		The homeowner will provide and complete the trenching from the gas meter to the pool heater location at an approximate depth of 18"--24". FVP will supply and install approved underground gas piping along with new 1" gas risers at both ends of the run. All underground gas piping will be installed in accordance with applicable fuel gas codes and manufacturer specifications. The new gas line will be pressure tested and prepared for required inspection approval prior to being placed into service. Once inspection has been completed and approved, the existing gas main will be modified and tied into the new underground gas riser. A properly sized gas regulator and accessible gas shut-off valve will be installed at the pool heater connection. FVP will also supply and install an additional regulator to properly feed and protect the boiler system from elevated 2 PSI gas pressure. Upon completion, all connected gas appliances will be tested for proper operation, gas pressure, and safe performance. All work will be demonstrated and reviewed with the homeowner prior to departure.						Applicant	Brian Jones, Address:121 Rainbow Road, Phone:(860) 924-4770

	11 MIDDLEFIELD DRIVE, WEST HARTFORD, CT 06107 3581 1 11 0001	PRDK202602768	\$10,000.00	Addition	Deck	R-Residential	05/22/2026	Contact Type	Contact Description
		We are building a 360 sq ft rectangular deck that spans from the two back doors (which face one another, 23' apart) and extends about 16' into the yard, covering the same footprint as an old stone patio. The deck will be ~1' off the ground, which is the current height of the step down from the main back door to the patio; in other words, when the deck is complete, we will be able to simply walk out the back door directly onto the deck. For the substructure, we are using a ledger board (connected to the house) and two rows of girders, at 8' and 16', with joists running perpendicular between the ledger/girders every foot. Each girder is anchored by 5 helical piers, at 0', 5.5', 11', 16.5', and 23', which were driven by hand to a minimum depth of 42". 		Proposed work consists of a full exterior siding replacement system on the main dwelling. Existing cedar wood shake siding will be removed and replaced with approximately 15.49 squares of new exterior siding. Work also includes replacement of house wrap/weather-resistant barrier, installation of new 1/2" rigid foam insulation board, replacement of damaged soffit and fascia sections, and aluminum trim wrapping around exterior window frames and trim as needed. All work will be performed in accordance with applicable Connecticut State Building Code requirements and manufacturer installation specifications. 		The proposed project consists of the demolition of an existing detached garage structure (circa 1941) and the construction of a new two-car detached garage with an accessory dwelling unit (ADU) above. The new structure will be situated within the footprint of the existing driveway on the property, at least 10 feet away from the neighbor's property. The ADU will contain one bedroom and will function as a self-contained residential unit. The project includes all associated site work, utility connections, and compliance with applicable West Hartford zoning regulations, setback requirements, and building codes.
