This week, our elementary principals met with Alloy Architects and Hutton Construction to talk through playground needs at each school. These conversations are helping the District plan spaces that are safe, engaging, and enjoyable for our students for years to come. Work is also moving forward on the new CTE facility. The team designing the kitchen areas is putting the final changes on those plans and will work with the staff at Campus to ensure the plans provide our students with access to an industry style space.

Looking ahead, bids for several upcoming projects, including roofing, HVAC systems, and locker room improvements, will be released on April 3.

~ Jeff Hersh, Superintendent
