MEMORANDUM

To: **Timothy W. Bricker**
From: **Brian Russell**
CC:
Date: **6/3/2026**
Subject: **Quarterly Facilities Update**

March 2026 – May 2026

Blue Bell Elementary:

The Blue Bell Expansion Project is currently moving through the project closeout phase. The remaining items that are required to be completed surround vegetation that is required as part of the plan. Due to the time of the main completion of the project, this had to wait until this growing season.

Alongside the major project, several campus repairs were completed, including replacing the original building's chiller compressor under warranty and repairing a sinkhole on the playground. Additionally, work has officially begun here on the district-wide intrusion alarm upgrade.

Lower Gwynedd Elementary:

Facilities maintenance addressed infrastructure needs at this location by repairing leaks within the hot water heating system piping. The campus also recently received its district-wide intrusion alarm upgrade. Additionally, a meeting was held to finalize the playground project and work with the Home & School Association on what options they had for an item to be added to the project as a donation.

Shady Grove Elementary:

Several key maintenance tasks were completed at this building, including repairing a leak on Boiler #2 and completing necessary repairs to the gym roof.

Stony Creek Elementary:

The district-wide intrusion alarm upgrade has been successfully completed and is fully operational at this location.

Wissahickon Middle School:

Two major mechanical updates are happening here. Routine repairs were completed to replace the coil in Air Handler #1. Concurrently, the Boiler Replacement Project is

officially underway, with project materials arriving on-site and demolition work actively beginning on Boiler #1.

Wissahickon High School:

The high school campus completed minor roof repairs and various maintenance fixes to the building's chillers. Additionally, the facilities staff installed a new Memorial Bench on the school grounds.

Stadium Bleacher Project:

The Stadium Bleacher Project is now complete with only punch list items remaining.

Central Office:

The district-wide intrusion alarm upgrade has been successfully completed and is fully operational at this location.
