFACTURING FOUNDATION** This year long course prepares students for planning and building skills used by engineers, architects, construction and manufacturing workers, as well as trades workers. Students will learn factory concepts by mass-producing products as a team, then advance to independent projects using 3D printers, laser cutters, and hand/power tools, while exploring material properties and equipment.

SEMESTER LONG ELECTIVES

 **VISUAL ARTS** This course introduces creative students to the basics of Art, including tools, materials, techniques, and Art room safety. We'll cover hand-building clay techniques, as well as basic drawing and painting skills.

 **STEAM FUNDAMENTALS**(*Science, Technology, Engineering, Art and Math*) This course is semester-long, introducing engineering and design through hands-on projects. Students learn to safely use tools, 3D printers, laser cutters, CAD software, and robotics while building projects like a wood dragster, rocket, balsa structure, architectural model, and coded robot—giving them real-world engineering experience.

COMMUNITY HELPER OPPORTUNITY

 **Are you interested in helping our CPM Community, instead of one of the above electives?** We have (2) positions available (Office and Library). Both require the ability to follow directions, work independently, be responsible with privileged information, and work well with others. Good attendance and punctuality are necessary. Office duties include scheduling, delivering passes, and organizing. Library assistants help with managing and reshelving books. To apply, complete the Community Helper Application on our website or ask your teacher for the link. **This is not an option in Skyward Qmlativ. You can write it as a choice below, however you will still need to select one of the above electives in Skyward Qmlativ.**

1 ST CHOICE	2 ND CHOICE	3 RD CHOICE	Math Course
			☐ Math 7 ☐ Pre-Algebra ☐ Algebra

- ☐ I have read the elective options with my family
- ☐ I have checked with my teacher AND my family about my math choice
- ☐ I understand that I may not receive my top choice, but that the school will do its best to schedule me accordingly
