Summer Math Skills - Overview

Algebra II - Review: Foundational Skills Practice & Unit 0: Statistics & Probability

Welcome!

I can't wait for our class this fall! We are going to explore the wild world of functions, discovering along the way some patterns and relationships that change the way you perceive reality. That means we need to make sure our foundational skills are so solid that they're ingrained into our muscle memory. I have some practice for you to do over the summer to keep your math skills sharp.

You'll also be doing some investigating into Statistics & Probability. These topics are *super* useful in almost every industry (sports, finance, healthcare, manufacturing, marketing, …) and will certainly play a leading role in upcoming ACT/SAT tests. So sharpen those pencils and read below for details about your offseason math training regimen!

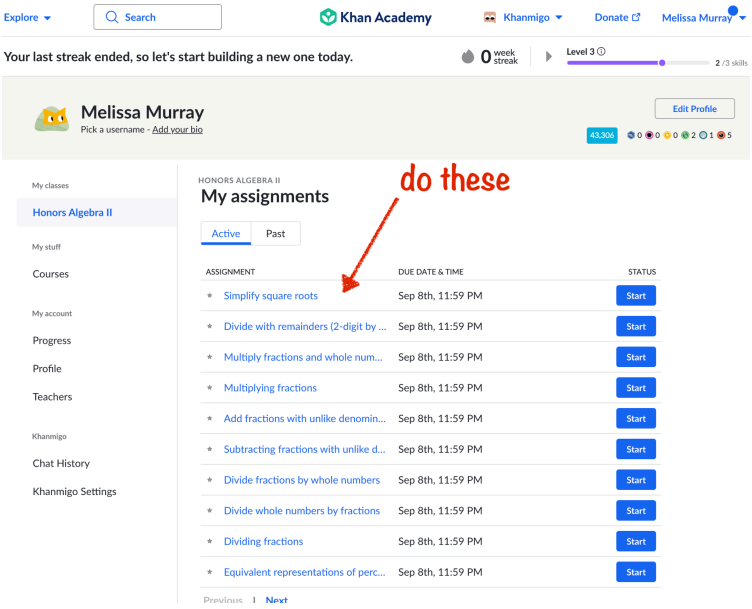

Getting Started: Khan Academy

1. Follow this link to access your assignments:
   https://www.khanacademy.org/join/J7TCN2KC

   You might need to make an account.

2. All you **need** to do is complete the exercises.

If you'd like some video tutorials, click the topic…

Review: Foundational Skills Practice

These exercises will be the first ones in your list. They're **due by September 8**, so you'll have a couple weeks in school to ask questions if you need to!

Unit 0: Statistics & Probability

Click "Next" at the bottom of your assignment list to find these exercises. They're **due by October 19**, so you'll have even more time in school to ask questions if you need to!
