REFERENDUM PROJECT UPDATE

JUNE 2026

Construction Season Begins!

The School District of Washburn is excited to share that construction and renovation projects are now officially underway. Made possible by the community's support of the November 2024 referendum, these much-anticipated updates will bring significant improvements to the middle and high school.

The project will focus on addressing critical infrastructure, including HVAC, plumbing and electrical systems. Construction crews will be on-site for the next 16-18 months.

We are grateful to our community for making these important investments in the future of our schools possible and look forward to sharing progress along the way.
