AP Willits Gym HVAC	 2 months	June 29 → August 2026

# PropelNY

**The Applicant (PropelNY) has filed a Joint Proposal for public comment and potential approval.**

The Administrative Law Judges overseeing the process have allowed the parties to request additional discovery; and we have requested additional information concerning the proposed project.

**We filed our opposition to the “Joint Proposal” (JP) today. Several major points include:**

- Concerns that “unrestricted access” to our buildings is defined as “in under 15 minutes” which is unacceptable for emergency vehicles.
- The proposal contains more protections (for noise, dust, and runoff) for protected animal species than for children. Those priorities are wrong.
- In its current form, construction could impact traffic with dramatic effects to arrival & dismissal operations District-wide.
- The JP promises to comply with 30+ year-old electro-magnetic radiation guidelines without any apparent analysis of whether those are sufficiently protective of human health and safety.
