CLASSROOM DIGITAL MONITORING CQ(R2)

Keller ISD provides students with access to digital devices to enhance instruction, support curriculum standards, and promote responsible digital citizenship. The purpose of this administrative regulation is to establish clear expectations for the instructional use of student devices and to ensure appropriate supervision of student digital activity during instructional time through the use of district-adopted digital monitoring systems.

Instructional Use of Student Devices

Student digital devices shall be used solely for instructional purposes aligned to district curriculum, instructional objectives, and approved digital resources.

When devices are in use during class, teachers are responsible for ensuring that student activity remains focused on the assigned instructional task. Devices shall not be used for entertainment, reward, free time, or other non-instructional purposes during instructional time unless specifically approved by campus administration or incorporated into an instructional activity aligned to the curriculum.

When devices are not being used for instruction, students shall store devices as directed by the teacher or campus procedures, including placement in backpacks or designated classroom storage areas.

Digital Monitoring Expectations

When students are using district-issued devices during instruction, teachers are required to actively monitor student digital activity using the district-adopted digital monitoring platform, including Apple Classroom and/or Lightspeed.

Apple Classroom and Lightspeed are the official digital monitoring platforms adopted by Keller ISD for supervising student online activity during classroom instruction. Teachers are assigned students through the district's student information system. Staff will be provided access to the monitoring platform and are expected to utilize the system whenever students are actively engaged on digital devices during instructional time.

Teachers shall adhere to the following expectations:

- Actively monitor student screens during instructional device use;
- Address off-task, inappropriate, or unauthorized digital behavior in a timely manner;
- Reinforce responsible digital citizenship and appropriate technology use;
- Utilize digital monitoring tools as supervisory and instructional support resources rather than as disciplinary or evaluative instruments; and
- Follow district procedures regarding student privacy, confidentiality, and acceptable technology use.

Students are expected to:

- Adhere to the Acceptable Use Policy (AUP);
- Use district-issued devices in accordance with classroom instructions and the Keller ISD Acceptable Use Policy;

CLASSROOM DIGITAL MONITORING CQ(R2)

- Remain on assigned instructional tasks while using digital devices;
- Comply with teacher directions related to device use and digital monitoring; and
- Refrain from accessing unauthorized websites, applications, games, messaging platforms, or other non-instructional content during class.

Misuse of digital devices will result in disciplinary consequences in accordance with the Student Code of Conduct, campus procedures, and applicable district policies.
