

Level of AI Use for Students

Level of AI Use	Description	Citation	Examples
Level 0 No AI Use	This assessment is completed entirely without AI assistance. AI must not be used at any point. This level ensures students rely solely on their own knowledge, understanding, and skills.	No AI disclosure is required. May require an academic honesty pledge that AI was not used.	- Handwritten math assessment - In-class essay written without devices - Science quiz completed independently - World language speaking assessment
Level 1 AI Assisted Ideas	No AI content allowed in final submission. AI can be used in the assessment for brainstorming, creating structures, and generating ideas to improve student work.	AI disclosure statement on how AI was used is required.	- Generate possible research topics for a history project - Brainstorm themes for a literary analysis essay - Create an outline for a persuasive speech - Generate possible solutions to a community problem for a civics project
Level 2 AI Assisted Editing	No new content can be created using AI. AI can be used to make improvements to clarity or quality of student created work to improve the final output.	AI disclosure statement on how AI was used is required. Link(s) to AI chats must be included with final submission.	- Ask AI to identify grammar and spelling errors in an essay - Improve transitions between paragraphs in a research paper - Simplify complex words in a lab report while preserving student ideas - Check for clarity and audience appropriateness in a presentation script
Level 3 AI for Specific Task Completion	AI is used to complete certain elements of the task, as specified by teacher. Critical engagement with AI is required to evaluate output. Student is responsible for human oversight and evaluation of AI generated content.	All AI- created content must be properly cited. Link(s) to AI chats must be included with final submission.	- Use AI to generate practice interview questions for a career project and analyze their quality - Use AI to create a first draft of survey questions, then revise and justify changes on your own - Use AI to summarize multiple sources before writing your own original analysis - Use AI to generate data visualizations from provided data and explain the results
Level 4 (Full AI Use with Human Oversight)	Student may use AI throughout assessment to support work in any way deemed necessary. AI should be a "co-pilot" to enhance human creativity. Students are responsible for human oversight and evaluation.	All AI- created content must be properly cited. Link(s) to AI chats must be included with final submission of AI generated content.	- Develop a multimedia project using AI for research support, image generation, drafting, and revision - Create a business plan using AI for brainstorming, drafting, feedback, and presentation design - Produce a documentary script with AI-assisted research and editing - Design a STEM innovation proposal using AI throughout the planning, writing, and revision process while documenting and evaluating AI contributions
