Instructional Technology Plan - 2026-2029 Instructional Technology Plan**V. NYSED Initiatives Alignment**

Page Last Modified: 04/14/2026

V. NYSED Initiatives Alignment

1. How will the district's use of instructional technology support a comprehensive and sustained effort to improve student performance and academic standards, while also addressing the need to provide equitable learning opportunities "everywhere, all the time" (National Technology Plan)?

Technology is intentionally integrated into teaching and learning to enhance instruction, personalize student experiences, and expand access beyond the traditional classroom. Technology is embedded across all grade levels and content areas as a tool to support high-quality instruction aligned to academic standards. Teachers utilize digital platforms, adaptive learning tools, and interactive resources to differentiate instruction, provide real-time feedback, and promote student engagement. Learning management systems and digital collaboration tools allow for seamless communication, assignment distribution, and access to instructional materials both in school and remotely. The district supports teachers in leveraging technology to enhance instructional practice through ongoing professional development, coaching, and data-informed decision-making.

Students use technology as an active tool to demonstrate their understanding of skills and concepts in a variety of ways. Digital tools enable students to create presentations, produce multimedia projects, collaborate with peers, and engage in problem-solving tasks that reflect real-world applications. These opportunities support deeper learning, critical thinking, and the development of digital literacy skills necessary for college and career readiness.

To ensure equitable access and participation, the district leverages technology to provide multiple pathways for learning. This includes the use of assistive technologies, closed captioning, translation tools, and adaptive software to support diverse learners, including students with disabilities and multilingual learners. Instructional resources are accessible across devices and platforms, allowing students to engage in learning regardless of time or location.

In the long term, the district will continue to invest in infrastructure upgrades, cybersecurity, and scalable systems that support innovation. Building human capacity remains a priority through sustained professional learning, instructional coaching, and the development of teacher leaders.

2. **At the start of the 2026-27 school year, will the district offer full-time virtual instruction to any students? (Select all that apply)**

- ☐ Yes. Our district operates a full-time virtual instruction program.
- ☐ Yes. One or more of our students will attend a program operated by a BOCES or another public school district.
- ☒ None of our students will participate in a full-time virtual instruction program.
- ☐ Other

3. If the district files or has filed a Smart Schools Investment Plan (SSIP) to apply for Smart Schools Bond Act funds, all responses in this survey align with the district's response to any related question(s) in the SSIP.

The district does not have an active SSIP.
