

Safe schools are critical to creating a learning environment in which students can succeed. Staff and students share the responsibility for taking reasonable precautions and following established safety measures to create and maintain safe schools. The following safety measures must be implemented at each school.

A. SUPERVISION OF STUDENTS

Students must be reasonably supervised while in the care and custody of the school system. This supervision must occur throughout school hours, including during class, between classes, on the playground, and during recess or lunch periods; during authorized school field trips; and on school buses. Reasonable precautions should be taken to protect the safety of students on school grounds and on buses before, during, and after school.

Students who are subject to policy 4260, Student Sex Offenders, and are receiving educational services on school property must be supervised by school personnel at all times.

B. SUPERVISION OF VISITORS

School administrators shall strictly enforce policies 5010, School Volunteers, and 5020, Visitors to the Schools.

C. SAFETY OF SCHOOL BUILDINGS AND GROUNDS

The board recognizes its duty to provide each of its employees with a workplace free from recognized hazards that are causing or are likely to cause death or serious physical harm.

The superintendent and each principal shall comply with all duties set out for their respective positions in G.S. 115C-288(d) and G.S. 115C-525 to minimize fire hazards. The principal is required to inspect school buildings, playgrounds, and equipment for health, fire, and safety hazards on a regular basis, as required by law, and to notify the superintendent immediately of unsanitary conditions or repairs needed to meet safety standards.

Any employee who observes any potential hazards must notify the principal or the employee's supervisor immediately.

All warning systems must meet building and equipment codes required by law and must be properly maintained. When necessary, proper signs indicating potential hazards or recommended safety precautions must be posted.

D. ESTABLISHING PROCESSES TO ADDRESS POTENTIAL SAFETY CONCERNS AND EMERGENCIES

1. Responding to Student Altercations and Other Threats to Safety

All school system employees have a duty to be alert at all times to situations that may pose a threat to the safety of students, employees, or visitors on school property, at school events, or in other situations in which the students are under the authority of school employees. Even an employee who does not have responsibility for supervising students is expected to make an immediate report if the employee observes or has reason to suspect that a situation poses a threat to safety and no administrator, teacher, or other supervisory employee is present and aware of the potential threat.

Teachers, teacher assistants, coaches, and other employees with responsibility for supervising students will use appropriate student behavior management techniques to maintain order and discipline on school property, at school events, and anywhere that students are under the employees' authority. Such employees must enforce the Code of Student Conduct and address student behavior in accordance with the school plan for management of student behavior (see policy 4302, School Plan for Management of Student Behavior).

When employees with responsibility for supervising students have personal knowledge or actual notice of a student altercation or other situation that poses an immediate threat to safety, they shall use their professional judgment to determine how best to address the situation to protect the safety of everyone in the vicinity. Emergency procedures identified in a student's Behavior Intervention Plan shall be followed to the maximum extent possible under the circumstances. For minor threats or altercations or altercations involving young children, the employee shall intervene directly to end the fight or address the safety threat if the employee can do so safely. An employee who encounters a situation that cannot be managed safely and effectively by that employee immediately shall request assistance from other employees or administrative staff and shall take steps to remove bystanders from the area. Only the degree of force or physical control reasonably necessary shall be used to re-establish a safe environment.

Employees should take further action as appropriate in accordance with any response protocols established by the principal or superintendent. All employees are responsible for knowing and following such protocols to the fullest extent reasonable under the circumstances at the time.

2. School Rules

The principal or designee shall develop rules to help prevent accidents in school buildings, on school buses, and on school grounds.

3. Training

Staff training must include detailed instruction on how to respond to a variety of emergency situations. Staff should also be able to recognize and respond to behavior, information, and related indicators that warn of impending problems. In addition, middle and high school employees must receive adequate training on the operation of the school's anonymous safety tip line.

School personnel must teach and review with students (1) safety procedures, including fire safety procedures; (2) precautions for handling chemicals or potentially dangerous equipment; and (3) appropriate responses to threats to school safety. Middle and high school students must also be informed of the anonymous safety tip line and its purpose and function.

Training must be provided annually for all school system stakeholders (including staff, students, parents, coaches, volunteers, and community members) on how to recognize, and how and when to report, threats to the school population or community.

4. Safety Equipment

School employees shall provide students and visitors with safety equipment as required by law and shall enforce school rules pertaining to wearing safety equipment. School employees shall wear and use appropriate safety equipment as required for the safe performance of their specific job assignments.

5. Planning for Emergencies and Conducting Fire Drills and Other Emergency Drills

The board, in coordination with local law enforcement and emergency management agencies, will adopt a school risk management plan relating to incidents of school violence for each school in the school system. The superintendent must provide the Department of Public Safety's Division of Emergency Management (Division) with emergency response information it requests for the school risk management plan and updated emergency response information when such updates are made. The superintendent must also provide the Division and local law enforcement with schematic diagrams, including digital schematic diagrams, of all school facilities and updates of the schematic diagrams when the school system makes substantial facility modifications, such as the addition of new facilities or modifications to doors or windows. Schematic diagrams must meet any standards established by the Department of Public Instruction for the preparation and content of the diagrams. In addition, the superintendent shall provide local law enforcement with (1) either keys to the main entrance of all school buildings or emergency access to key storage devices for all school buildings and (2) updated access to school buildings when changes are made to the locks of the main entrances or to the key storage devices.

At least one school-wide tabletop exercise and drill that meets the requirements of state law and is based on the procedures documented in the school risk management plan will be held annually at each school. Principals shall also conduct fire drills as required by law.

