

LET'S MAKE THIS SUMMER COUNT with Zearn

Zearn Math is an online math learning platform that your child uses during the school year. This platform is available to students until July 31. We would appreciate your support in encouraging your student to continue their math learning over the summer. Below are some key points to remember.

- Each lesson takes about 30 minutes to complete.
- Zearn is available online 24/7 through your student's school account.
- Current 6th grade students will begin with Mission 5 (Rational Number Arithmetic).
- It is recommended that students planning to take Math 7 Advanced finish Mission 5 (Rational Number Arithmetic) and Mission 6 (Expressions, Equations, and Inequalities) prior to August 1.

Please feel free to email Teresa Ellis-Stevenson at tellisstevens@bentonvillek12.org if you have any questions.

Thank you for your support!
