

Post-Secondary Enrollment Brief

Atlanta Public Schools Post-Secondary Enrollment Trends

Cohorts 2012-2025

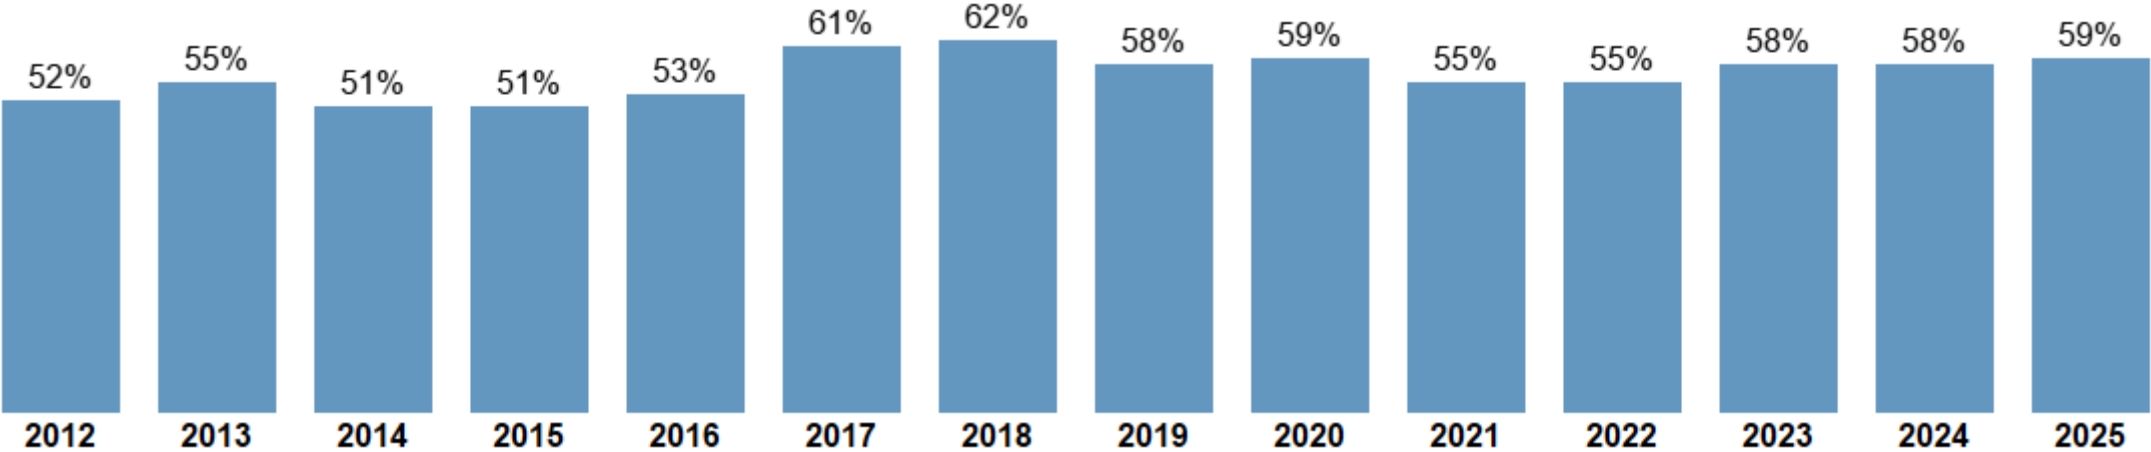

One District. One Goal. Every Child.

Introduction

This report examines post-secondary enrollment and persistence of Atlanta Public Schools (APS) on-time graduates since 2012. It focuses on seamless enrollment of each graduating cohort as defined by the Center for Education Policy Research at Harvard University. **Seamless enrollment means a student was enrolled in a post-secondary institution as of October 1st following their high school graduation.** Enrolled students who disenroll before October 1st are not counted as seamless enrollees. Seamless enrollment includes full-time and part-time enrollment at both 4-year and 2-year institutions in any degree program. Information about National Student Clearinghouse (NSC), the source of the postsecondary enrollment data, can be found at the end of this report. Fifty-nine percent of cohort 2025 on-time graduates were enrolled in 2- or 4-year institutions as of October 1, 2025.

On-time graduates are students who graduate within four years with a regular high school diploma as reported by the Georgia Department of Education. Seamless enrollment rates for cohorts prior to 2025 use the college enrollment rate as of the time the analysis was conducted in previous years. For example, the seamless enrollment rate for cohort 2024 was 58% when initially calculated. In the current year's data return, that number rose to 59%, presumably due to more data reported to the National Student Clearinghouse in the intervening year. Percentages are rounded to the nearest whole number.

Atlanta Public Schools Seamless Enrollment among On-Time High School Graduates by Cohort

