

At the October Board of Education meeting, Alloy Architecture presented preliminary design plans for the new Career and Technical Education (CTE) facility. The presentation provided an overview of the proposed layout, key program areas, and design concepts. Board members offered valuable feedback and made suggestions for adjustments to the design. Alloy will incorporate this feedback into the next phase of design development.

Hutton Energy Services has begun work on the installation of solar panels at the Transportation Building. In addition, the Hutton team will evaluate the roof at Campus High School next week to determine the next steps for installing panels on the natatorium. These solar projects are part of the district's ongoing efforts to improve energy efficiency and reduce long-term operational costs.
