Project 1: Animal Care Analysis

In this project, you will explore the veterinary field by analyzing animal care treatments and veterinary services. You will examine how veterinary professionals diagnose, treat, and care for animals while promoting health and wellness. Using your research, you will identify trends and evaluate what makes animal care services effective.

Step 1: Study Veterinary Treatments or Services

Study **5–8 veterinary treatments or services** (wellness exams, vaccinations, surgeries, rehabilitation, grooming, emergency care, etc.)

Record the following for each:

- Service or treatment name
- Purpose and type of animal served
- Equipment or techniques used
- Preventive care or wellness practices
- Safety or care considerations

Step 2: Organize Your Data

- Create a comparison chart or table (Excel or Google Sheets)
- Clearly display all services/treatments and their details
- Group or sort in a meaningful way (by animal type, care category, or treatment purpose)

Step 3: Analyze Bias and Style

Identify patterns such as:

- Preventive care strategies
- Use of technology in veterinary medicine
- Client communication and education practices
- Differences between routine and emergency care

Answer:

- What trends do you notice in veterinary care?
- What makes animal care services effective?
- What challenges do veterinary professionals face?

Step 4: Make Recommendations

Based on your findings, answer:

- What should veterinary professionals focus on to improve animal care and client education?

Provide **2–3 specific, realistic suggestions** and explain them.

Examples might include:

- Expanding preventive care education
- Improving communication with pet owners
- Increasing access to wellness resources

Final Deliverables (2 Completed Projects)

1) Comparison Table (Required)

A clear chart or table showing your 5–8 services or treatments and their details

2) Summary of Findings (Required)

Choose one format:

- 1–2 page written summary
OR
- 10–12 slide presentation

Your analysis must include:

- Key veterinary care trends
- Explanation of effective animal care practices
- Your recommendations for improvement

Project 2: Pet Care Education Materials

In this project, you will take on the role of a veterinary professional by creating educational resources for pet owners. You will design materials that help owners better understand animal health, wellness, and safety.

Step 1: Choose an Animal Care Topic

Select a topic such as:

- Nutrition and healthy diets
- Vaccination schedules
- Pet safety and emergency care
- Exercise and wellness

Step 2: Research Accurate Information

Gather information by:

- Proper animal care practices
- Preventive health recommendations
- Common owner questions or concerns

Step 3: Create Educational Resources

Write 3–5 pet care materials

Examples:

- Flyers or brochures
- Social media posts
- Infographics
- Posters

Each resource should include:

- Clear and accurate information
- Easy-to-understand language
- Helpful visuals or organization

Step 4: Develop Improvement Ideas

Create 3–5 ideas to improve pet owner education and engagement.

Examples:

- Wellness reminder programs
- Community pet care workshops
- Improved communication between clinics and clients

Final Deliverables (2 Completed Projects) ★

1) Materials (Required)

3–5 completed pet care education resources

2) Improvement Ideas (Required)

A list of strategies to improve animal wellness education and communication

3) Extension Activities (Optional)

- Conduct interviews with veterinary professionals
- Create a pet wellness campaign
- Present educational materials to peers or community members