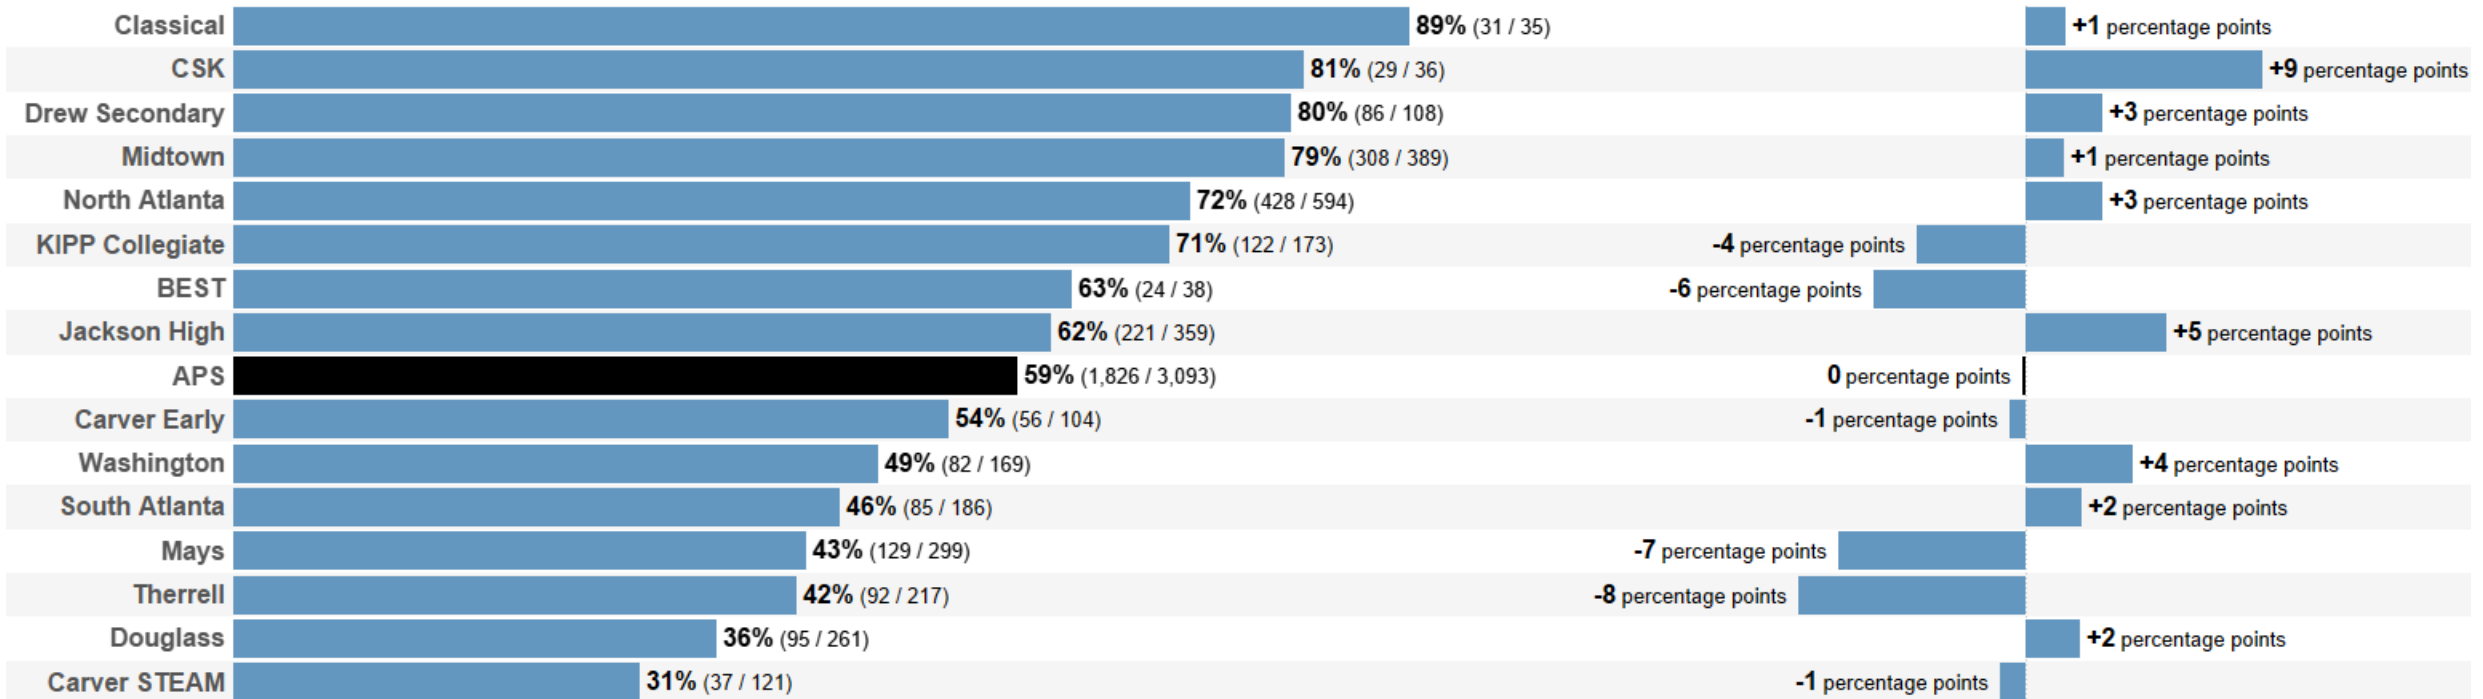

Seamless post-secondary enrollment rates vary by high school

In 2025, there were substantial differences across high schools in seamless postsecondary enrollment rates. Nine schools improved compared to last year. Atlanta Classical had the highest seamless enrollment rate (89%), followed by Corretta Scott King Young Women’s Leadership Academy (CSK) (81%), Drew Secondary (80%), and Midtown (79%). The schools with the highest year over year percentage point (pp) increase were CSK (+9 pp), Maynard Jackson (+5 pp), and Booker T. Washington (+4 pp), while the greatest decreases were found at Therrell (-8 pp), Mays (-7 pp), and BEST (-6 pp).

