

CLSD Student Wellness and Success Fund Plan

Canfield Local School District is dedicated to addressing the comprehensive needs of the Whole Child, encompassing physical, social, emotional, and intellectual well-being. The district utilizes a Multi-Tiered System of Supports (MTSS) framework with a three-tiered model designed to provide academic, behavioral, and social-emotional support for all students. Behavioral health initiatives are guided by Positive Behavioral Interventions and Supports (PBIS), and the district's strategic goals emphasize mental health awareness, prevention, and ongoing staff training. Canfield Local Schools also promotes trauma-informed practices to ensure staff members are equipped to recognize and respond to the diverse needs of students.

The district collaborates with the Educational Service Center of Eastern Ohio (ESC of Eastern Ohio) to receive consultation and support related to PBIS implementation, prevention services, and school social work. Through a partnership with Insight Counseling, licensed mental health professionals are available during school hours to provide counseling services for students who may not otherwise have access to private mental health care. Additionally, district funds support school-based counseling services for elementary students.

To promote student physical health and wellness, the district allocates resources for school health aides and nursing services throughout the school system.

In 2021, Canfield Local Schools administered a comprehensive school climate survey to parents, staff, and students to assess perceptions of school culture, safety, connectedness, and overall well-being. The district plans to readminister the survey in 2026 to evaluate growth, measure the impact of Student Wellness and PBIS initiatives, identify areas for continued improvement, and inform future planning efforts.
