Reading Corps Math Tutor

Math multiplies students' future opportunities. Join our team at Eden Valley-Watkins as a Math Tutor, and you can support students as they build essential math skills.

Math Tutors serve during the school day and meet with small groups of students in grades K-3 or 4-8 to help strengthen their skills and confidence. With training and support from an onsite coach, you'll be using proven activities that help students improve in math. No matter your math ability, you can make a great tutor.

This is a paid AmeriCorps member position with Math Corps. No teaching experience is required! All you need is a desire to help kids succeed. By giving your time as a tutor, you can make an incredible impact and help more students become successful learners!

Tutor Perks

- A paycheck every two weeks
- Additional money for college tuition or student loans. Tutors aged 55 and older may gift this to their child, grandchild, stepchild, step-grandchild, or foster child
- Federal student loan forbearance and interest repayment
- Child care assistance – based on family size and income
- Predictable schedule – daytime hours with no evenings or weekends
- Time off over most school release days and holidays