Seamless Enrollment by High School, Cohort 2025

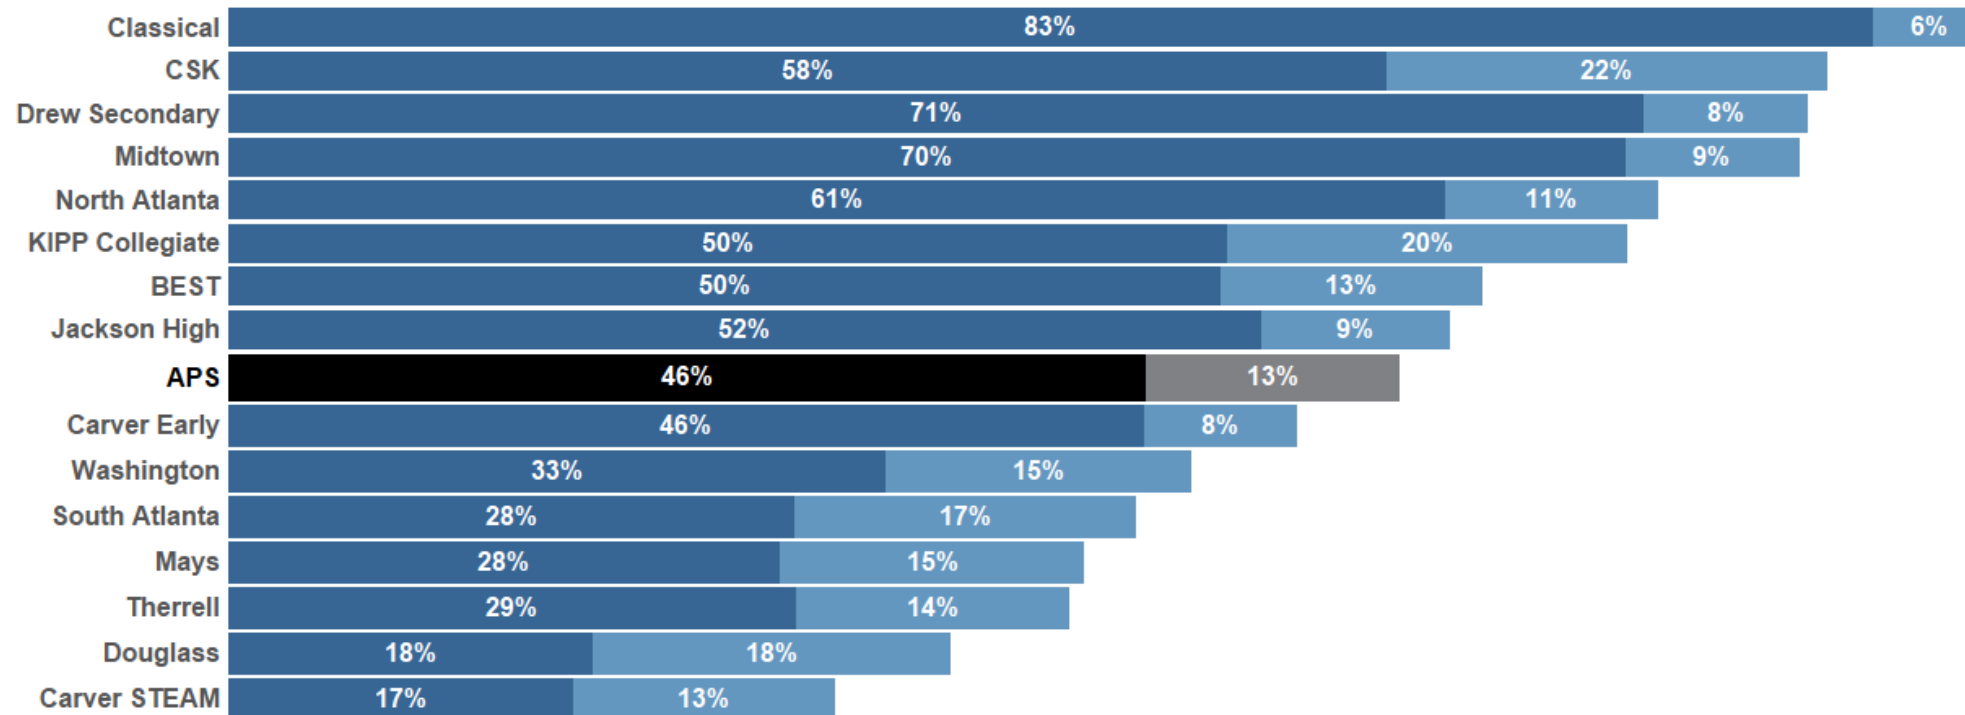

Difference from Cohort 2024

The majority of seamlessly enrolling graduates went to four-year colleges

Districtwide, about 14% of cohort 2024 graduates enrolled at institutions that predominantly grant 2-year degrees, compared to 44% enrolling at institutions that predominantly grant 4-year degrees. The proportion of graduates enrolling in 2-year institutions varies widely by high school. Classical had the highest proportion of its cohort 2024 on-time graduates that seamlessly enrolled in 4-year institutions. KIPP Collegiate had the highest proportion of on-time graduates that seamlessly enrolled in 2-year institutions.

