

AP Precalculus

Summer Assignment 2026

Purpose: Students benefit from a strong foundation in algebraic reasoning, function notation, and graphical awareness to be ready for the rigor of this course. This assignment reviews prerequisite material studied predominantly in Algebra 1 and Algebra 2.

Help for the summer assignment: This assignment is built in DeltaMath. Review/videos on the topics are integrated into the assignment (as needed).

Calculator: A graphing calculator is helpful for AP Precalculus. Graphing calculators will be available to students during class. The TI-84 Plus CE is recommended.

Due Date: The summer assignment is due the first day of class on August 27th, and will be checked for a completion grade. There is nothing to physically “hand-in”; your teacher will be able to see all your progress in DeltaMath.

Assignment – AP Precal Summer Work in [Delta Math](#)

Create a DeltaMath account

- Go to www.deltamath.com
- Create a student account, click Register
- Use Class Code: **F7K8-K58F**
- Choose to Register with Google (make sure to use your school email address.)
- Once registration is complete - you will need to then LOGIN into DeltaMath to begin the assignment.

Expectations:

- For each part of this summer assignment, you will need to complete a small set of problems CORRECTLY. There is an option to “Show Examples” when you need a reminder for how to do something. Incorrect answers will generate a new question until the minimum number of correct answers is satisfied.
- Your work will automatically save, so you can take your time reviewing and completing the assignment.

I look forward to learning with you this year! – Mrs. Kelly (akelly@pgsd.org)
