Standards-based Grading

New Report Cards

In this week's folder, you should find Coloma Community Schools new **standards-based grading** report cards. In December and January, Superintendent Dave Ehlers updated parents and guardians of the changes that are coming.

These report cards reflect the shift in reading and writing to our standards-based grading. Students will now receive a score of 1, 2, 3, on the report for specific standards instead of the typical letter grade that you may be used to.

To learn more about standards-based grading, see a video explainer, and look at the samples of the report cards for each grade level, please visit us at bit.ly/sbg-ccs or scan the QR code on the right.

If you have any questions, please contact your building principal or email info@ccs.coloma.org.