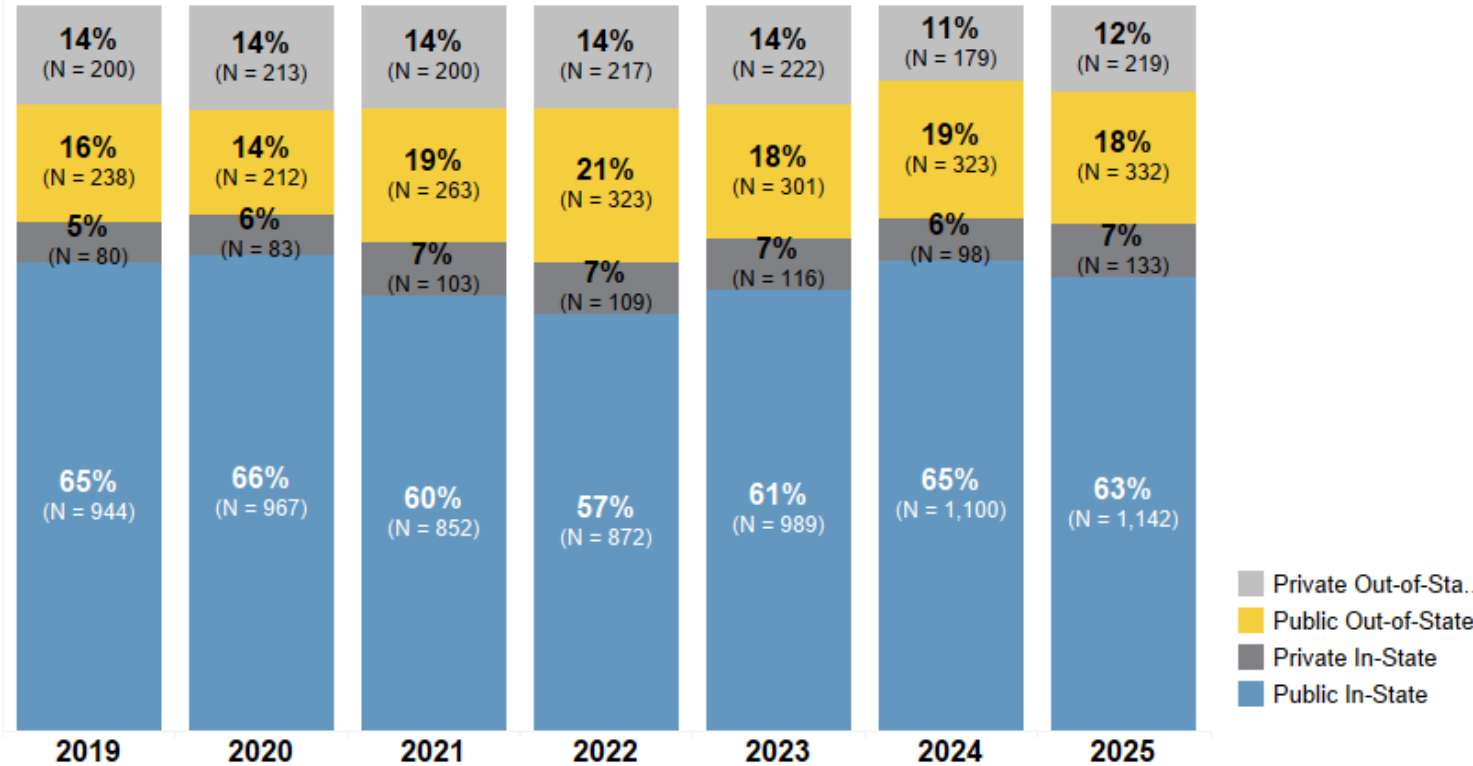

Seamless Enrollment by High School and Institution Type, Cohort 2024

The majority of seamless enrollees attend public institutions within Georgia

More than half of all seamless college enrollees from APS consistently enrolled within in-state public institutions and increased 4 percentage points with cohort 2024. The percentage of students enrolling at private out-of-state institutions dropped to a low of 9%, while private-instate and public out-of-state changed very little. More cohort 2024 students attended Georgia State University than any other institution.

Seamless Enrollment by In/Out of State and Public/Private, Cohorts 2019–2025

Post-secondary enrollment rates vary across student racial/ethnic groups

Cohort 2025 enrolled at similar rates as cohort 2023 within racial groups, but enrollment disparities between racial groups continue. Although the rate has been recovering gradually since 2021, Black students have seen the greatest drop in seamless enrollment rates since a 2018 high of 60%.

