

Disadvantaged Pupil Impact Aid and Student Wellness and Success Funds Plan

June 2026

The following plan is the Lisbon Exempted Village School District's plan for using Student Wellness and Success Funds.

Mental Health Services

Supporting the mental health and emotional well-being of students remains a priority for our district. Through our partnership with Travco Behavioral Health, students in grades 6–12 have access to counseling services during the school day. At the same time, our K–12 guidance staff continue to provide increased support for students and families as they address social-emotional needs, attendance concerns, academic challenges, and behavioral issues.

School Resource Officer / Student Safety

Our School Resource Officer serves both district buildings and plays an important role in maintaining a safe and supportive school environment. In addition to assisting with attendance, discipline, and family outreach, he works to build positive relationships with students and staff. As a member of the district Safety Team, he also helps identify areas for improvement and contributes to ongoing school safety planning efforts.

Physical Health Services

Providing quality health services is essential to meeting the daily needs of our students. To better support student wellness, the district employs a full-time nurse in each building. This allows for timely care of students with chronic health conditions, medication needs, and everyday illnesses or injuries. Having dedicated nursing staff in both buildings ensures students receive the support necessary to remain healthy and engaged in learning.

Reading Improvement and Intervention

Improving literacy outcomes continues to be a major focus for our district. Federal funds help support reading instruction, intervention services, professional development, and instructional resources designed to close achievement gaps. As we continue implementing practices aligned with the Science of Reading, these resources help ensure students receive targeted support and access to high-quality literacy instruction.

Guidance / Student Support

Our guidance department provides critical support to students across all grade levels. Counselors work closely with students and families to address academic progress, attendance concerns, behavioral needs, and personal challenges that may impact learning. As student needs continue to evolve, these services play an important role in helping students remain connected, supported, and successful in school.

After School Program

The McKinley After-School Program continues to provide valuable learning opportunities beyond the regular school day. Following the conclusion of the district's 21st Century Community Learning Centers Grant, the district chose to continue offering the program to elementary students. Participants receive additional academic support while also engaging in STEM activities, social development opportunities, and enrichment experiences that extend learning outside the classroom.