6. Reporting Risks to the School Population

Students should notify any staff member of any acts of violence, harassment, or bullying or any other unusual or suspicious behavior that may endanger safety. Middle and high school students may also use the anonymous safety tip line to report any risks to the school population or buildings. Ongoing student education efforts will aim at minimizing any fear, peer pressure, embarrassment, or other impediments to students reporting potential problems.

Maintaining a safe school environment that is conducive to learning requires staff to be proactive in dealing with violence, harassment, and bullying. Staff members must report immediately to the principal any information regarding unusual or suspicious behavior or acts of violence, harassment, or bullying.

School officials shall investigate and act upon any report of such behavior, including, when appropriate, referring reports to the school threat assessment team and reporting criminal activities to law enforcement, the State Board, the State Superintendent of Public Instruction, and the superintendent or designee (see policies 1710/4023/7230, Discrimination and Harassment Prohibited by Federal Law, 1725/4035/7236, Title IX Sex Discrimination – Prohibited Conduct and Grievance Procedures, 4375/7310, Staff-Student Relations, 4329/7311, Bullying and Harassing Behavior Prohibited, and 4335, Criminal Behavior).

7. Potential Threats of Registered Sex Offenders

The principal of each school shall register with the North Carolina Sex Offender and Public Protection Registry to receive e-mail notification when a registered sex offender moves within a one-mile radius of the school.

8. Student Behavior Standards

Students are expected to meet behavior standards set forth in board policies.

E. THREAT ASSESSMENT TEAMS

In accordance with G.S. 115C-105.65, the superintendent shall establish a multidisciplinary threat assessment team for each school within the school system to identify, assess, and manage behavior of students or others who may pose a risk of violence or harm to self or others. The threat assessment teams will include, but are not limited to, individuals with expertise in counseling, instruction, school administration, and law enforcement. When practicable, at least one school psychologist, one staff member

knowledgeable about and experienced in working with students with special needs, and one staff member knowledgeable about and experienced in working with students with disabilities will be assigned to each threat assessment team. If a school psychologist is not available, a licensed mental health professional may be assigned instead. A member of each threat assessment team will operate as team leader with the responsibility to ensure adherence to the threat assessment process, ensure proper documentation of reports of threats and threat assessment activities, and facilitate collaborative team discussions to ensure various perspectives are considered.

The superintendent shall designate a school system administrator to oversee the school system's threat assessment program and to serve as liaison between the school system and the North Carolina Center for Safer Schools (CSS). The superintendent or designee shall also establish a committee composed of individuals with expertise in human resources, education, school administration, mental health, and law enforcement that will coordinate and monitor the threat assessment teams operating within the school system.

1. Training

All team members will receive behavioral threat assessment and management training annually prior to the start of the school year. Individuals who join the team in the middle of the school year must receive training within 60 calendar days of joining the team.

2. Assessment and Intervention

Unless the superintendent establishes a different classification system in the threat assessment protocols developed pursuant to subsection E.4 of this policy, threat assessment teams will use the levels of concern table listed in the behavioral threat assessment and management guidance issued by CSS in assessing the level of threat posed and forming a response to threats.

Upon determining that a student poses a threat, the threat assessment team will develop a written student support, intervention, and monitoring management plan that establishes interventions and specifies required monitoring times of the student based on the level of concern the student presents. To effectively manage and mitigate potential risk, interventions must focus on building resilience and protective factors for the student while also addressing safety concerns.

3. Information Sharing

Parents of a student or minor will be notified as soon as practicable that a threat assessment will be or is being conducted on their child. The threat assessment team will contact the parents and provide them the opportunity to participate in the threat assessment. The team is not required to extend the invitation to participate if the student or minor discloses abuse or neglect from the parent. Once a threat assessment is completed, the team will provide its findings and conclusions to the

parents, including any interventions the team is recommending be put in place for the well-being of their child and the school community and any school system or community resources that may be useful for the parents in seeking help for their child.

When the threat assessment team learns that an individual has threatened specific harm to an identifiable potential victim, the team will provide notice of the threat to the potential victim and, if the potential victim is a student or minor, provide notice to the parents.

Any information sharing by, with, or between members of the threat assessment teams will be done in accordance with the federal Family Educational Rights and Privacy Act (FERPA) and any other applicable state or federal law. (See policy 2125/7315, Confidential Information). Members of a threat assessment team who are not school system employees must sign a written agreement to adhere to the responsibilities and requirements of FERPA before having access to student records.

4. Threat Assessment Protocols

In consultation with CSS guidance and with established threat assessment teams within the school system, the superintendent shall develop, implement, and update threat assessment protocols and procedures that comply with the requirements of G.S. 115C-105.65. At a minimum, these protocols and procedures will delineate the roles and duties to be performed by designated threat assessment team members, the expertise and training of professionals who will serve on threat assessment teams, the steps to be followed in the threat assessment process, including the implementation of interventions, supports, and community services, the timeframe required to responsibly act upon reported concerns, and the engagement of school resource officers and/or law enforcement in the threat assessment process, and the process of documenting reports of threats and threat assessment activities. The protocols and procedures will differentiate between assessment and intervention at the elementary, middle, and high school levels, as appropriate.

The superintendent or designee shall send a copy of this policy and the threat assessment protocols and procedures to CSS when approved or revised. In addition, the superintendent shall ensure that quantitative data on the activities of all threat assessment teams is reported to CSS as required by G.S. 115C-105.65(h) and CSS guidance.