Seamless Enrollment by Subgroup, Cohorts 2018–2024

Seamless Enrollment by Subgroup, Cohort 2024

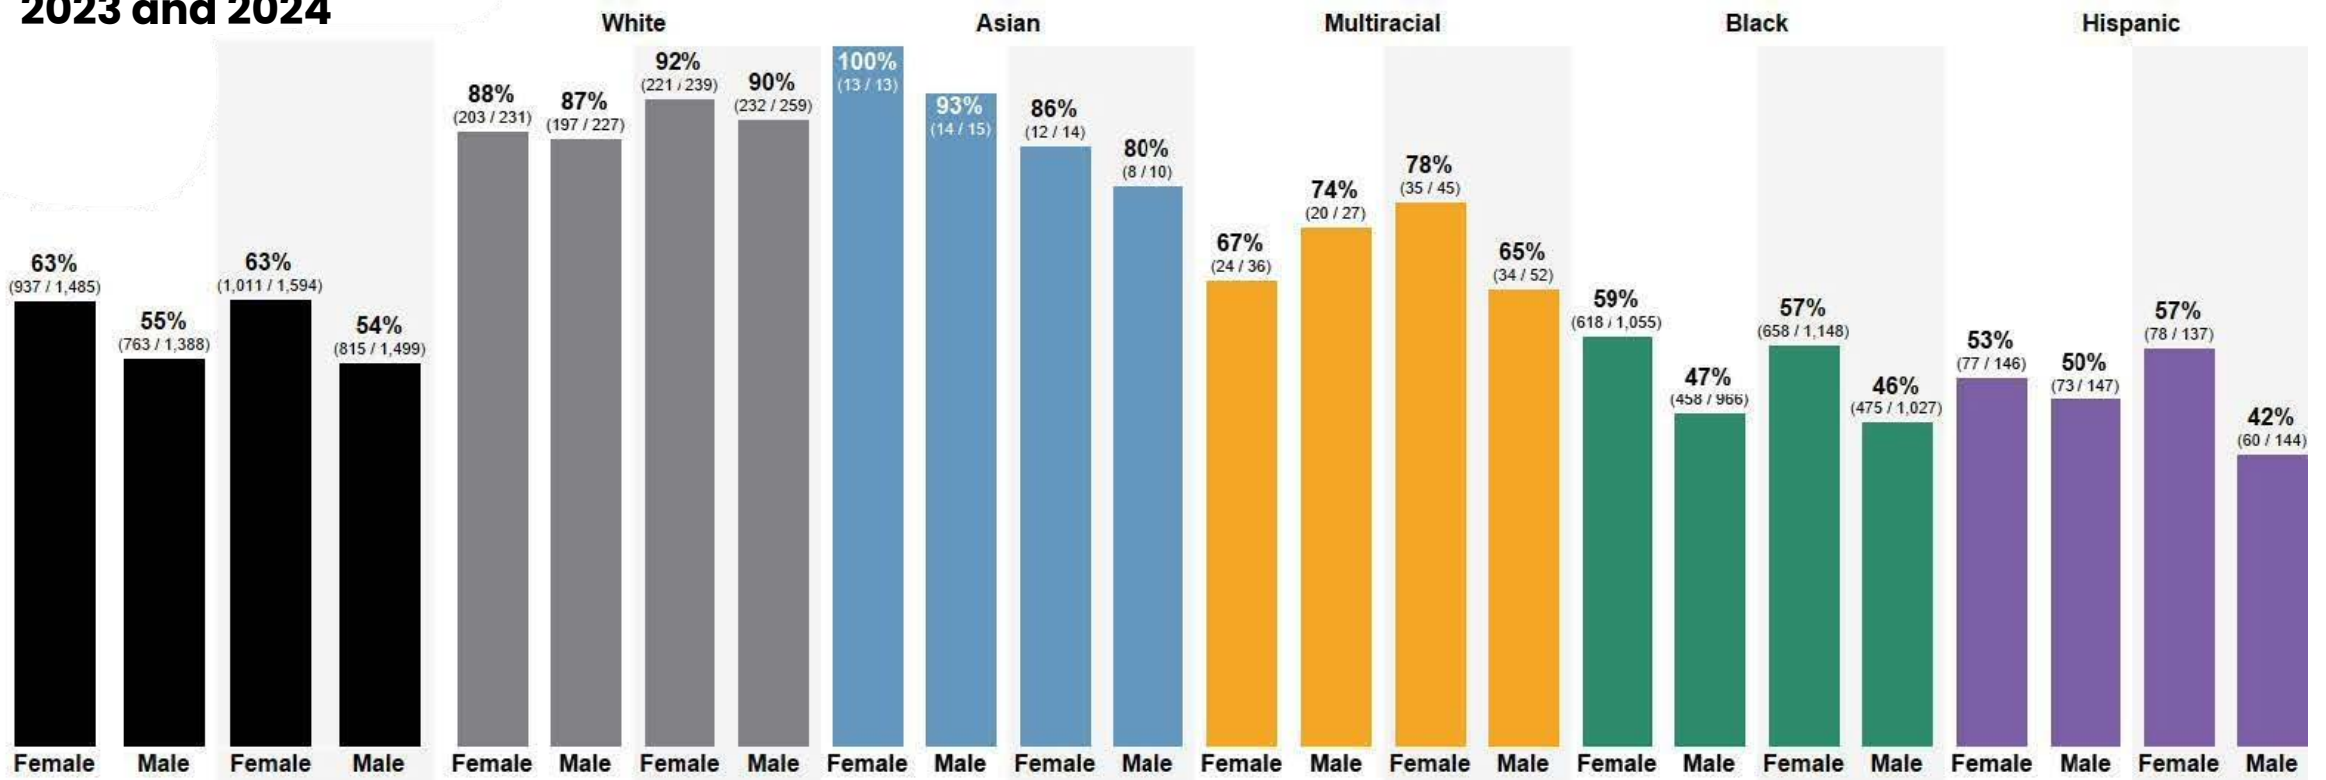

Post-secondary enrollment rates vary by gender and within racial/ethnic groups

A higher percentage of female cohort 2024 students seamlessly enrolled in postsecondary institutions than male students, with 61% of on-time female graduates seamlessly enrolling compared to 54% of on-time male graduates. The gender gap is smaller than in previous years (not shown), however; although the difference is greatest among Black on-time graduates, the Black male enrollment rate increased by 5 percentage points and the Black female enrollment rate decreased by 2 percentage points.

