

AB Calculus Summer Assignment

Your summer assignment is on Delta Math. Please join the course called AB Calculus 2026-27. You can log in and join with the code, **E2SH-5QJ6**, or you can use the following link.

[Delta](#)

The assignment will be due on the first day back to school. If there are any topics that you have difficulty with, it is expected that you will use any resources available to you to help review the material. (the Delta videos, YouTube, Khan Academy, AI, etc.)

There will be a quiz on these topics during the first week of classes.

Attached to this are a parent functions worksheet, a special angle trig chart, and a reference sheet (this will help with some of the assignment). Please print all of these out. Complete the Library of functions and special angle chart as part of your summer assignment. All three of these will be added to the toolbox section of your binder that you will use next year for this course.

If you have any trouble with the links below or logging into Delta, please email me at kmay@gmahs.org.

We will work hard in this course, but it will be worth it. Calculus is a fascinating class; I know you will love it as much as I do.

Have a wonderful summer!!

Mrs. May
