Repairs to the roof at the campus natatorium have been completed, and installation of solar panels will begin soon. The solar panel installation at Campus is expected to take place over the next five weeks.

The start of construction on the CTE building has been adjusted, and work is now expected to begin in early June rather than in March.

Finally, the Capital Improvement Committee will be meeting with multiple playground vendors to begin exploring options for improving playgrounds at all six elementary schools. This process will help guide future decisions to enhance outdoor learning and play spaces for our students.

~ Jeff Hersh, Superintendent