Seamless Enrollment by Gender, Cohorts 2023 and 2024

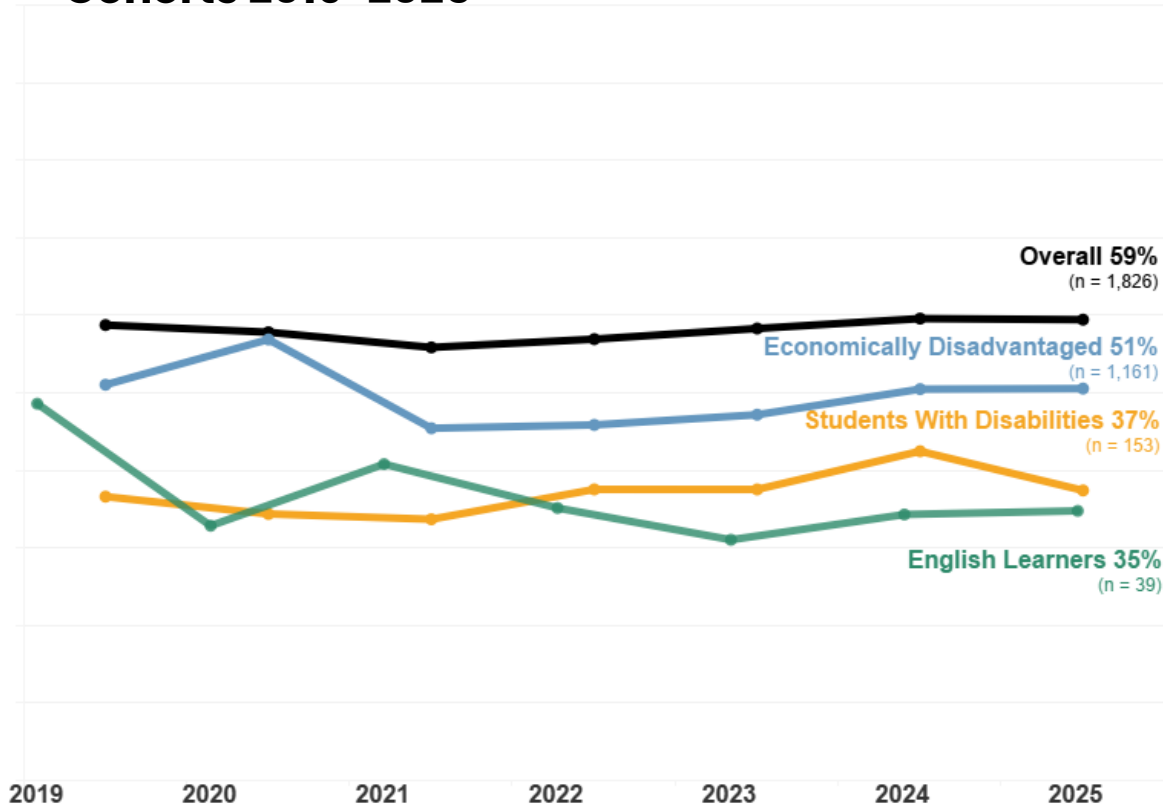

Seamless Enrollment by Race/Ethnicity and Gender, Cohorts 2023 and 2024

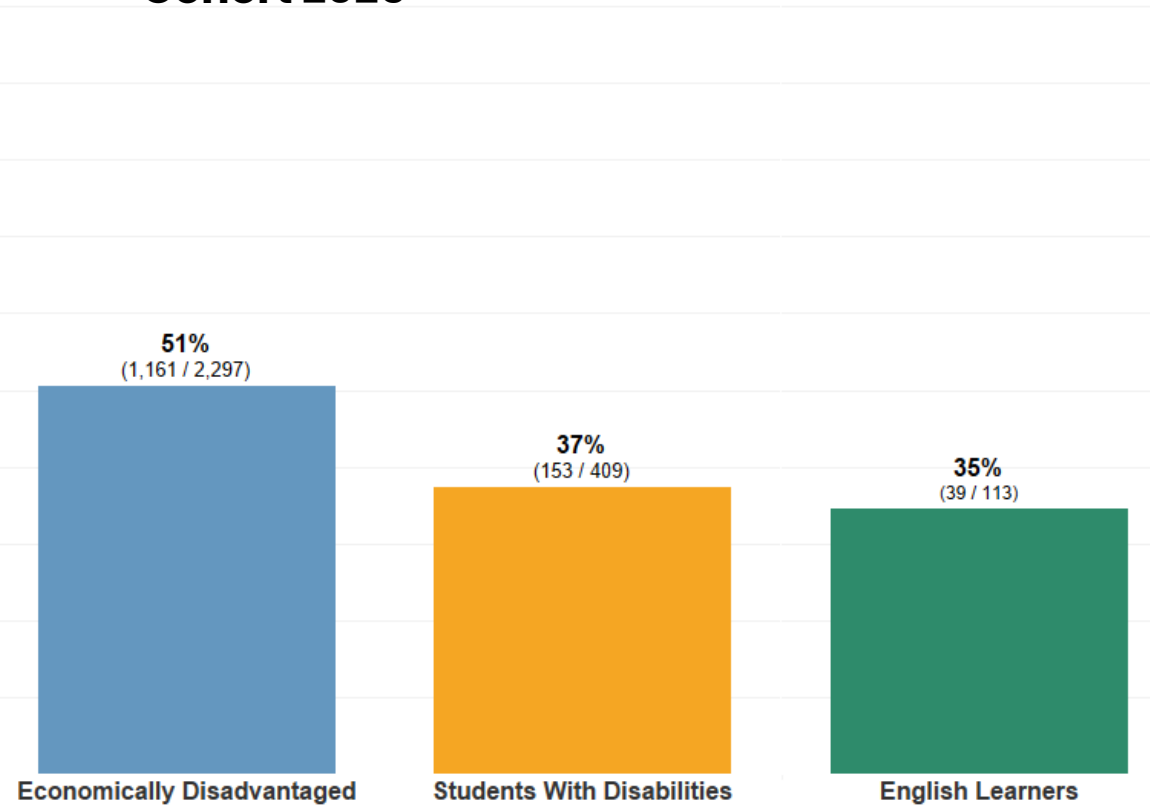

Postsecondary enrollment rates among certain subgroups have increased

Economically Disadvantaged students, Students with Disabilities, and English Learners have seamlessly enrolled at lower rates than the district overall, with low points in 2020 or 2021. Enrollment among economically disadvantaged students has increased gradually since 2021 to 50% in 2024 but remains below pre-2021 highs. The seamless enrollment rate among Students with Disabilities saw a 6-year high of 42% in 2024 after three years of steady increases. English Learners are a smaller subgroup and saw an increase in 2024 over 2023.

