AP Statistics – Summer 2026

Hello, 2026-2027 AP Statistics Student (and Parent/Guardian),

Congratulations on deciding to take the most applicable math class you have ever taken! It will be different than any other math course you have taken in high school.

There is no resource on this planet more valuable than data and through your experiences in AP Statistics, you will learn how to consume and analyze different types of this data. Our course includes four major themes: exploring data; planning a study; anticipating patterns; and producing models using probability, simulation, and statistical inference while extensively using technology. The AP Statistics course will best prepare you for the knowledge of statistical analysis required by most fields of study in college.

Over the summer, you should complete this Google Form:

<https://tinyurl.com/MHSAPStat> The assignment is due Friday, September 4th.

Have a great summer!

Mr. Doris & Mr. Larson
