

Wall Intermediate School

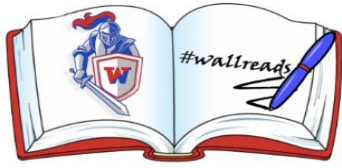

Summer Reading

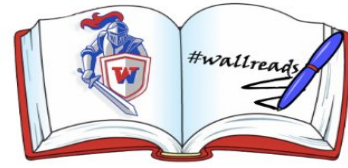

6th-grade ELA students can choose from the following project options after reading the book of their choice:

1. **Written Response:** Write a brief, structured response that illustrates how a character evolves throughout the story. Include evidence from the text, describe the character's traits, ensure your response is well-organized, and proofread for grammar and spelling errors.
2. **Video Recording:** Produce a video where you summarize the book you selected. In your recording, provide detailed insights into the setting, characters, plot, and theme. Make sure you appear on camera and have a typed copy of your script for submission, along with the video recording.
3. **Google Slideshow:** Design a Google Slideshow that summarizes the book you read. Your presentation should thoroughly cover the setting, characters, plot, and theme. Your final product must include the following elements:
 - a. Introduction Page – Clearly display the book's title and author.
 - b. Quote or Detail – Include at least one important quote or specific detail from the book.
 - c. Visual Element – Add an image, illustration, or graphic that represents the book's content or your personal response to it.
 - d. Summary or Analysis – Write a brief summary of the book in your own words or analyze its main points.
 - e. Personal Response – Share your thoughts, reactions, or questions about the book.

All projects are due on the first day of class. Teachers will set up an assignment in Google Classroom for project submissions, and students must submit their work by this deadline. No projects will be accepted after the first day of class. Furthermore, students will need to submit their projects to TurnItIn, a tool that verifies authenticity and checks for plagiarism. Any project that contains plagiarism or AI-generated content will not receive