Seamless Enrollment by Subgroup, Cohorts 2019–2025

Seamless Enrollment by Subgroup, Cohort 2025

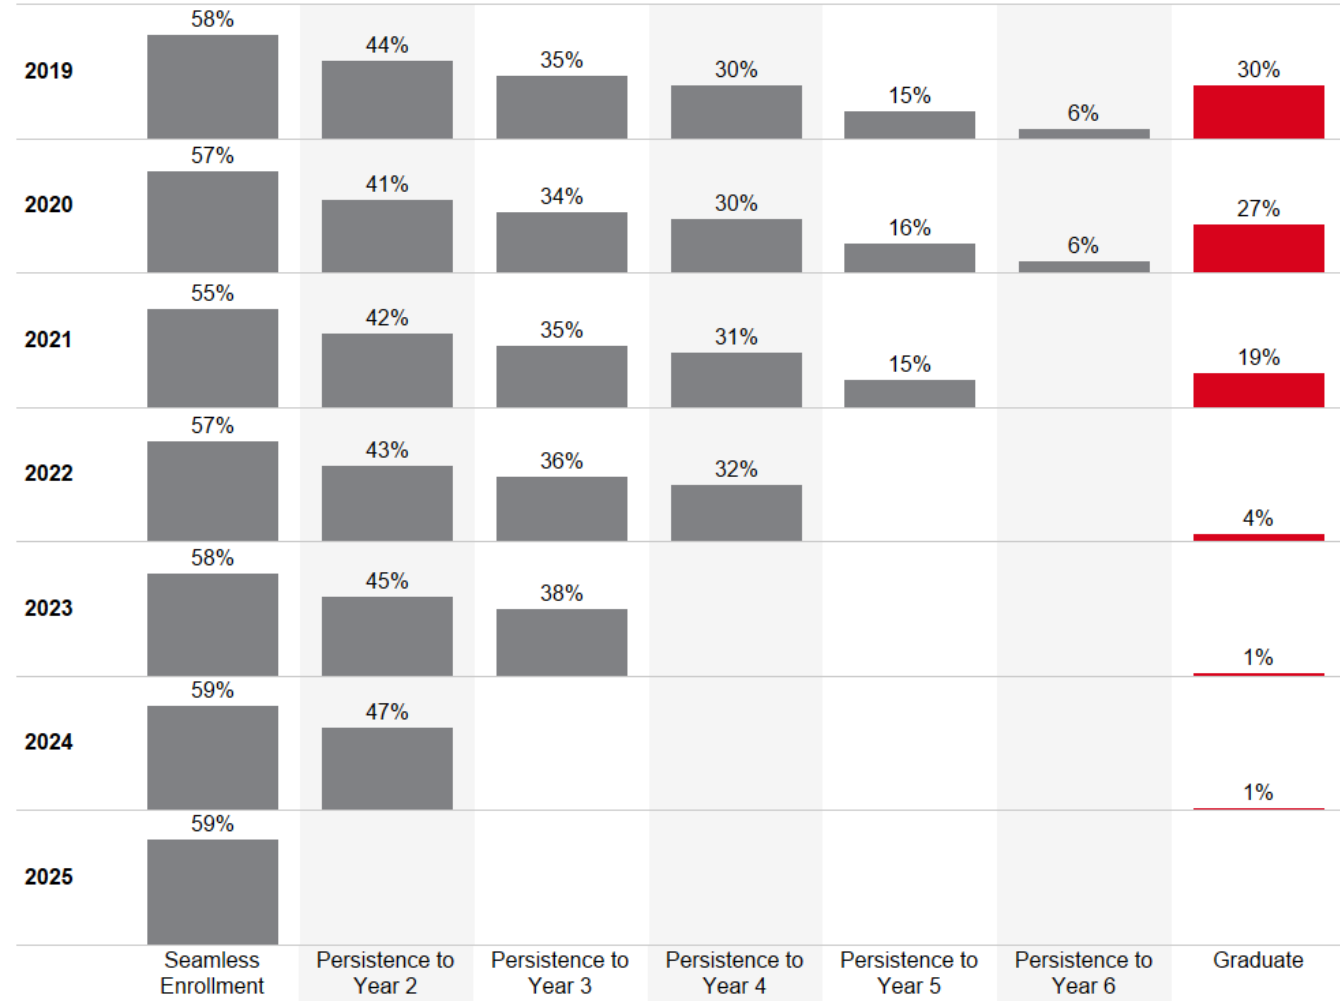

Seamless enrollment remained constant from 2023 to 2024

Among on-time high school graduates, seamless enrollment is the percentage of on-time graduates who were enrolled in a post-secondary institution on October 1 following their graduation date. Persistence to Year 2 is the percentage of on-time graduates who were enrolled on October 1 in two consecutive years at any institution, Persistence to Year Three is the percentage who were enrolled on October 1 in three consecutive years, and so on. Graduates, which represent students earning a credential, are also counted in persistence percentages.

For example, for cohort 2019, 58% of on-time graduates were enrolled in a post-secondary institution on October 1, 2019; 44% were also enrolled on October 1, 2020; and 30% of high school graduates who persisted earned a credential by October 1, 2025.

