Readiness Seals

Readiness seals help students plan for the future, but they can be changed if a student's interests or goals change. Students are encouraged to follow the guides to the right to use their class choices in a way that matches what they want to do after high school. Students can earn one seal or more. These seals can lead to opportunities like: automatic enrollment in some colleges, automatic scholarships, career support, and acceptance to branches of the military.

	9th Grade Seal Requirements	10th Grade Seal Requirements	11th Grade DP / 12th Grade DP Seal Requirements	Direct Path to Your Future: Why Should You Earn The Honors Plus Seal?
Enrollment	Algebra I/Geometry Biology/Chemistry World Language World Geography C's or Higher	Geometry/Algebra II Chemistry or Physics/Adv. IPS Course Recommendations For College Bound Students: CP & DP

myIPS

for more information scan this QR code

These recommendations aim to help students maximize their preparation and admission opportunities for 4-year college enrollment after high school. These recommendations are based on feedback from college admission representatives from a variety of institutions (in-state/out-of-state, public/private).

English

The intentionally structured English progression guarantees every student graduates with a high level of academic rigor. This sequence, culminating in the IB Language and Literature course, is specifically chosen to maximize college readiness.

NOTE: Communication-focused courses may not count as English credit at some colleges/universities.

Math

Complete Integrated Math I, Integrated Math II, and one year of IB Math. Prioritize completion of math coursework beyond year 1 of IB math for preparation and admissions. Some colleges require 4 years.

NOTE: Personal Finance will not count as a math credit at most colleges/universities.

Science

Complete Biology, Chemistry, & two additional IB science credits. Students considering Engineering/STEM majors are encouraged to complete Physics.

NOTE: Some STEM-focused credits, such as CTE pathway courses, may not count as science credits at some colleges.

World Languages

Prioritize completing 2 years of world language coursework (preferably in the same language).

NOTE: Some colleges require world language credit. More selective colleges often expect/require three or more years.

Social Studies

Complete 3 years of social studies coursework to include: Geography History of the World, IB History of the Americas, US Government, and at least one additional semester or year-long social studies course.

Fine/Performing Arts

Prioritize completing at least 2 credits of visual or performing arts coursework to fulfill personalized elective credits.

NOTE: Some colleges require visual or performing arts credits as part of their minimum admission requirements.

Major/Career Related Electives

Complete advanced core coursework that challenges you and/or career concentrator pathway courses to allow for exploration of future career interests and fulfillment of personalized elective credits.

NOTE: IPS students have the opportunity to earn up to 64 credits during their high school career. This leaves room for completion of additional electives and/or a readiness Honors Seal.
