

5th Grade Math MODIFIED

Summer Break Review

Name: _____

Due on the first day back to school.
This will count as the first test grade
of Marking Period 1.

Due: August 20, 2026

Dear 5th Grader in Training,

This summer math packet will help you practice the skills you learned this year in order to be successful next year & in the future! There are 8 pages of facts practice and 8 pages of skill practice in the packet. I recommend that you do 2 pages each week (one facts practice and one skills practice page). You will turn in your packet to your new 5th grade teacher when we return to school in August.

As you start middle school, you will build upon the many skills you have learned up to this year. Please make sure you have your math facts memorized (especially multiplication facts) in order to make the transition an easier one! Refer back to your math notes if you come across something you do not remember well. Practicing with flash cards is great, too!

Your teachers and I are proud of all you have accomplished as 4th graders and hope you have a wonderful summer!

Sincerely,

Mr. Insinga, Mr. Millan & Ms. Nkundikije