Seamless Enrollment and Persistence among On-Time Graduates,

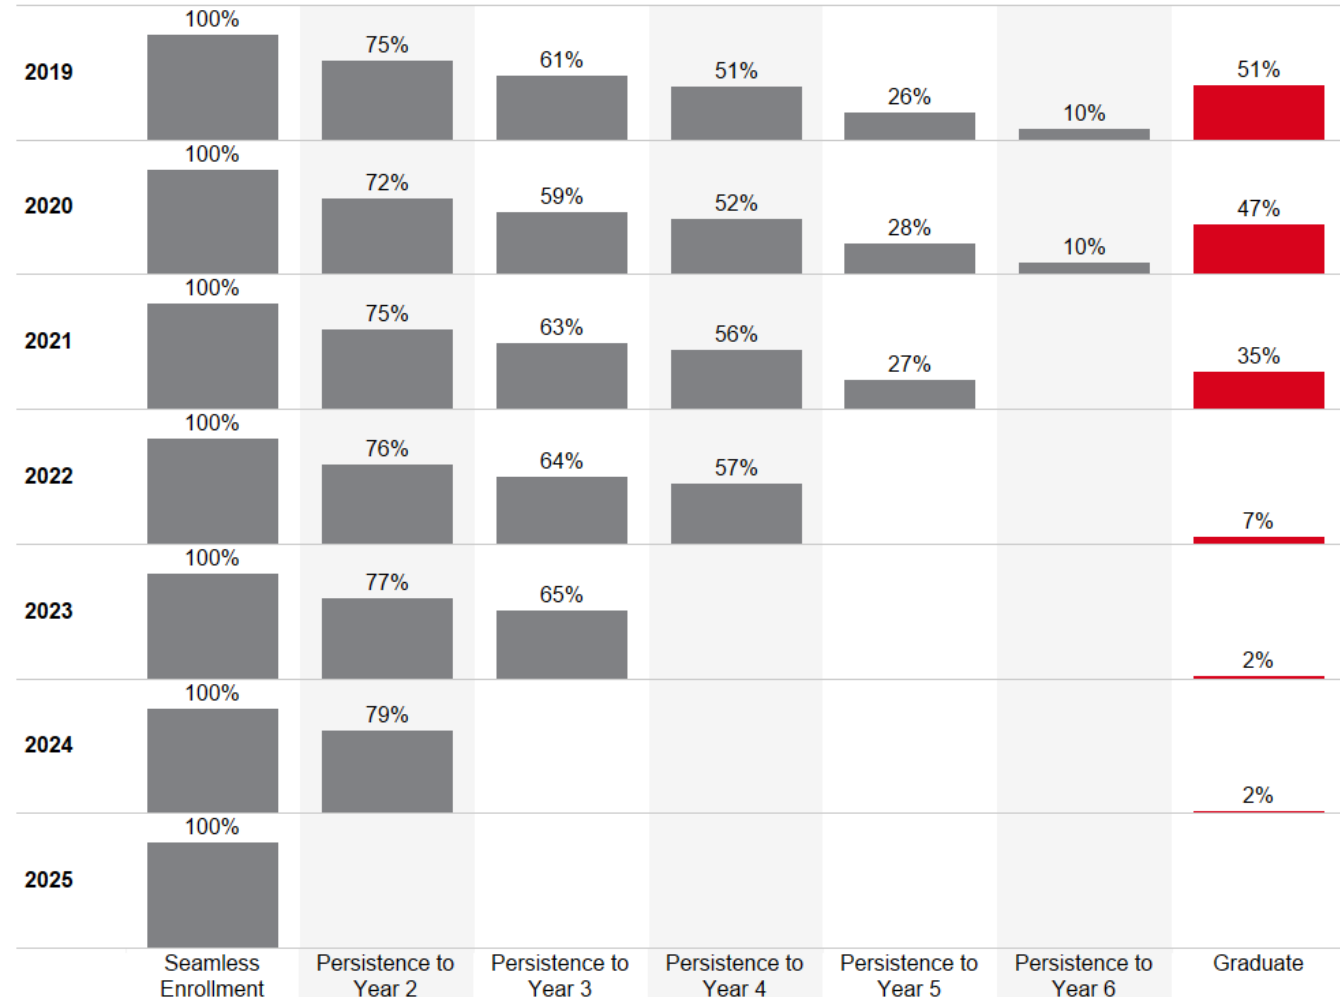

Seamless enrollment remained constant from 2024 to 2025

National measures of persistence and college graduation rates typically consider the percentage of enrollees, rather than graduates who persist and graduate. Of APS on-time graduates who seamlessly enrolled in college, about 79% of cohort 2024 persisted to year 2, representing a 2 pp increase over cohort 2023 and a 4 pp increase over cohort 2019.

Cohort 2019 graduates have had six complete school years to earn a post-secondary credential. In this graph, again, the percentage of students who persisted and graduated only includes students who seamlessly enrolled. Students may count in both persistence and graduate figures. Nationally, the 6-year post-secondary graduation rate, meaning students who earned a degree or credential, for students who entered college in the fall of 2017 was 61.1% per [National Student Clearinghouse](#).

Seamless Enrollment and Persistence among On-Time Graduates, Cohorts 2019 - 2025

Many students enroll at institutions with low institution graduation rates

Post-Secondary Graduation Rate by First Institution

First Enrolled Institution	Predominant Degree Type	APS Cohort 2019 Students	APS Grad Rate, Any Institution	APS Grad Rate, Same Institution	Institution Grad Rate

ATLANTA TECHNICAL COLLEGE	2-year	22	64%	59%	38%
TENNESSEE STATE UNIVERSITY	4-year	18	33%	22%	33%
CLAYTON STATE UNIVERSITY	4-year	16	38%	13%	35%
TUSKEGEE UNIVERSITY	4-year	16	50%	38%	62%

Note: some institutions, such as Atlanta Metropolitan State College and Albany State University, also offer 4-year degrees, but predominantly awarded 2-year degrees in 2018-2019 based on the College Scorecard.

This table shows institutional and APS graduation rates for schools that enrolled at least 15 APS on-time graduates from cohort 2018 (i.e., students have had 6 years to graduate). APS students who attend postsecondary institutions with low graduation rates may require additional supports to be successful. Nationally, the graduation rate for public 2-year colleges is lower than private and public 4-year colleges according to the [National Student Clearinghouse](#).

- **APS Grade Rate, Any** includes cohort 2018 students who earned a degree/certificate from any institution, which may be different from their first enrolled institution, within six years.
- **APS Grade Rate, Same Institution** includes cohort 2018 students who earned a degree/certificate from the same institution at which they were first enrolled within six years.
- **Institution Grad Rate** comes from the Department of Education's [College Scorecard](#) and is the percentage of students who enrolled in the fall as first-time, full-time students and completed within 150 percent of the expected time: 3 years for 2-year colleges, 6 years for 4-year colleges. This is not directly comparable to the APS Grad Rates, which allow six years for all institution types.

District Summary

APS College Enrollment and Persistence

The percent of on-time APS graduates seamlessly enrolling and persisting in college. The Graduate column shows the percent of high school graduates who have earned a college (2- or 4-year) degree or certificate. Students may count in both persistence and college graduation figures.
