

AP Computer Science Principles - Summer Assignment 2026-27

Welcome to Computer Science Principles.

The summer assignment is to register at www.codecombat.com and complete the first map.

Start by navigating to codecombat.com and clicking Sign Up in the upper right corner and then selecting "I'm a Student". Class Codes will be given out eventually, but for now click the "Play Now" button.

Next, select Kithgard Dungeon and complete all the free levels (starting with Dungeons of Kithgard). The programming language should default to Python and the format should be Text Code. After beating the first level, you should create an account which will allow you to save your progress (use your Bergenfield email address). If the Google integration doesn't work, manually sign up using your Bergenfield address and creating a password.

CodeCombat will be the primary homework platform for the course. Familiarize yourself with the syntax and email me at wnociti@bergenfield.org if you have any questions or concerns.

Sincerely,

Mr. Nociti
