## EDUCATION

### Project 1: Teaching Methods Analysis

In this project, you will explore the field of education by analyzing different teaching methods and classroom practices. You will observe or review lessons to understand how teachers engage students, deliver content, and support learning. Using your analysis, you will identify effective strategies and trends in teaching.

#### Step 1: Observe or Analyze Lessons (4-5 hrs)

Observe or analyze **5-8 lessons** (in-person, recorded, or online lessons).

Record the following for each:

- Subject and grade level
- Lesson objective
- Teaching strategies used (lecture, discussion, group work, etc.)
- Student engagement (participation, interaction, etc.)
- Use of materials or technology

#### Step 2: Organize Your Data

- Create an observation chart or notes document
- Clearly display all lessons and their details
- Group or sort in a meaningful way (by subject, strategy, or grade level)

#### Step 3: Analyze Teaching Strategies

Identify patterns such as:

- Common instructional methods
- Strategies that increase engagement
- Use of technology in teaching
- Differences across subjects or grade levels

Answer:

- What teaching strategies are most effective?
- How do teachers engage students?
- What challenges do educators face?

#### Step 4: Make Recommendations

Based on your findings, answer:

- What should teachers do to improve student learning and engagement? Provide **2-3 specific, realistic suggestions** and explain them.

Examples might include:

- Incorporating interactive activities
- Using varied instructional strategies
- Integrating technology effectively

#### Final Deliverables (2 Completed Projects)

##### 1) Observation Notes (Required)

Clear notes or chart showing your 5-8 lesson observations

##### 2) Teaching Strategy Summary (Required)

Choose one format:

- 1-2 page written summary  
OR
- 10-12 slide presentation

Your summary must include:

- Overview of lessons analyzed
- Key teaching strategies
- Explanation of effective practices
- Your recommendations for improvement

## EDUCATION

### Project 2: Lesson Plan Creation

In this project, you will take on the role of a teacher by designing your own lesson plan. You will apply effective teaching strategies to create engaging and meaningful learning experiences for students.

#### Step 1: Choose a Topic and Audience

Select:

- Subject area
- Grade level
- Topic to teach

#### Step 2: Design Your Lesson Plan

Create 1–2 **lesson plans** that include:

- Learning objectives
- Materials needed
- Instructional activities
- Assessment method

#### Step 3: Apply Teaching Strategies

Incorporate:

- Engagement strategies
- Differentiation (support for different learners)
- Opportunities for student interaction

#### Step 4: Reflect on Your Lesson

Write a reflection that explains:

- Why you designed the lesson this way
- What strategies you used
- How it supports student learning

#### Final Deliverables (2 Completed Projects) ★

##### 1) Lessons Plans (Required)

1-2 complete lesson plans

##### 2) Reflection (Required)

A written explanation of your instructional choices and effectiveness

##### 3) Extension Activities (Optional)

- Teach your lesson to peers
- Create instructional materials (slides, worksheets)
- Observe additional classrooms for comparison
